

THE CENTRAL INDIA STATE GAZETTEER SERIES.

REWAH STATE

GAZETTEER.

Volume IV.

TEXT AND TABLES.

COMPILED BY

CAPTAIN C. E. LUARD, M. A. (OXON.), I. A.,

Superintendent of Gazetteer in Central India,

COMPLIMENTARY.

ASSISTED BY

PANDIT JANKI PRASAD, M. A., LL. B.,

Secretary to His Highness the Mahārājā of Rewah.

—
Lucknow:

NEWL KISHORE STEAM PRINTING PRESS.

—
1907.

Price Rs. 2-4 or 3s.

PREFACE.

THE Gazetteer was compiled by Pandit Jānki Prasād, Secretary to His Highness, and has been excellently done.

As regards the two main sections, Historical and Statistical, I am mainly responsible for the former, all the reference work being mine, the State histories compiled of late years being glaringly inaccurate.

The statistics given afford the latest available, which were collected only with difficulty as it is not usual to keep returns such as were required in the Gazetteer.

Many sections might be made fuller on revision. On the whole the work reflects great credit upon Pandit Jānki Prasād to whom my best thanks are due for his care and great promptness in answering my numerous demands. To His Highness Mahārājā Venkat Raman Singh I would tender my thanks for his support of the work which has materially aided my labour.

Pandit Shridhar Vinūyak, Head Clerk, and the staff of the headquarter office have worked excellently in checking and preparing proofs for the press.

INDORE:	}	C. E. LUARD, CAPTAIN,
<i>The 10th April 1907.</i>		<i>Superintendent of Gazetteer in Central India.</i>

BIBLIOGRAPHY.

The works relating to the tract of Baghelkhand, and the Rewah house are not very numerous. The history of the tract is scattered through various papers in Journals, while that of the Chiefs is given mainly in the *Maāsiri-ul-Umra*.

The following works may be mentioned as useful more or less for general reference :—

Ain-i-Albani.—Translated by Blochmann and Jarret.

C. A. S. R.—*Archæological Survey Reports* by Sir A. Cunningham.

E. M. H.—*The History of India as told by its own historians* by Sir H. Elliot (chiefly Muhammadan).

I. A.—*The Indian Antiquary*.

J. A. B.—*Journal of the Asiatic Society, Bengal*.

Other works are given where specially referred to.

ARMS OF THE REWAH STATE.

Arms—Or : tiger statant, in chief a *tilak* proper.

Crest—A dexter hand ensigned with a flame proper.

Supporters—Tigers.

Motto—चृगेन्द्र प्रति द्वन्द्वं ताम्मा प्रयात् ॥

Mrigendra prati dwandwa tamma prayāt.

“Do not fight with (or make war against) tigers.”

Note.—The Rewah *Rāj* is guarded by tigers, while the founder of the dynasty was Vyāghra Dev or the Tiger King.

The motto indicates that it is futile to fight with the Rewah *Rāj* as the tigers guarding it are invincible.

The *Katār* is the favourite weapon of the Baghels.

Gotrāchār—

Gotra—Bhāradwāja.

Veda—Yajur.

Shūkha—Mādhyandini.

Prawara—Bhāradwāja, Anarishī, Bārhaspatya.

Sūtra—Kātyāyana.

igion—Shri Vaishnava.

The ruler belongs to the Baghel branch of the Solanki or Chālukya Kshatriyas which played a very important part in the history of Southern India and Gujarāt before the Baghels migrated to the country called “Baghelkhand” after them.

CHAPTER I.

DESCRIPTIVE.

Section I.—Physical Aspects.

THE Rewah State is next to Gwalior, the largest State in the Central India Agency. It is the only Treaty State in the Baghelkhand Political Charge. The State has an area of about 13,000 square miles, comparable to that of Bulgaria (13,862), lying between 22° 30' and 25° 12' north latitude, and 80° 32' and 82° 51' east longitude.

Situation
and Area.

The State derives its present name from its chief town which was in all probability called after the Narbadā river, a synonym for which is Rewa.

Name.

The old capital of the State was Bāndhogarh, a strong fort lying in the south-south-east of the State. In 1597 it was destroyed by Akbar's army under Rājā Patr Dās, and remained a Muhammadan possession until 1602, when it was restored to Rājā Vikramāditya. In the meantime the fort of Rewān, as it is styled by Muhammadan historians, had become the chief's place of residence. Under Rājā Vikramāditya it gradually grew into a large town. From the 16th to the 18th century the region in which the State lies was known as Bhata or Bhat-ghora, and the chief was variously designated Rājā of Bhata or of Pannā or of Bāndhu. Pannā is now the chief town of a state in Bundelkhand, but it is questionable whether the word Pannā in Persian MSS. is not in some instances a mistranscription for Bhata.

The State is bounded on the north by the Banda, Allahabad and Mirzāpur Districts of the United Provinces, on the east by the Mirzāpur District, and the Feudatory State of Chota Nāgpur, on the south by the Central Provinces, and on the west by the states of Maihar, Nāgod, Sohāwal and Kothl in this Agency.

Boundaries.

The State may be conveniently divided into three sections, the central plateau, in which the chief town stands known as the *Uparihār* or Uplands, the lowlying region in the Teonthar *tahsil* known as the *Tarihār* or Lowlands, and the hilly tract south of the Kaimur range.

NATURAL
DIVISIONS.

The *Uparihār* comprises all the country lying round the chief town. It consists of a large alluvial plain with an area of 3,778 square miles, bounded on the north by the Vinjh pahār, the arm of the Vindhya, which stretches east from the Pannā range; on the south by the Bhānder range, and on the south-east by the Kaimurs; on the west it passes out of the State area into Bundelkhand. It forms a broad plateau sloping from the line of the Kaimurs towards the Vinjh pahār, traversed by the Tons river and its numerous tributaries.

The Upari-
hār.

The *Tarihār* lies below the Vinjh pahār, and to its north abuts on the Gangetic plain.

The Tarihār.

The hilly tract lies south of the Kaimur scarp. It is traversed by a series of parallel ridges running generally north-east by south-west, enclosing deep valleys, the whole region being covered with heavy forest.

Hilly tract.

SCENERY

These varied conditions give a great diversity of scenery. The plateau forms a broad level stretch of country covered with fertile soil on which cultivated fields and groves abound. At its northern and southern boundary it terminates abruptly in a bold scarp. Over the northern scarp the great Tons river falls in a series of magnificent cascades into the Gangetic plain, while on the southern side a similar effect is produced on smaller scale by the streams which precipitate themselves into the Son valley. Beyond the great scarp of the Kaimur range lies a forest-clad medley of hill and valley, with the Son river and its tributaries flowing through it.

HILL
SYSTEM.

There are two main water-sheds in the Rewah State, the Kaimur range, the arm of the Vindhya, which strikes north-east from the main line close to Jukehi station on the East Indian Railway, and the Maikala range, on which the sacred village of Amarkantak stands. The Kaimur, striking north-east from Jukehi, runs for 109 miles through Rewah State. At Bara-ghât, 18 miles beyond Govindgarh, it branches into two. The upper branch, which turns west and ultimately unites with the Pannâ range, is locally called the Vinjh pahâr, while the other branch, which runs eastwards into the United Provinces, is called the Kehanjua pahâr. The Kaimur range has an average height above sea-level of 1,800 feet, while individual peaks reach to over 2,000. The most important peaks are the Gidhaila peak (2,334), Bhitari (2,310), Katâra (2,267), Popra (2,228), Mowhâs (2,021), and Remâs (1,931). The Gidhaila peak is considered very sacred, and at Mowhâs stand the ruins of an old fort. The inhabitants of the ranges are chiefly Kols, Ahirs, Gonds and Chamars. Numerous passes traverse the ranges, the most important being Gursari-ghât, Popra-ghât, Marmani and Bara-ghât.

RIVERS.

From the line of the Kaimurs numerous streams flow towards the Ganges-Jumna doâb. Of these the most important is the Tons.

The Tons.

The Tons, the *Tamasa* and *Parnâsa* of the Purânas, and the Râmâyana, and the *Prinas* of Megasthenes,¹ rises in the Maihar state at Jukehi (23° 59' N., 80° 29' E.), its nominal source being the *Tamasa-kund*, a tank standing on the Kaimur range some 2,000 feet above the sea. From this point the river follows a general north-easterly course for about 116 miles through the states of Maihar and Rewah, passing into British territory at Deora village (25° 4' N., 81° 44' E.).

After traversing the rough hilly country round Maihar, the river flows through the level fertile country of the Rewah home district where it is joined by the Satna river, its principal affluent, 5 miles south of Mâdhogarh (24° 34' N., 81° 0' E.), not far from the spot where it is bridged by the East Indian Railway. Forty miles lower down it reaches the edge of the plateau at Purwa, where, together with its affluents, the Bihar and Chachina, it presents a magnificent series of water-falls. The greatest fall is that of the Bihar which precipitates itself off the plateau in a great sheet of water, 600 feet broad and 370 feet high. The fall of the Chachina is rather smaller, being only 300 feet in height with a rapid 500 yards long below it.

1. McCrindle—*Megasthenes and Arrian*, 131.

"The grandeur of this fall is increased by the rapid, which adds to the force with which this body of water is projected through the lines formed by the stupendous banks of rock, which, diverging as they approach the *ghāts*, and affording a distant view of the country below them, form a vista truly grand and beautiful." ¹ The Tons itself has a fall of only some 200 feet in height, and 500 in breadth.

In the end of the rainy season the sight is a magnificent one and well worth a visit "the verdure of the grass is there too brilliant to appear natural on canvas. Every tree affords a fragrant blossom; every plant a flower; yet the eye is so fascinated by the awful grandeur of the fall, that it is long ere it rests on the softer beauties of the landscape." When the sun shines through the spray below, the "prismatic colours, in their most vivid tints, form.....an extensive rainbow." ² This fall continues throughout the year, and might possibly be made of great commercial value as a source of power.

Leaving the hollow rocky channel at the base of the fall, the Tons again flows through a level plain spreading out into a wide stream with frequent long deep reaches, till it finally leaves the State at Deora. The stream is used for irrigation wherever the banks render it possible, while navigation in small boats is regularly carried on between Sitlaha (24° 57' N., 81° 36' E.), and Teonthar (24° 59' N., 81° 45' E.). In the rainy season the river becomes dangerous owing to its liability to sudden flood.

The Son (from *Sona*, the "red-gold" or "crimson coloured") rises near the Narbadā at Amarkantak (22° 40' N., 81° 46' E.) in the Maikala range, the hill on which its nominal source is located being called Sonbhadra, or more commonly Son-munda.

The Son.

The river is of some historical importance, being the *Erranoboa* (*Hiranyavāha*) of Arrian and Megasthenes ³ and the *Sea* of Ptolemy. Various origins for this name are given, the most probable seems to be *Hiranyavāha*, "gold-bearing" from the red-gold colour given it by the quantity of sand it holds in suspension during the rains, or possibly from the existence, in former days, of gold in its alluvium. Various other explanations are current, and are recorded in the *Sonamāhātmya* and *Bṛihad Brahma Purāna*, but they are mostly modern derivations of the usual "striving-after-meaning" class.

Its waters possess great sanctity, the performance of *Sandhya* on its banks ensuring absolution and the attainment of heaven even to the slayer of a Brāhman. Legends about the stream are numerous, one of the most picturesque assigning the origin of the Son and Narbadā to two tears dropped by Brahma, one on either side of the Amarkantak range.

It is frequently mentioned in Hindu literature in the *Rāmāyanas* of Vālmik and Tulsī Dās, the *Sri Bhāgvat* and other works.

1. Pogoan—*A History of the Boondelas* (1828), page 173.

2. *Ibid.*

3. McCrindle—*Megasthenes and Arrian*, 135-187, and *Ptolemy*, 94.

The river soon after leaving its source falls in a cascade over the edge of the Amarkantak plateau amid the most picturesque surroundings, and flows through the Bilāspur District of the Central Provinces till it again enters Rewah State territory at $23^{\circ} 6' N.$, and $81^{\circ} 59' E.$ From this point till it leaves the State, after a course of 288 miles, the stream flows through a maze of valley and hill, for the most part in narrow rocky channels, but expanding in favourable spots into magnificent deep broad reaches locally called *Dahār*, the favourite resorts of the fisher caste. Following at first a northerly course for about 145 miles, it encounters, at its juncture with the Mahānadi river at Sarst ($24^{\circ} 5' N.$, $81^{\circ} 3' E.$), the bold scarps of the Kaimur range, and is turned in a north-easterly direction, finally leaving the State five miles east of Deora village ($24^{\circ} 36' N.$, $82^{\circ} 47' E.$). Besides the Mahānadi there are three other affluents of importance, one on the left bank, the Johilla, which also rises at Amarkantak, and enters at Barwāhi village ($23^{\circ} 37' N.$, $81^{\circ} 16' E.$), and two which join it on the right bank, the Banks ($24^{\circ} 17' N.$, $81^{\circ} 29' E.$), and the Gopat near Bardi ($24^{\circ} 32' N.$, $82^{\circ} 29' E.$). The river bed is formed of Vindhyan sandstone practically throughout its whole length, the sandy bottom in many places taking the form of dangerous quick-sands called *chorbārā*. The river is little used for irrigation, but where the banks are low a rich deposit of silt is yearly deposited by the overflow of the stream, in which excellent crops are grown. The river, ordinarily of moderate dimensions and steady flow, swells, after a few hours rain, into a roaring torrent, often causing severe damage to the neighbourhood.

GEOLOGY. 1.

The Geology of Rewah may be fitly described as an epitome of the Geology of the Indian Peninsula, there being scarcely a single formation met with in Peninsular India that is not represented here, while several important groups have been named after localities situated within the State. The type area of the Rewah section of the Upper Vindhyan, the red shales, all known occurrences of which are situated within Rewah territory, with the exception of a portion of the outcrop which extends eastwards into the Mirzāpur District; the Kaimur group of the Upper Vindhyan; the Kahanjua group of the Lower Vindhyan; and the Sirbū shales, one of the sub-divisions of the Lower Bhānder group, called after the range of this name having local appellations.

The following is a list of the formations represented in Rewah:—

- (28) Recent Alluvial Deposits.
- (27) High-level Laterite.
- (26) Deccan Trap and Trap Dykes.
- (25) Lameta.
- (24) Gondwana Fault-rocks.
- (23) Supra-Barakar.
- (22) Barakar.
- (21) Talchir.

GONDWANA

1. By Mr. E. Vredenburg, *Geological Survey of India*.

BHÄNDER	{	(20) Upper Bhänder Sandstone.	}	Upper Vindhyan.		
		(19) Sirbū Shales.				
		(18) Lower Bhänder Sandstone.				
		(17) Bhänder Limestone.				
		(16) Ginnurgark Shales.				
REWAH	{	(15) Upper Rewah Sandstone.			}	
		(14) Jhīri Shales.				
		(13) Lower Rewah Sandstone.				
KAIMUR	{	(12) Pannā Shales.			}	
		(11) Upper Kaimur Sandstone.				
		(10) Bijāgarh Shales.				
		(9) Lower Kaimur Sandstone.				
		(8) Rhotās Limestone.				
	{	(7) Kehanjua Group.	}	Lower Vindhyan.

		(3) Supra Bijāwar.				
	{	(2) Bijāwar.	}			
		(1) Bengal Gneiss and Schists.				

The Kaimur range forms the southern limit of the Upper Vindhyan. North of the Kaimur range all the other sub-divisions of the Upper Vindhyan are met with in succession. This area, which contains the capital of the State, is mostly an elevated plain occupied by the lower members of the Bhänder group, almost everywhere concealed beneath a thick covering of alluvium. Some of the highest hill tops carry a thick covering of laterite, bearing witness to a former extension of the Deccan Trap in this direction.

The Son and its tributary, the Mahānadi, approximately coincide with the southern boundary of the Lower Vindhyan.

This group is more completely represented in Rewah than anywhere else. The curious volcanic ash-beds called the "porcellanites" have the greatest part of their outcrop situated within the limits of the State. South of the Lower Vindhyan outcrop there extends a region occupied by long parallel ranges of wild jungle-clad hills interspersed here and there with strips of cultivated land. The hills belong mostly to the Bijāwar formation, while the cultivated areas are occupied principally by the underlying gneiss. This region, situated between the Vindhyan outcrop to the north, and the Gondwāna to the south, occupies the site of a once lofty mountain range whose denudation supplied materials for both the Vindhyan and the Gondwāna sediments. The Bijāwars exhibit an extremely varied series of slates, sandstones, jaspers, bands of iron-ore, limestones and basic lavas and ash-beds. Neither they nor the gneiss have been geologically surveyed in any detail. Their structure is roughly that of a syncline along the axis of which their uppermost beds are unconformably overlaid by several newer formations: first a group of slates, very similar to the Bijāwars themselves, but underlaid by sandstones and coarse conglomerate, entirely made up of Bijāwar fragments; then a series of massive sandstones

associated with shales of a deep red or purple colour, the "Red shale series," unconformable to these supra Bijāwars, and so similar to the Upper Vindhyan sandstones that they might easily be mistaken for them were they not themselves unconformably overlaid by the basement beds of a large outlier of Lower Vindhyan.

The Gneiss and Bijāwars abut abruptly in a southern direction against the almost rectilinear faulted boundary of the Gondwānas. Except for some inliers of Gneiss, the southern districts of Rewah are almost entirely occupied by the Gondwāna formation. It has been surveyed in great detail by Mr. Hughes who has divided it into three groups—the Talchir, Barākar and Supra-Barākar—the middle one being the coal-bearing formation. Basalt dykes and intrusive siltites belonging to the Deccan Trap period occur abundantly throughout the Gondwāna area.

Lastly, the southern border of the State is occupied by the cretaceous Lametas and Deccan Trap, the southernmost point of the territory, the celebrated hill of Amarkantak, consisting of the latter rock.

Mineral products.

Nearly all the formations represented in the State yield valuable mineral products. In the Gneiss area is situated the celebrated band of corundum at Pipra ($24^{\circ} 0' N.$, $82^{\circ} 41' E.$) near the Rehri river, which also contains indications of the presence of workable mica.¹ An attempt was once made to work a vein of galena in the Gneiss near Baigawāra in the Bardī tahsil, but was shortly afterwards discontinued. The Bijāwar formation appears to contain valuable bands of iron-ore. Some of the Bijāwar limestones could be turned to good account as ornamental marbles, while there is abundance of a bright red banded jasper, similar to that found in rocks of the same age near Gwalior and which is largely used for inlaid stone-work at Agra. So little, however, is as yet known of the Gneiss and Bijāwars in Rewah that it is impossible to pass any opinion upon their value as sources of mineral wealth.

Lime.

In addition to the excellent building materials obtained from the Vindhyan sandstones, one of the limestone bands, the Bhānder limestone, is extensively quarried. It burns into lime of superior quality, is used for smelting purposes, and has come largely into use lately as a paving stone.

Coal.

A rich store of fuel exists in the coal-seams of the Barākar group in the Gondwāna series. The colliery at Umarā has been successfully worked for many years, and the Johilla coal field, containing coal of even better quality, is being opened out. The Gondwāna beds sometimes contain feruginous nodules, perhaps of lateritic origin, that have been locally employed as iron-ore, and some of the laterite posterior to the age of the Deccan Trap has been used for the same purpose.

Clays.

Ceramic clays of good quality are found in the Gondwānas and in the Lametas.

Fossils.

The plant remains abundantly yielded by the Gondwāna formation have been described by Feistmantel in his monumental work on the

¹. *Economic Geology of India*. Corundum by T. H. Holland (1898), pp. 49-51. The Mica Deposits of India in *Mem. Geol. Survey of India*, XXXIV-11-121.

Fossil Flora of the Gondwana System, published in the *Paleontologia Indica*, to which some interesting observations have lately been added by Zeller in the *New Series* of that same publication, *Volume II*.

No complete account of the geology of Rewah has yet been written. South of the Kaimur range the Gueis and Bijawars have only received the most cursory examination; north of the Kaimurs the whole country, with the exception of a portion near Mithogarth, has remained unsurveyed in consequence of the unfortunate death in 1878 of Mr. W. L. Wilson, who for many years previous had been engaged upon an admirably accurate survey of Hundelkhand and Baghelkhand, working his way gradually from west to east.

With the exception of Mr. Wilson's work, which has never been published, all the geological results so far obtained will be found recorded in the publications of the Geological Survey. The most important contributions to the subject are Mr. Mallet's "Vindhyan Series" (*Memoirs*, VII, pp. 1—129), Mr. Hughes' "Southern Coalfields of the Rewah-Gondwana Basin" (*Memoirs*, XXV, pp. 137—249) and Messrs. Odham, Datta and Vredenburg's "Geology of the Son Valley" (*Memoirs*, XXXI, pp. 1—178).

The prevalent tree in the Rewah forest is *sal* (*Shorea robusta*), others being the *ray* (*Terrisalis tormentosa*), *tendu* (*Diospyros tormentosa*) and *Uar* (*Acacia catechu*). The brushwood consists mainly of the species *Grewia*, *Zizyphus*, *Cassia*, *Antiaria*, *Weddellia*, *Flacaggia*, *Phyllanthus*, *Ruellia* and *Baccharis* with occasional trees of *rubia* (*Berberis latifolia*).

The Rewah jungles are famous for their big game. Tigers are met with in considerable numbers, while bears, panthers, sambar (*Cervus unicolor*), chindra (*Gazella benettii*) and other species usually found in Peninsular India abound. Wild fowl of all classes are common throughout its area.

The climate of Rewah is subject to considerable extremes of temperature, especially in the hilly tract where the heat is often excessive, while the cold season is of short duration.

The average rainfall, as recorded at Rewah, is 12.28 inches. By natural division the average works out to 42.2 for the plateau or Uparihār, 41.5 for the Turihār and for the hilly tract 46.56. In 1891-95 a maximum of 61 was experienced, and in 1904-05 a minimum of 26.34.

No earthquake or storm of unusual character have occurred in the State.

Section II.—History. (GENEALOGICAL TREE.)

Before dealing with the history of the State it will be interesting to take a brief survey of the history of the tract now known as Baghelkhand.

The present name of the tract is derived from the clan name of the ruling house of Rewah. This name can only have come into general use in the 17th or 18th century, as it is never employed by Muhammadan

historians, who invariably term this region Bhatā, or Bhat-ghora, while in pre-Muhammadan days it was comprised in the regions known as Māha Kosala, Chedi-desh and Dāhala. In Akbar's day this tract fell partly in the Bhat-ghora and partly in the Kālanjar (Kālinjar) *sarkār* of the Allahābād *sābah*. It was, however, in great part a *terra incognita*, especially the Bhat-ghora or Bāndhu section about which Abul Fazl has little or nothing to say.¹ Aurangzeb separated the districts round Rewah from Bhat-ghora including it and Sohāgpur, in the Kālanjar *sarkār*.²

The Haihaya,
Chedis or
Kalachuris.

This region has been from very early days connected with the Haihayas, Kalachuris or Chedis, who were apparently branches of the same tribe. The Mahābhārata, Rāmāyana, Purānas and early Buddhist books all assign them sovereignty over this tract. It would appear that in Buddha's day the Māgadhas held the country up to the Son valley and the Chedis (or Cetis) Māha Kosala, lying to the north-west of it.³ They appear to have been a branch of the great Haihaya tribe. The Haihayas early acquired the Narbadā valley, their first capital being at Māhishmati, now Maheshwar in Indore State. They claimed Yādav descent and traced their origin to a mythical ancestor called Kārtavīrya Arjuna, of a thousand arms.⁴ The connection with Māhishmati was always carefully preserved, and we find Haihaya officials in the 11th century serving under the Western Chālukyas of Kalyān, still described as "Lords of Māhishmati, the best of towns." The Haihaya main branch appears to have been gradually driven eastwards towards the source of the Narbadā, where they remained for many centuries as feudatories of the various dynasties which successively ruled that tract. Baghelkhand, during the second and third century B.C., more strictly speaking, the portion north of the Kaimur range, was held by the Maurya dynasty, the great Stupa at Bhārhut, being erected under the auspices of Asoka. In the first century A. D. it fell to the Sungas, one of the gates of this same stupa bearing an inscription referring to its erection during the rule of this dynasty.⁵ During the fourth and fifth century A. D. it was in the hands of the Guptas of Māgadha. Their rule is recorded in the inscriptions of the feudatory kings of Ujjhakaśipa and of the Parivrajaka Rājās, found at Kho in Nāgod State.⁶ It is recorded in these inscriptions that the king concerned is "in enjoyment of sovereignty by (favour of) the Gupta king." In one of these records, moreover, the king is stated to have "sought to give prosperity to the kingdom of Dāhala, which had come to him by inheritance and the eighteen forest kingdoms." This is of interest, as Samudra Gupta (350 A. D.) in his Allahābād pillar inscription mentions the

conquest of "the forest kingdoms," which may possibly be a reference to these chiefs, while the Arjunayas mentioned in the same record as a frontier tribe may refer to the Haihayas as the descendants of Arjuna.¹ The remains of numerous buildings, and several rock-cut temples also testify to the Gupta dominion.² The Haihayas, Chedis or Kalachuris now began to rise in importance. Historically nothing definite is known as to the rise of this clan, but the fact that they employ an era of their own, of which the initial year corresponds to A. D. 249, points to their having become a tribe of some local importance about the third century A. D. Traditionally the establishment of their position is connected with the capture of the fort of Kālanjar, where one Krishna Chedi slew "an evil-minded king who practised cannibalism."³ By the end of the sixth century they had become of sufficient importance to engage in a contest with Mangalisa, the Chālukya king of Badāmi, who in his Mahākūta (Bijāpur) inscription of A. D. 598 records a victory over Buddha-Varman Kalatsuri (Kalachuri), son of Sankaragana of Chedi, during a campaign in "the northern regions."⁴ The Vrihat Samhita,⁵ written in the 6th century, mentions the Chaidyas as a people of the *Madhya-desh* or middle region of India.

During the seventh century the strong arm of Harshavardhana, of Kanauj (606-48), kept all the tribes in subjection. On his death in 648 A. D., however, they were left to their own devices and the more enterprising at once came to the front. During this period, while the Paramāras were establishing themselves in Mālwa, the Rāshtrakātas in Kanauj and the Chālukyas in Gujarāt and Southern India, the Chedis seized on Baghelkhand. With Kālanjar as a base they rapidly extended their sway, the tract becoming known as *Chedi-desh* after them. Their proudest title was *Kālanjara-puravaradhīśvara*, or lords of Kālanjar, best of cities.⁶

From the 9th century to the end of the 12th we have a line of Kalachuri kings ruling in this tract.⁷ The Kalachuris later on came in contact with their neighbours, the Chandellas of Bundelkhand, and received at the hand of Yashovarman Chandella (925-55) the first serious blow to their supremacy, losing the fort of Kālanjar and the title of "Lords of Kālanjar" which was henceforth assumed by their conquerors.⁸

The most famous Kalachuri king of this line was Gāngeyadev Vikramāditya (1038-42) who is mentioned by Al Birūni, the 11th century Geographer. He was a contemporary of Ganda Chandella

(999-1040). Gangeya attempted to found a large empire and so far succeeded as to have his suzerainty recognised in Nepāl.¹

His son and successor, Karnadev (1042-1122) tried to follow in his father's footsteps. In 1053 he joined with Bhūma I of Gujāt (1022-63) in attacking Dhār and forcing Rājā Bhoja to flee.² He was later on defeated by the Chandella king, Kirtivarmān (1098-1100).³ Gangeyadev struck the only coin of this house, which was later on used by the Chandellas and Rāshtrakūṭas as a model for their coinage. Several records of this dynasty have been found in Baghelkhand itself.⁴

The
Chandellas.

About the 12th century the Chandellas, driven eastwards by the Muhammadans, expelled the Kalachuris from their districts north of the Narbadā. This is shewn by the records of the feudatory chiefs of Kakaredi, a place 40 miles east of Kālanjar, who in copper-plate grants of 1175 and 1195 A. D. recognise the suzerainty of the Kalachuris, but in later record of 1239 A. D. acknowledge the suzerainty of the Chandellas. The latest known Chandella record is dated in A. D. 1289.⁵

Tribal rule.

On the destruction of the big suzerain clans by the Muhammadans, the country was left at the mercy of various tribes, such as the Bhars, Sengar and Chauhān Rājputs, Gond and others. Of these the Bhars⁶ are the most interesting. They appear to have held Kālanjar in the 13th century and to have been able to oppose even the Muhammadan forces. Their descendants still inhabit the Manganj, Huzūr, Raghurājnagar and Bardi *tahsils* in Rewah.

The ancestors of the Parihār Rājputs of Nāgod State who ruled most of Bundelkhand in the 8th century appear to have entered Baghelkhand about the 9th century, on the destruction of their power by the Chandellas. The Nāgod State records, however, relate only to the 14th century when the Parihārs seized Naro Fort from the Tel Rājās.⁷

The
Baghelas.

We now pass to the history of the Baghelas. The Rewah Chiefs are Baghela Rājputs, a section of the Chālukya or Solanki clan tracing their descent from the rulers of Anhilwāra Pātan. In the 7th century the Chāvāda or Chapotkata dynasty, who were ruling in southern Gujarāt, were driven from their dominions, tradition says, by Bhuvāda of Kalayān in Kanauj, but more probably by the Tājika Arab raid of 739 A.D.⁸ The Chāvāda king's pregnant wife escaped with her brother to the jungles where she bore a son, called from the region of his birth Vana-rājā, "the jungle king." About 750 Vana-rājā founded the Chāvāda dynasty of Gujarāt with Anhilwāra Pātan as chief town. His

successors ruled till 941, A.D. when they were ousted by the Chālukyas. The Chālukyas are one of the four Agnikula Rājput clans, who claim descent from the sacred fire-pit at Mount Abu, the Paramāras, Parihāras and Chauhāns being the other three. The Chālukyas were created by Brahma who made the image of a man from his own essence in the palm of his hand and cast it into the sacred fire, whence arose a warrior wearing the *janeyu* with a sword in his right hand, and in his left a Veda. The Chālukyas are divided into sixteen branches.¹

"The name Chalukya is a sanskritised form, through an earlier form Chhalukya, of the old names Chalkya, Chalkiya, Chirikya, Chalukya of the great Dakhan dynasty (A. D. 552-973), made to harmonise with the Parani-looking story, that the founder of the dynasty sprang from the palm (*Chuluka*) of Brahma. The form Chalukya seems to have been confined to authors and writers. It was used by the great Dakhan poet Bilhana (*Circ.* 1050) and by the Anahilwara chroniclers. In Gujarat the popular form of the word seems to have been Solaki or Solanki (a dialectic variant of Chhalukya)."²

The true origin of the Agnikula clans has been the subject of much discussion. There is no doubt that they were of foreign extraction and came from the northern frontiers of India. Proving themselves valuable supporters of the Brāhman faith, this well-known story of their creation at Abu was invented to give them celestial origin and include them in Hindu fold as orthodox Kshatriyas. There are some reasons for believing that these four clans were sections of the great Gurjara tribe, which early acquired Gujarāt, and spread over most of Central and much of Southern India.³

The last Chāvada was Sāmantasinha, whose sister had married Rājī, a descendant of the Chālukya king Bhuvāda who destroyed the Panchāsar kingdom. Rājī's son Mulrājā murdered his uncle and seized the throne founding a line of kings who ruled until 1242.

In the reign of Kumārāpāla (1113-72) one Anāka Solanki (or Arnorājā), who was a son of Kumārāpāla's mother's sister, rose to prominence. For his services he received from Kumārāpāla the rank of Sāmanta and the village of Vyāghrapalli or Vaghela "the tiger's lair," ten miles south-west of Anhilwāra, in *jāgīr*. From this village the Vaghela or Baghela branch takes its name. His son was Lavana-prasāda, who appears in Ajayapāla's time (1172-76) to have been governor of Udayapura and Bhilsa (now in Gwalior), then under Gujarāt.⁴ He became later on minister to Rājā Bhīm II (1178-1242) and acquired the village of Dhavalagarha or Dhavala corrupted later to Dholka, thirty miles south-west of Vaghela. An able administrator

he continued, while Bhīm was making an ineffectual stand against the Muhammadans, to become in fact, ruler of all Gujarāt, even issuing grants for land,¹ although neither he nor his son ever assumed the insignia of royalty.

Lavanaprasāda married Madanarājñī and had a son Viradhavala ("hero of Dhavala"). Viradhavala (1219-38) was a strong ruler, and managed to successfully oppose the advance of Muiz-ud-din Muhammad Ghorī (1191-1205). In 1238 Viradhavala died and a competition took place for the throne between his two sons Virama and Viśāldev. Viśāldev finally succeeded. He refused to recognise his overlord Tribhuvanapāla, the successor of Bhīm and nominal ruler of Gujarāt, and seized Anhilwara making it his capital. He was followed by Arjunadev (1262-74), Sārangdev (1274-96), and Karnadev. Karnadev ruled nominally till 1304, but in 1298 he was attacked by Ulugh Khān, brother of the emperor Alā-ud-din, and Nasrat Khān, who captured and sacked the capital, Karnā flying for asylum to Rāmdev at Devagiri where he appears to have died a fugitive some years after.²

The Baghelas state that a son of Viradhavala (1219-38), called Vyāghradev, made his way into northern India and obtained possession of the fort of Marpha, 18 miles north-east of Kālinjar. The Rewah family are singularly devoid of reliable historical records. Such histories as exist are of modern composition, and confuse persons and dates in a most bewildering manner, and were it not for the detailed accounts of the Muhammadan writers, it would be impossible to give anything like a connected account of the line.³

The date assigned by the State records to Vyāghradev's migration to northern India is 681 A. H. or A. D. 1283-84.⁴ Vyāghradev married the daughter of Rāja Makunddev Chandravat and had five sons. The eldest Karnadev succeeded him, while the second son was the ancestor of the Raos of Kasauti, now represented by the Bāra Rāja in the Allahābād District.

Karnadev after his succession married Padma Kunwarī, daughter of Somadatta, the Hailaya chief of Ratanpur, who brought him in her dowry the fort of Bāndhogarh. Karnā moved his residence to the fort, which became the foundation of the future Baghela dominions, and was their capital till 1597. On the destruction of the Baghela dynasty of Anhilwara in 1298, a great migration of Baghelas took place to Bāndhogarh.

Of the next thirteen rulers little or nothing is recorded. With Bhīradev, the sixteenth chief, however, we strike firmer ground.

1. I. A., VI, 180.

2. E. M. H., III, 163, 551.

3. See Appendix A.

4. Not 381 of Haraha era as Cunningham states (Arc. Sur. Rep., XXI, 104).

The earliest historical reference to a Baghel chief of Rewah is in the time of Bahlol Lodi (1451-89). The Baghel chief of the day Raja Bhira or Bhaira, also called Rājā Bhīr and Rājā of Pannā by the Muhammadan writers, assisted Husain Shah Sharki of Jaunpur who was flying before the Emperor. Bahlol Lodi had defeated Husain Shah and obtained possession of Jaunpur into which place he had put Mubarak Khan as governor.¹ This took place in 1487-89. The Baghel chief continued to support Husain Shah, and in 1492, in Sikandar Lodi's day, when Mubarak Khan was driven from Jaunpur, Rājā Bhira imprisoned him.² Sikandar Lodi (1489-1517) thereupon made an advance into Bhata, upon which Rājā Bhira set Mubarak Khan at liberty. The Raja continued, however, to support the Jaunpur house, and in 1494 Sikandar was obliged to enter Baghelkhand. He marched as far as Kantit (25° 10' N., 82° 35' E.) where Bhira met him and offered his allegiance. Sikandar restored him Kantit and retired towards Arail (25° 25' N., 81° 57' E.) and Prayag (Allahabad), but Bhira, suspicious of his intentions, suddenly abandoned his camp and fled. One historian states that Sikandar collected Bhira's property and returned it to him, but the author of the *Maghzan-i Afghāni* is no doubt correct in saying he looted it.³ In 1495 Sikandar again attacked Bhira. At Khan Ghatt, probably Kathaulighāt, he was opposed by the Raja's grandson, Bir Singh, who was defeated and fled to Pannā pursued by Sikandar. Bhira then fled towards Sirgūjā (?), but died on the road. Sikandar advanced as far as Paphund (24° 0' N., 81° 9' E.), 20 miles north of Bandhogarh, but owing to the failure of supplies and great losses among his horses he was forced to retire on Jaunpur. Lakhmi Chand, one of the Raja's sons, at once informed Husain Shah of the straits into which Sikandar had fallen.

Husain thereupon proceeded to attack him but Sikandar contrived for a time to evade a meeting. Meanwhile Sikandar sent conciliatory messages to Rājā Salivahan, the son and successor of Bhira, and induced him to come to his aid, and Husain was defeated.⁴ Sikandar at this time requested Salivahan to give him a daughter in marriage. Salivahan refused. This refusal rankled and in 1499 "to avenge himself for the old grievance he invaded the country and entirely destroyed all signs of cultivation." He advanced as far as Bandhogarh, but in spite of the most strenuous efforts was unable to take it and retiring to Jaunpur "sacked the country as far as Banda."⁵

Salivahan was succeeded in about 1500 by his son Bir Singh, the founder of the town of Birsinghpur (24° 48' N., 81° 1' E.) now in Pannā State. Bir Singh was on good terms with Sikandar Lodi and was a frequent attendant at his court. In about 1515 he gave asylum to Amān Dās of Garha-Mandla, better known as Sangrām Shah and the greatest ruler of that dynasty. Amān Dās, who was father-in-law to the famous princess Durgavati, is stated by Abul Fazl in the *Akbar-nāma*

Bhira
(1470-95).

Salivahan
(1495-1500).

Bir Singh
(1500-1540)

1. E. M. H., V, 89.

2. E. M. H., V, 93.

3. E. M. H., V, 91.

5. E. M. H., IV, 463,—D, F, I., 571.

to have been "an ill-disposed crafty fellow constantly engaged in evil pursuits. His father several times put him in confinement and then endeavoured to bind him with covenants and promises. But the graceless fellow again relapsed into his evil courses, and having been guilty of some disgraceful actions he fled to Nar Singh (Bir Singh) Dev, grandfather of Raja Ram Chander of Panna (Bhata). Raja Nar Singh treated him as a son, and when the Rājā went to attend upon Sultan Sikandar Lodī he left him behind with his son Parbihan (Virbhān) who was then a minor."¹

Arjun Dās, Amān Dās's father, then formally disinherited him. Upon this Amān Dās returned, and with his mother's connivance contrived to murder his father and seize the kingdom. Two of his father's old friends, however, informed Bir Singh who at once returned and overran Garha, forcing Amān Dās to take refuge in the hills. It is then related that "Aman Dās came to meet him (Bir Singh) on his road, attended by only a few followers. After great display of weeping the Raja forgave him and restored his country." Amān Dās in 1526 assisted Bahādur Shāh of Gujārat at Rāisen, in his campaign against Mahmūd of Malwā and was then given his title of Sangrām Shāh.²

Bir Singh is the "Nar Singh" who is mentioned by Bābar as assisting Rānā Sanka at the battle of Kanwāha (March 16th, 1527) with 4,000 horse.³ The Rewah State records shew that he afterwards received the Bhata territories in *Nānkār jāgīr* (maintenance grant) from Bābar when that monarch distributed his kingdom into provinces.⁴ Bir Singh died about 1510, and was succeeded by his son Virbhān.

Virbhān
(1540-55).

This chief was ruling during the time of Humāyun and Sher Shāh. A curious tale is current, that Humāyun flying before the victorious Afghān made over his wife Hamida Bānu to the care of Virbhān, and that while in asylum at Bāndhogarh, Akbar was born. The story will not bear examination, as Humāyun only married Hamida Bānu in Sind in 1511, and Akbar was born at Umarkot on October 15th, 1542.⁵

Possibly some of Humāyun's party took refuge with the Bāghī chief after the battle of Kanauj in 1539. The Muhammadan historians, however, tell us nothing about this chief.

Rām Chandra
(1555-92).

Virbhān was succeeded in 1555 by Rām Chandra⁶, who was contemporary with Akbar, and is constantly mentioned by Muhammadan writers. A copper-plate grant of his of 965 A. H. or 1557 A. D. is known.

The earliest notice of Rām Chandra is in 1555 when he was attacked by Ibrāhīm Sūr. The Rājā was victorious and made Ibrāhīm prisoner, but treated him "with great honour, seated him upon the

throne, and waited upon him as a servant." Ibrahim remained some time as an honoured guest with Rām Chandra.¹

In the sixth year of his reign (1562) Akbar heard of the great singer Tān Sen, then at Rām Chandra's court, and sent Jalāl Khān Qurchi to fetch him. Ibrahim Sūr had already endeavoured to bring him to Agra but in vain. Mian Tān Sen Kalāwat (musician), as he is called, was educated in the famous musical school of Gwalior, started by the Tonwāra chief Mān Singh in the 15th century, and which gave 16 out of the 36 singers and chanters at Akbar's court, mentioned by Abul Fazl. Tān Sen, who rose to great wealth and honour, died a Muhammadan and is buried at Gwalior, his tomb being close to that of the saint Muhammad Ghaus. Tān Sen's songs are still sung throughout India.

In the 8th year of Akbar (1564) Khwāja Abdul Majid Harāwi, better known as Asaf Khān, was appointed governor of Karrah and proceeded to take possession of his province. Ghāzi Khān Tātār,² the governor appointed under the Sūr dynasty, fled to Rām Chandra, and started raising a force. Asaf Khān thereupon "sent an urgent message to Raja Rām Chandra?.....and counselled him strongly for his own welfare to become a subject of his Majesty and pay him tribute..... and to send Ghāzi Khān, who had been a rebel and received shelter from him, to the Protector of the world."³ Rām Chandra refused and a sanguinary fight followed in which the Rājā was defeated and Ghāzi Khān killed, Rām Chandra fleeing to Bāndhogarh. Asaf Khān then advanced on Bāndhogarh itself but on the intercession of the Hindu chiefs at Delhi, Akbar raised the siege.⁴

During the time of Sher Shāh's successors the strong fort of Kālanjar was purchased by Rājā Rām Chandra from Alī Khān, the governor (Sher Shāh's son-in-law), for a high price.⁵ After the capture of Chitor (1567) and Ranthambor (1568) the local Muhammadan landowners were fired with a desire to take Kālanjar and Rām Chandra seeing that he could not hold the fort made it over to Akbar in *Safar* 977 (July 1569).⁶

For many years Rām Chandra could never be persuaded to pay his respects to Akbar in person, although he sent his son Virbhadrā to court. Finally, however, in the 28th year of Akbar (1583-84) Virbhadrā suggested that if some one among the royal servants with whom the old chief was acquainted were sent he would consent to come. Rājā Birbal, the famous wit, who had originally lived near the Baghel country⁷ and

7. Blochmann—*Ain-i-Akbari*, I, 193, 400. A local tradition says he was brought up in the Baghel court.

n nobleman Zain Khān Koka were sent. Rām Chandra accompanied them and had an audience with the Emperor at Fatehpur-Sikri when he was received with all honour and courtesy. He presented the Emperor with some rubies, one of which was valued at Rs. 50,000, and received in return 101 horses. Rām Chandra died in the 37th year of Akbar (1592). Badauni says "he left no equal behind him for princely generosity. Among his other gifts he gave a *kror* of gold to the minstrel Tan Sen in one day." ¹

Virbhadra
(1592-93).

Rām Chandra was succeeded by his son Virbhadra. Virbhadra was at Delhi at the time of his father's death and at once started for Bāndhogarh. On the road, however, he was upset out of his *pātki* and died soon after of his injuries. Akbar was fond of him and paid a visit of condolence to his relative, Rai Singh Rathor then at Court.²

Vikramāditya
(1593-1624).

Virbhadra left a minor son Vikramāditya. His succession was followed by intrigues and disturbances at Bāndhogarh, and Akbar deputed Patr Dās to restore peace.³ On his arrival he was begged by the young chief's supporters to take the youth to Delhi. Ismāil Qali Khān was, therefore, sent to Delhi with the boy and arrived there in 1596. A request was at the same time made that the fort should be spared, but Akbar, fully aware of the danger of leaving such strongholds, refused, and Patr Dās captured it after a siege of eight months and five days, in 1597. In 1599 Patr Dās was sent there as governor. From 1597 till 1602 Bāndhogarh and the surrounding districts remained under Muhammadan governors, the capital being moved to Rewah.

Vikramāditya after a short stay at Delhi returned to his own country. He died in 1624. The fort of Bāndhogarh was restored to him.⁴

Amar Singh
(1624-40).

He was succeeded by Amar Singh, his son, who in the 21st year of Jahāngir (1624) visited Delhi and paid his respects. In 1634, the eighth year of Shāh Jahān, he joined the army of the Khān Daurān in his campaign against the rebellious Bundelā chief Jhujhār Singh of Orchhā.⁵

Anup Singh
(1640-60).

Amar Singh was succeeded in 1640 by his son, Anup Singh, then a child of six years old. In 1650 Anup Singh was attacked in Rewah by Pahār Singh, Rājā of Orchhā, and was obliged to flee with his family to the hills. Anup Singh, in the 30th year of Shāh Jahān (1655-56), visited the Emperor and was received with great honour and granted the rank of *sch-hazāri* and the command of 3,000 Horse.

His younger brother, Fateh Singh, at this time founded the Sobāwal State.

1. E. M. H., V, 447, 538.

2. Blochmann—*Ain-i-Akbari*, I, 358.

3. Do, I, 469.

4. The State lists make Amar Singh successor of Vikramāditya, but contemporary authors insert the name of Duryodhan Singh, who is stated by *Maāsir-ul-Umra* (Text page 229) to have succeeded Vikramāditya in Anao Akbari 47 or 1602 A. D. and to have been given back Bāndhogarh fort, being followed by Amar Singh in the 21st year of Jahāngir. It is impossible to account for the discrepancy.

5. E. M. H., VII, 47.

He was succeeded in 1660 by Bhao Singh whose rule appears to have been uneventful.

Bhao Singh
(1660-90).

Anirudh Singh, his adopted son, then became chief. He was killed in a fight with the Sengar Thākurs of Mauganj ten years after his accession. He left an infant son, six months old, called Avdhūt Singh. Disturbances arose in the State, and finally Hirde Shāh of Pannā, taking advantage of the distracted condition of affairs invaded the country and forced the young chief and his adherents to fly from Rewah to Partāgarh in Oudh. An appeal was made to the Emperor Bahādur Shāh who at once sent troops to the relief of the Baghel chief, and Hirde Shāh evacuated Rewah, but contrived to retain possession of Birsinghpur which still forms a part of Pannā State.

Anirudh
Singh
(1690-1700).
Avdhūt
Singh
(1700-55).

In 1755 Avdhūt Singh was succeeded by Ajit Singh. In 1758 Ali Gauhar (Shāh Alam), the son and heir of Alamgir II, made an attack on Patna. Clive advanced against him and he fled to Makundpur in Rewah. Here he was given asylum by the chief, and at this place his son, afterwards Akbar II, was born.¹

Ajit Singh
(1755-1809).

In 1796 Ali Bahādur and an army of Marāthās attacked Rewah. The Baghel forces under Kalandar Singh Karchuli (*Kalachuri*) opposed them, but the Baghel chief was obliged to come to terms and pay a lakh of rupees. The wretched condition of the finances due to the late disorders is shewn by the fact that this sum had to be borrowed from Thākur Ishwar Singh of Mandan, a circumstance which later on led to serious quarrel. During the war against the Marāthās in 1803-04, a British force was stationed at Makundpur² to prevent the Marāthās striking southwards through this region. In this year overtures for a treaty were made by the British Government, which were, however, rejected by the Rājā.

On Ajit Singh's death his son, Jai Singh, mounted the *gaddi*. In 1812 a body of Pindāris raided Mirzāpur from Rewah territory. The Chief was believed to have abetted or at least countenanced the raid, and was accordingly called upon to accede to a treaty, in which he acknowledged the protection of the British Government, to whose arbitration he agreed to refer all disputes with neighbouring chiefs and to allow British troops to march through or be cantoned in his territories. The last condition was not, however, fulfilled and a fresh treaty was entered into in 1818.³

Jai Singh
(1809-33).

Jai Singh was a good scholar and the author of several works as well as a great patron of learning. He had three sons, Visvanāth Singh, Lakshman Singh of Mādhogarh, and Balbhadrā Singh of Amarpātan.

Jai Singh was succeeded on his death in 1833 by Visvanāth Singh who had actually controlled the administration of the State since 1813 during his father's life. He was an able ruler and also like his father a lover of literature and learning to which he gave great support.

Visvanāth
Singh
(1833-54).

3. Appendix B.

Raghurāj
Singh
(1854-80).

Visranāth Singh was succeeded by his son Raghurāj Singh. He also was devoted to literary pursuits, and gave great encouragement to scholars. He became an ardent Vaishnava under the influence of Mukundāchārya, whom he appointed chief *Swāmī* to the State and gave the Lakshman Bāgh as a residence.

In 1857 during the Mutiny Raghurāj Singh offered the services of a contingent force of 2,000 men to assist in keeping order in Baghelkhand. The offer was accepted and Colonel Hinde took command. Kunwar Singh, the rebel leader from Dināpur, attempted to march into Rewari, but Lieutenant Willoughby Osborne, the Political Agent, gathered the country people round him and beat him off. Colonel Hinde then took the offensive and cleared the Great Deccan road of rebels, keeping this line of communication clear.

For the good services rendered at this time Raghurāj Singh was granted the Sohāgpur and Amarkantak districts which had been seized by the Marāthās and had passed into British possession. In 1863 he ceded lands for the East Indian Railway, and in 1868 abolished all transit dues and farming of revenues, and also appointed Rājā Sir Dinkar Rao, K. C. S. I., the famous Gwalior minister, to reorganise his administration. In 1870 the separate Agency which had been abolished in 1862 was reformed, the Political Agent residing at Satna.

In 1860 Raghurāj Singh was created a G. C. S. I., receiving this Order at the hands of Lord Canning at Calcutta. In 1870 he attended the Agra *darbār* held in honour of the Duke of Edinburgh.

The condition of the State finances had become very unsatisfactory and in 1875 the administration, at the Chief's request, was taken over by the Political authorities. In 1876 the Chief attended the *darbār* held in honour of His Royal Highness the Prince of Wales (now King Edward VII), and in 1877 the Delhi Assemblage at which he received a Banner and Medal and was granted a personal salute of two extra guns. He died in 1880.

Venkat
Raman Singh
(1880-

The present Chief Venkat Raman Singh succeeded at 4 years old, the State being managed during the minority by the Political Agent. In 1895 he received ruling powers. In 1897 the State suffered from a severe famine in which every effort was made to give relief. For his excellent services in this connection he was created a G. C. S. I. in 1897. In 1903 he attended the Delhi *darbār* and received a gold medal. In 1905 he was presented to Their Royal Highnesses the Prince and Princess of Wales at Indore.

His Highness married twice, once with a daughter of the late chief of Dmraon, a Parmār Rājput, and secondly with a sister of the Rājā of Ratlam, a Rāthor. His Highness's younger sister married the Mahārāo of Būndī in 1903, but died the next year. He has a son and heir Mahārāj Kamār Gulāb Singh, born in March 1908.

Titles.

The Rewari Chief bears the titles of His Highness and Mahārājā and enjoys a salute of 17 guns. The present ruler bears the personal honour of the G. C. S. I.

ARCHÆO-
LOGY.

The Rewari State has already furnished archæological treasures of considerable importance, among which may be noted the records

of the Paritrājaka and Uchhkalpa Chiefs. Throughout the region, moreover, lie numerous remains which have not as yet been adequately explored. Among other localities may be mentioned the Alha-ghat pass, Gurgi Masaun, one of the sites proposed for the ancient city of Kausambi, Baijnāth, Chandrehī with its curious temple on a circular plan, the caves of Māra and the sacred pool of Kevatī kund. These places and others are all dealt with in the *Gazetteer*.

Section III.—Population.

(TABLES III, IV, V, AND VI.)

The State has been enumerated three times, giving in 1881 a population of 1,305,124, 1891 of 1,508,943 and 1901 of 1,827,385.

The density on the last occasion amounted to 102 persons to the square mile for the whole State with 176 persons to the square mile in the greater part of the State, but of only 72 in the hilly tract. A fall of 181,558 or 13 *per cent.* took place between 1891 and 1901.

In all, the State comprises four towns, Rewah (24,608), Satna (7,027), Umaria (5,381) and Govindgarh (5,022) and 5,565 villages:¹ Of the latter, 5,089 have a population of under 500; 413 of between 500–1,000; 95 of between 1,000–2,000; and 18 of between 2,000–5,000.

Of the total population, 1,201,658 or 93 *per cent.* were born in the State, and 30,611 or 2 *per cent.* in other States of Baghelkhand. Of the rest, 14,061 or 1 *per cent.* came from other States in Central India, and 52,186 or 3 *per cent.* from the United Provinces.

Of the population in 1901, 659,377 were males, and 668,008 females, giving 1,013 women to 1,000 men. The figures for civil condition give 105 wives to 100 husbands, due probably to excess of wives found in the hilly tract.

The State comprised 1,013,350 Hindus, forming 76 *per cent.* of the population; 529 Jains; 32,918 Musalmāns or 2 *per cent.*; 280,502 Animists or 21 *per cent.*; 24 Sikhs; 1 Parsi and 61 Christians. The last were mainly residents of Umaria, where there were 21.

The distribution shews 85 *per cent.* of Hindus and 12 of Animists in the Plateau area, and 69 and 28 *per cent.*, respectively, in the hilly tract; this latter estimate makes the Animistic figure too low, as the Gonds ordinarily return themselves as Hindus.

The question of female infanticide was raised in Rewah in 1893 when a great deficiency in girls was found to exist among the Parihar, Karchuli (Kalachuri) and Somvansi Rajputs. Measures were introduced for the surveillance of certain villages. The Census returns of 1901, however, gave no indication of any prevalence of the practice.

Of the population, 94 *per cent.* speak Baghelkhandi, the only other language of importance being Hindi. In 1901 there were 35,946 persons, able to read and write of whom 5,347 were females.

The chief castes are Brāhmans 228,049 or 17 *per cent.*; Kumbhīs 79,482 or 6 *per cent.*; Chāmārs, 78,163 or 6 *per cent.*; Rajputs, 72,126 or 5 *per cent.*; Ahīrs, 52,370 or 3 *per cent.*

Castes and Tribes.

¹ Since the Census of 1901, 831 new villages have been brought on the Register.

Occupations.

Of the total population 859,000 or 64 per cent. were cultivators and field labourers, 29,818 or about 3 per cent. herdsmen and 18,451 *zamindārs*; of other occupations 117,152 or about 9 per cent. were supported by general labour, and 25,700 by mendicancy (not religious), while 19,347 were workers and dealers in bamboos, etc.

SOCIAL
CHARAC-
TERISTICS.
Dress.

The isolated position of the State made it long before outside influence affected dress. The bulk of the population being members of the jungle tribes wore only the *langoti* or narrow slip of cloth of coarse texture, passed between the legs, the *angauchi* or *chaddar*, a sort of sheet used to cover the upper part of the body being a luxury indulged in by few. Even people of position wore a *dhoti* or loin cloth, *angauchi* and *muraiha* (*lit.*—twisted), a piece of cloth twisted to form a head covering and occasionally a *mirzai*, a short jacket often padded, reaching to the waist. A long coat called the *upanna-jāma* was added on special occasions. This last piece of costume has disappeared, except in the dress of the bridegroom at the marriage ceremony. A loose cloth called the *phenta* was carried thrown round the shoulders. The head-dress consisted of a *pagri*. In full dress the *anga* was added. It was a long coat made in the fashion known as *khuli-bank* or open-sleeved. The sleeves were cut wide from the elbow downwards and extended beyond the finger tips, so that it protected the hands in cold weather. The *mirzai* for smart use was cut close to the figure and made with pleats and called a *chunao-dār mirzai* (*chunao lit.*—a fold or pleat).

Though the *mirzai*, *anga*, *pañjāmas*, etc., are still generally worn by the people, at Rewah itself a tendency is noticeable to adopt semi-European attire. The European coat and waist-coat, tight fitting *pañjāmas* of native make, coloured *sāfa* of Rājputāna and European shoes forming the costume.

In women's dress no change has taken place and still consists of the *dhoti* and *choli* or bodice. The *lehenga* or skirt is seldom worn in Rewah, and never by widows.

Food.

Well-to-do people use *chapāti*, thin cakes of wheat flour, rice, *dāl*, vegetables and spices, etc., known as *sālan*. The commonest form of *sālan* is called *bagga* and is peculiar to Rewah. It consists of *jalebi*-shaped coils of gram flour (*besan*) made up with oil and curds, dipped in sugar, and is held to be a great relish. The middle classes also use rice, but to a less extent, and *dāl* and vegetables. The lower classes eat coarse bread made from the cheaper grains and *matha* or butter-milk.

The poor people have two meals a day, the *duphāri* or *jeonhār*, a mid-day meal taken after 12 noon and *biyāri* or supper, while the richer have in addition *kalewa* or breakfast at 8 A.M. and *sānjhlauka*, a light meal in the evening about 4 or 5 P. M.

The cost of living comes in the case of the poor to about one anna a day, in the middle class to 2½ to 3 annas, and in the well-to-do to 1 rupee. Friends are entertained at the mid-day meal, except by those who have become modern in their ideas and do so at the evening meal. Often such entertainment consists in merely sending dinner (*taulha*) and *rassi* to the house in which the guest is living. In the case of those invited to the host's house, the form of entertainment depends on

the caste of the person invited, which may or may not enable him to eat with his host.

The cultivators, who form the bulk of the population, rise at day-break and return home at sun-set. They rest for a couple of hours between noon and 2 o'clock. The mercantile and business classes work from about 9 A. M. until 6 P. M., with a similar rest. The well-to-do who have no special occupation usually rise soon after day-break, and busy themselves with sport or the management of their estates until the evening.

The huts of cultivators are made of mud and either thatched or tiled according as circumstances allow. The jungle tribes live in mere hovels made of the leaves of trees and thatched with grass and leaves.

The marriage customs are similar to those elsewhere in India and require no detailed treatment. The expenses lavished on this ceremony are often enormous. On an average, however, the richest spend about Rs. 10,000, the well-to-do Rs. 1,000, the middle classes Rs. 400 and the poor Rs. 60.

Hindus burn their dead except ascetics and infants, and Muhammadans bury them. The ashes in the former case are usually thrown into the Ganges or some local stream.

The most important local feasts are the *Dasahra*, *Khajulāya* or *Rākhi*, *Divālī* and *Holi*. The *Dasahra* falls on the 10th day of the light half of the month of *Kumār* (September-October). On this occasion arms and all the appurtenances of war are worshipped, as in former days this feast indicated the close of the rains when wars and forays recommenced. At this feast a big *darbār* is held by the chief who marches in procession attended by his *sardārs*. The *Divālī* is the great festival of the trading community and marks the opening of a new financial year. Account books, pens and inkstands are worshipped. On the great day which falls on the 15th *Kārtik* *Badī* all houses are illuminated and fireworks are let off. The *Holi* falls in the spring on the full moon of *Phālgun* (February-March). It is a season of licence. All partake in the festivities, in which the bandying of coarse pleasantries and the throwing about of red powder take a prominent place.

Among the higher classes shooting is a favourite outdoor pastime, dice, cards and chess being played indoors. The middle classes do not indulge in outdoor games, but play cards and chess at their houses. The common people have many outdoor amusements, which, as a rule, require feats of skill or strength for their performance, others are more or less children's games such as *ati-pāti* or hide and seek, *pītao*, a game of ball somewhat similar to rounders, *charra-patri*, a sort of prisoners' base, and *kabaddī*, a game like Jack-straws' castle. Dancing and singing and the recitation of *karīta*, portions of the *Mahābhārata* and *Rāmāyana*, and Bardic tales are also favourite recreations.

The names of classes are distinguished to a certain extent. Thus the *Kshatriyas* have *Singh* as a termination, *Brāhmins* often *Rām*, *Kūyasthas* the prefix *Lālā*, while the terms *Chaudri*, *Gauntia* and *Dahait* are affixed to those of *Chamārs*, *Mahatauns* to *Telīs* and *Kalārs* and *sāhu* to *Baniās*.

Daily life.

Houses.

Marriage.

Disposal of the dead.

Festivals.

Amusements.

Nomenclature.

PUBLIC
HEALTH.

Plague.

Family names are unknown. Children are commonly called after the day of the week. The use of Sanskrit names is a peculiarity of Rewah, thus Pradyumna Singh, Anirudh, Sampat, Vrishabhadhwajaprasād, Chandraśekhar, and the like are unusually common.

Public health has been generally good, but in 1887, 1891, 1894, 1896 and 1897 severe epidemics of cholera attacked the State, while in 1887 and 1896 a somewhat virulent form of small-pox appeared.

The whole State had been free from plague up to September 1905. Infection from some unknown source was then introduced into Rewah town at a time when the disease was at low ebb throughout India, and when the districts surrounding Rewah were clear. The type was bubonic in the great majority of cases throughout the epidemic and the mortality was high, Rewah never having been attacked before. In spite of this the disease did not spread through the State, but was confined to Rewah town and to villages within a radius of twenty miles from it, while its subsidence from the town was rapid. Its duration in the town was four months. The village epidemic continued till the beginning of May. Mortality amongst rats, squirrels and monkeys was very pronounced.

The total number of reported cases in the town was 408 and of deaths 371, and in the villages 272 and 162, respectively.

The figures below show the incidence *per cent.* of plague by castes in Rewah town.

Brāhmins	9.89
Carpenters...	2.75
Kahārs	8.21
Kāyasthas...	1.02
Baniās	17.31
Kshatriyas...	1.65
Baghels	1.21
Muhammadans	23.62
Other low castes	34.31

TOTAL 100.00

The measures adopted to stop the disease and check its spreading were, in the first instance, the segregation of cases and disinfection of infected houses. These measures were successful, and if preserved, would probably have checked the epidemic, but the people were averse to going to the camps and no compulsion was used. Later on, when the disease was generally epidemic, the people voluntarily evacuated their houses. Inoculation was not attempted. Only spasmodic attempts at rat-killing took place.

In Govindgarh and Mangawān complete evacuation of the houses took place, the people camping out under trees and in huts in the surrounding country and continuing their work. This proved very satisfactory.

The attitude of the people towards the disease was one of great fear as most of them had never experienced an epidemic before.

After the disease became virulent they left their houses freely of their own accord. They were, however, suspicious of European methods of relief and prevention. The popular belief appeared to be that the disease was caused by some action of the Government, and the Agency Surgeon and Hospital Assistants and others were accused of originating and spreading the disease by means of boxes of poison, contaminating wells, etc. Even the State authorities who co-operated with the medical staff in plague measures came under the same opprobrium.

CHAPTER II.

ECONOMIC.

Section I.—Agriculture.

(TABLES VII TO XV, XXIX AND XXX.)

General. The chief means of subsistence of the people is agriculture. It is
Early days. indeed regarded as the best of occupations and a proverb runs :—

उत्तम खेती जिन हर गहा । मध्यम खेती जो सँग रहा ॥

साँझ सबेरे पूँछे जोत्या कहाँ । बरदा बीज बुरगा तहाँ ॥

Uttam khetī jin har gaha,

Madhyam khetī jo sang raha ;

Sāñjh sabere punche jotya kahān,

Barda bīj burga tahān.

"He thrives best who drives his plough himself, but average success attends the man who only supervises ; while he who is content with mere reports soon loses both his cattle and his seed."

And again—

उत्तम खेती मध्यम बान । निकट चाकरी भीख निदान ॥

Uttam khetī madhyam bān,

Nīkriṣṭī chākari bhīkh nidān.

"Agriculture is the best (occupation), trade stands next, while (domestic) service is the lowest and alms begging the last resource."

The truth of the first couplet is amply borne out by the fact that the Kunbis are far and away the best cultivators, and at the same time carry on all operations themselves.

It is not now possible to say what part of the country was first cultivated, but the western section of the State, including the Huzūr and Teonthar *tahsils*, have been longest settled. The *dahiya* form of cultivation which consists in felling and burning trees and growing crops in their ashes was, no doubt, very common, as it is even now practised to a small extent in the hilly tract. The Lodhis and Kunbis are considered to be the earliest settlers of the cultivating class, who were later on joined in their peaceful pursuits by the Rājput settlers who had gradually taken to arts of peace. The descendants of these Rājputs are not now able to consort with the Rājputs proper, their change of occupation having caused them to lose caste.

The revenue was paid in kind and was graduated to the nature of the soil and the caste of the holder, those of higher caste paying a smaller share of the produce.

The greatest influx of cultivators is traditionally said to have come into Rewah after the fall of Kanauj in the 11th century. This is in part supported by the prevalence of members of the Kanaujiya sub-caste among the Kunbis, Kachhis, Kumbhars, etc.

In Mahārājā Bhao Singh's time also large numbers migrated from the disturbed northern districts to this tract, bringing with them Brahmans, Kāyasthas, Thakurs and others of the higher classes.

The pressure due to want of land never affected the Rewah cultivator, and when his fields had temporarily lost their productive power he could always find other land. One result of this is that the local agriculturist has never learned to use manure or how to give artificial strength to the soil. The want of this knowledge is now being felt in the more cultivated districts where fresh land is not to be had.

The soil of the State falls into two sections. The land north of the Kaimur range is covered by a fertile alluvial soil bearing excellent crops, but in the hilly tracts cultivation is productive only in the valleys where detritus has collected, and along the beds of streams.

The cultivator recognizes a large number of soils which he classes by composition and position. The most important classes are *mair* which is sub-divided into three varieties, *daiear*, *ruri* and *gubaria*. It is the "black cotton" soil of Europeans, which is remarkable for its power of retaining moisture; *sigon*, a lighter soil of a yellow colour, bearing rice when irrigable. It has two varieties *sigon* and *sigai*; *domat* is, as its name implies, a mixture of two soils. It has two varieties (1) a mixture of *sigon* and *mair*, and (2) of *mair* and *khāra*; *dandi* is a very light sandy soil found on the hills; *āsar* is a white soil of low fertility; and *lāla* a stony soil.

Where classed by position soils are styled *grahān* or lying near a village (*grāh*), *surār* land remote from the village, on the border (*sura*) *raur* is land lying in a position intermediate between the two last, and *lochār* fertile alluvial soil in river beds and on banks of streams.

Soils are also often named after the prevailing crops such as *karaiyāi* or land bearing *lodon*, *dhārhai* land bearing rice (*dhān*) and so on.

Mair is best suited to *rabi* crops but is of no use for rice which is only grown in *sigon* and some classes of *domat*. The other soils bear millets chiefly.

Two seasons are recognized the *harif* or *śārī* lasting from May to October, in which *junari* (*jourār*), *lodon*, cotton, etc., are cultivated, and the *rabi* or *unhārī* lasting from October to March, in which wheat, grain and barley are sown.

According to Hindu and local ideas the proper time for the setting in of the rains is under the *Ardra nakshatra* asterism, which generally falls on the 15th or 16th of June, and thus agrees with meteorological observation.

The peasant always calculates his operations by the *nakshatras* or asterisms, of which there are 27 in the year.

The last nine days of the preceding *Mrig nakshatra* should according to tradition, be very hot, if the rains are to be good.

मृगैः शुभमिह तर्जनी चार । दण, वायव्य, अरु अरु अरु ॥

Tapain Mrigashira talaphuṇ chār,
Ban tālal aru bhains ukhār.

"In the heat of *Mrigashira* four things should suffer, the forests, children, buffaloes and engareans." If this takes place, all will be well.

The rain in *Ardra* should be light and not severe, as in the latter case there is danger of its early cessation.

General
conditions.

Classes of
soil.

Seasons.

Prognosis
of seasons
according to
the cultivator.

गाघ गरगरी जेठ का जाइ । नदी नार बहि चले असाढ़ ॥

अस बोले भदुर के जोय । असौ वरसा भी कस होय ॥

*Māgh gargarī Jeth k̄ jā, nadī nār bahi chalai Asāḍh,
As bole bhaddar kai joya, asaun barea dhaun kas hoyā.*

"If the month of *Māgh* (January) is sultry, and *Jeth* (May) cold, and the rivers and brooks fill up rapidly in *Asāḍh*, the rains, says Bhaddari's wife, will be of doubtful character."

The most important *nakṣatras* are—

Ardra. *Ardra* marking the commencement of tilling and sowing.

आर्द्रा लाग बीज मुइ लेई । पिय दिन को मोहि आदर देई ॥

Ardra lāg bīj bhui lē, piya din ko mohin adar dē.

"Now as *Ardra* has come and the earth must receive the seed; who will welcome me without my husband," i.e., without the tiller.

Punarvasu.

Punarvasu marking the rice sowing season especially by the *leo* system (see supra). Rain should now fall copiously.

पूर्वा पुनर्वसु बोई धान । और न करी खेती आन ॥

Pūrva Punarvasu bōi dhān, aur na karī khetī an.

"Sow only rice in *Pūrva* and *Punarvasu*, and not other food crops."

Pushya.

Pushya, or *chirayia* (the bird) as it is called by the people, is eagerly watched as prognosticating the rest of the season through the evolutions of small birds, especially sparrows, while it is raining. If they continually allow themselves to get wet, flying away and returning repeatedly, it is the sign of good rains. This *nakṣatra* falls in the latter part of the month of *Śrāvan* (July). The rains during this *nakṣatra* should come in heavy, intermittent showers.

Aslesha.

In this *nakṣatra* there should be few showers. This is the time to plough fields for the *rabi*.

Magha.

In the *Magha nakṣatra* light rain is very beneficial to standing *kharif* crops and useful for moistening fields prepared for the *rabi*, but continuous heavy showers hamper the preparations for the *rabi*.

Pūrva.

In *Pūrva* rain is very injurious, at most only one or two showers should fall.

Uttara.

The *Uttara* showers ought to be very light and at long intervals, *sarson* and *rai* are sown at this time.

Hasta.

In *Hasta* rain should be scanty and light. Heavy rains in this *nakṣatra* are injurious to the standing crops of cotton, *jowār*, *tili*, etc.

Chitra.

Little rain should fall at this time, as heavy rain is injurious.

Śwātī.

Only one or two showers should fall. Heavy showers destroy the *rabi* seedlings.

The proverbs on this subject are endless, a few are noted below which refer to the nature of crops and operations,

स्वाती गोहूँ आर्द्रा धान । ना वहि कुकुंदी ना वहि घास ॥

Śwātī gohū, Ardra dhān,

Na ohī kukundī, na ohī ghāṣ.

"If wheat is sown during *Sicāti* and paddy during *Ardra*, the first will not suffer from the rust nor the latter from sunburn."

आर्द्रां वरुणे पुनर्वसु जाये । दिन अन्न कोऊ ना पाये ॥

*Ardra kṛantai Punarvasu jāye,
Din anna kṛu na pāye.*

"If there is heavy rain in *Ardra*, and fair weather in *Punarvasu*, the result will be a bumper crop." (*lit.*—none will eat poor grain.)

मग्न अश्लेषा क्षाणी जौरि । उरद तिली घर परा बहोरि ॥

*Magna, Aśleṣha kṣāṇi jāyī,
Urad, tilī, ghar dhara bahorī.*

"If *Magna* and *Aśleṣha* have heavy rains, the grain and tili should be brought back to house and not sown."

वरुणे क्षाणी उत्तरा । कोदो न राय कुकुरा ॥

*Varuṇe kṣāṇi Uttara,
Kodan na khāya kukura.*

"If there is good rain in *Uttara*, (so much so that) even dogs will refrain from eating cotton."

वरुणे क्षाणी सान्ति विप्रायि । गन्धे न कोदु बन्धे न सांति ॥

*Varuṇe kṣāṇi Sānti viprāyī,
Gandhe na kodha bhaṇi na sānti.*

"If it rains in *Sicāti* the *lotus* (or oil-press) and the *how* (of the Dānni, who card cotton) will not find work." (The *Sicāti* rains are injurious to *tili* and cotton.)

हविषा वरुणे क्षाणी मरुत मान । हविषा वरुणे क्षाणी पुनर्वसु निमीक्षणात् ॥

*Haviṣa varuṇe kṣāṇi māruta māna,
Haviṣa varuṇe kṣāṇi punarvasu nimīkṣaṇāt.*

"The *Haviṣa* rains are useful for three crops, paddy, sugarcane and pulses. But *Haviṣa* rains are injurious to the three crops, *punarvasu*, *tili* and cotton."

हविषा पूंछ दोषाद । पर वरुणे पुनर्वसु आद ॥

Haviṣa pūñcha doṣād, ghar Varuṇe punarvasu ād.

"The absence of rain in *Haviṣa* is useful for *pearl*."

Even slight showers of *Haviṣa nūlshetra* is sure to bring abundant crop of *jenari* (*gorā*).

The common saying determining the results of rain are :—

सायन शुद्ध मत्स्यो जा गरुडो नराय । शुभ भद्रो विष माज्यो दम आद शुभराग ॥

सायन शुद्ध मत्स्यो उक्त शो दन्ती मान । निमज्जिमे समुद्रमे किनागिने कुआनदान ॥

*Sāyana śuddha mātṣya jā garuḍo naraṇī,
Tām jāi ho piya Mātṣya, Nam jābui Gajānī.
Sāyana śuddha mātṣya, Urat jo dekhāi bhān.
Kī jāi milai samudra men, Kī kāmīni kuān nahān.*

"If it thunders on the 7th of the light half of *Sāwan* you must go to Malwa, love, and I to Gujarāt. (As famines are unknown in these districts.) The implication is that there will be famine.

"If on the 7th of the light half of *Sāwan* the sun is visible when rising, water will be found in the sea only, or in the wells to which women will go to bathe."

Area cultivated and variations.

It is impossible to enter into this question, as no figures are forthcoming, except for the year 1902-03. The average area under cultivation may be put, therefore, at 1,800,000 acres, of which 60,000 acres are double cropped and 182,000 are sown with mixed crops.

Agricultural practice.

A field is cleared just before the rains by ploughing. In the case of *mair* and *sigon* soil it is then again ploughed three or four times and sown. When it is reserved for *rabi* crops, such as barley, wheat, sugarcane or poppy, it is ploughed fourteen or fifteen times.

Rice is extensively sown in parts of the State. The field in this case is prepared in one of the three ways. The *jhuria* process is used in fields which retain a large amount of water. They are ploughed once or twice in *Māgh* (January) and *Jeth* (May), and the seed is sown just before the rains commence, the plants thus reach some size before much water collects. In the *dabhka* process the field is ploughed after it has been moistened by a little rain, and sown. In the *leo* or *laran* process seedlings previously grown elsewhere are planted out after they have reached some size.

Double cropping.

Double cropping or *dusali* is practised wherever the water supply is sufficient and the soil is retentive of moisture. The crops ordinarily sown are maize or *sāmān* at the *kharif* followed by *matra*, gram, barley or *masūr* as a *rabi* crop.

Rotation.

The exhausting nature of some crops and the recuperative power of others is well known to cultivators. The ordinary series of rotation is *kodon* or *junārī* alternating with wheat, gram or linseed.

Mixed sowings.

It is a practice to sow two crops in one field at the same time, thus guarding against a total failure and also minimising the amount of labour in preparing the land. The commonest mixtures are *kodon* with *junārī* and *arhar*, wheat with gram and with *matra*, and barley with gram and *matra*.

Manures.

As has been already noted, manuring is but little practised. Cow dung and village sweepings are used, but only special crops are treated with them.

Irrigated crops.
Pests.

Sugarcane, poppy, barley, wheat and garden produce are irrigated. In the case of all but the last *bāndhs* are generally used.

The chief animal pests are rats, who swarm after a year of deficient rainfall, white ants, locusts and in some localities deer. Rust (*gerua*) *kāns* grass (*Imperata spontanea*) and blight also cause damage. Frost rarely injures the crops, but in the year 1905 all hopes of a bumper *rabi* crop were blasted by frost.

Implements.

The chief implements are the *hal*, or plough, *bakkhar*, or weeding plough, *kurri* or harrow; *kopar* or *pahta*, a log dragged over a field to smoothen it out; *waira*, the tube used in sowing *rabi* seed which is attached to the plough; *hansia*, a sickle, *khurpa*, a hoe and *phāora*, *kudārī*, *kudar*, and *sāwar* different kinds of spade. The axe called

kulhārī or *tānga* and the knife used for cutting *karbī* or stalks of *jowār* called *garāsa* may be added.

The total normal area cultivated is about 1,854,000 acres, the *kharīf* crops occupying 1,175,000 acres and the *rabi* 679,000 acres.

Area under crops
(Table X).

The chief crops in the former case are *kodon*, *junarī* (*jowār*), *arhar*, etc., 421,100 acres; *dhān* or rice 390,300 acres; *tītī* 72,500 acres; *urad* 53,900 acres; *makka* or maize 45,300 acres and cotton 44,300 acres, and at the *rabi*, *gehūn* or wheat 186,800 acres, *chana* or gram 157,800, *jau* or barley 121,800, *arsi* (*alsī*) or linseed 92,300 and *masūr* 60,500; some poppy about 150 acres is sown mainly in Teonthar *tahsīl*.

The crops sown at the *kharīf* or autumn season are *dhān* or rice (*Oryza sativa*), *sāmān* (*Panicum frumentaceum*), *makai* or maize (*Zea mays*), *kākun* (*Setaria italica*), *bājra* (*Pennisetia spicata*), *urad* (*Phaseolus radiatus*), *kodon* (*Paspalum stoloniferum*), *māng* (*Phaseolus mungo*), *moth* (*Phaseolus aconitifolius*), *kapās* or cotton (*Gossypium indicum*), *til* (*Sesamum indicum*), *mejhrī* much the same as *kutkī* (*Psilopodium scrobiculatum*), *junarī* (*jowār*) (*Sorghum vulgare*), and *arhar* (*Cajanus indicus*).

Crops.

At the *rabi* they are *gehūn* or wheat (*Triticum aestivum*), *chana* or gram (*Cicer arietinum*), *matra* (*Lathyrus sativus*), *masūrī* (*Ervum lens*), *jau* or barley of two kinds known as *jau* and *jau-berī* (*Hordeum vulgare*), *arsi* or linseed (*Linum usitatissimum*), and poppy (*Papaver somniferum*).

The vegetables and fruits ordinarily sown are cabbages, carrots, garlic, egg-plant (*Solanum melongena*), onions, *mūri* (*Feniculum pan-mūri*), *methī* (*Trigonella fœnum græcum*), and many kinds of yam and gourd. Among fruit trees the commonest are the mango (*Mangifera indica*), loquat (*Eriobotrya japonica*), custard apple (*Anona squamosa*) plantain (*Musa sapientum*), shaddock (*Citrus decumana*), and many limes, citrons, figs and melons.

Garden produce.

No new implements have been introduced as yet. The only foreign seed which has been tried is *mundia* wheat which is not, however, considered as good as the ordinary local *kathia* variety.

Progress.

Irrigation is very little practised in Rewah. The only crops watered artificially from wells are *pān* (*Piper betel*) garden produce, sugarcane, tobacco and poppy.

Irrigation.

The *mair* soil, on which most of the cultivation is carried on, does not require irrigation for ordinary crops, and the cultivator has apparently little desire to increase his out-put.

The only form of irrigation ordinarily carried on is that effected by *bāndhs*. *Bāndhs* are temporary earthen dams raised at the lower end of sloping fields which serve to retain the rain water for some time after the monsoon is finished. In land so moistened the seed is sown and yields twice the crop which can be obtained from seed sown in dry land.

This method is simple, inexpensive and most effective and is admirably suited to the Rewah country.

Where wells are used the water is generally raised by means of the *dhenkurī*, which consists of a long pole working on a frame like the horizontal bar of Gymnastic at one end of the pole a counter-poise is fixed and at the other a vessel for raising the water. It is worked by

Wells.

	one man. A well costs from 20 to 60 rupees to dig, and if it is lined with stone Rs. 150 to Rs. 180.
Cattle.	No special breed of cattle exists in the State but all cultivators raise cows, buffaloes, sheep and goats. No census of live stock has been taken.
Pasture.	Pasture land is ample and far in excess of local needs.
Cattle diseases.	Numerous diseases are named by herdsmen. The commonest are <i>bilāri</i> in which the throat and mouth become inflamed and the animal is unable either to eat or drink, <i>Asafoetida</i> (<i>hīng</i>) and strychnia (<i>kochila</i>) with <i>kālu āra</i> (rar: <i>of cummin</i>) are administered mixed with ground <i>dhatūra</i> leaves, while a poultice of <i>madār</i> (<i>Calotropis procera</i>) and <i>sehunda</i> , a common jungle plant, is applied to the sores. <i>Pankhar</i> is an affection of the intestines similar to colic. It causes a swelling of the abdomen. No medicine is used, but charms and incantations are recited. It is popularly supposed to be due to a grub found in certain kinds of grass. <i>Dad</i> also called <i>thurpaka</i> and <i>munhpaka</i> (foot and mouth disease) is treated by administering bread made of <i>urad</i> flour mixed with linseed-oil, the beast being made to stand in mud up to its knees. <i>Derī</i> or cow-pox is cured by giving the animal a mixture of gram flour, butter-milk, <i>nīm</i> leaves and coarse sugar.
Cattle fairs (Table XXVIII).	No regular cattle markets are held, but cattle are sold at most big fairs and markets.
Agricultural population.	About 68 per cent. of the population is engaged in agricultural pursuits. The classes most occupied in this are Kunbis, Rājputs and Brāhmins.
Holdings.	The average holding is about 12 acres (23 <i>bighas</i>) and generally includes about 6 acres of <i>bāndh</i> land.
Indebtedness.	The cultivators are on the whole well-to-do, and though most are in debt to the local Baniā they are not so heavily involved as in many parts of India. They have now recovered from the dire effects of the famine of 1897.
Takkāvi.	As a rule the Darbār does not grant <i>takkāri</i> loans. But in times of scarcity advances are given freely, for the purchase of seed and bullocks, and the construction of <i>bāndhs</i> . Interest on these loans is charged at the rate of 12 per cent. a year.

Section II.—Wages and Prices.

(TABLES XIII, XIV.)

Wages and prices.	Though figures for prices from early years are not available, those since 1880 are given in most cases. The rise in price is marked; <i>kodon</i> the staple food of the poorer classes, has risen from 20 seers to the rupee to 16 seers, <i>jowār</i> from 25 to only 18 or 20, rice from 16 to 10 and wheat from 20 to 12. The figures for 1905 are abnormal. Wages are about double what they used to be in the case of skilled workmen, otherwise little change is noticeable.
Material condition.	The condition of all classes is on the whole good. A temporary depression caused by the famine of 1897 had an injurious effect on the cultivating castes, but from this they have now recovered. The traders are better off than any other class, their prosperity having increased by

leaps and bounds since the opening of the East Indian and Bengal-Nagpur Railways, the extension of metalled roads, and improvement in the administration.

As regards the wild hilly tract there is little to be said. The jungle tribes live mainly on jungle produce, and eke out a scanty livelihood by the sale of forest produce. They have made no advance in prosperity.

Section III.—Forests.

(TABLE IX.)

The total area occupied by forest in the State is about 1,600 square miles exclusive of scrub jungle on waste land of which 600 square miles are reserved.

The forest falls into two main classes which are separated by the Kaimur range. On the north there is little or no real forest except the Mahoudpur tak reserve, but to the south a large area is covered with valuable trees, the timber and other products bring in a large income to the Barhar.

The predominant tree in the southern forests is *sal*, the *Shorea robusta*, intermixed in places with a large amount of *Pterocarpus strictus* of first rate quality. On the higher slopes of the hills the *sal* is replaced by other species.

These belts may be distinguished, one of deciduous, a second of mixed and the third of riparian forest.

This class of forest is confined to the southern portion of the country. It extends in a great belt commencing from the village of Karkati ($23^{\circ} 11' N., 81^{\circ} 33' E.$) nearly 5 miles south of Barhar station (B.-N.R.), and stretches westwards through Sinchpur, Shahpur, Auraher, and Ghanguati up to Madaria ($22^{\circ} 21' N., 81^{\circ} 27' E.$) where it bends northwards and stretches through Boli, Mirli, Bandhogarh and Sayrahi up to Harhi on the bank of the Son river. From Harhi it again bends eastwards and stretches, but very irregularly in scattered patches of limited area, all along the bank of the Son river and its tributaries to the eastern border of the State. Its total length is about 260 miles. It is very unequal in width varying from 2 to 20 miles. Throughout this tract the forest fills nearly all the small valleys and low lands, and follows the windings of all small streams, dipping eastwards and northwards toward the Son river. It is estimated to cover an area of nearly 1,000 square miles.

The most important trees in this belt are *Shorea robusta*, *Diospyros*, *Dalbergia* and *baobabs*.

The mixed forests, which combine some of the features of both the deciduous and dry forests, are situated on the northern slopes of the Kaimur range on the Rewah plateau on a few hills on the north-west border adjoining Panna State, and on the south-east of the deciduous belt. They include the greater portion of the State.

The forests of the riparian class owe their special character to the periodical overflow of rivers and *nālas*. They are entirely different in character from the forest vegetation of the surrounding zones, and they deserve to be treated as a separate class. They are situated in the

Forest area.

Classes of forest.

Deciduous forest belts.

Mixed forests.

Riparian forests.

south-west corner of the State, south of Chandia and Singhwāra, along the banks of the Sindhuli and Ghorehatar rivers. In this area the inundated lands produce quick-growing forests of *sāguān* or teak, *Acacia arabica*, and *A. catechu*, *Buchanania latifolia*, etc. Reproduction is very rapid in this area.

Classifica-
tion,

The forests are, for administrative purposes, divided into two classes, reserved and ordinary. There are 14 reserves in the State with an area of 642 square miles situated at Bāndhogarh, Majholi, Bardī, and Sohāgpur south of the Kaimur range which are reserved specially for the *sarai* (*Shorea robusta*) and bamboos (*Dendrocalamus strictus*) which cannot be cut without the permission of the Darbār. The forests of Govindgarh are reserved for sporting purposes only. In addition to these there are four unirrigated natural grass preserves at Makundpur, Bara-pahār, Baheliabhat, and Bir Rampur in the neighbourhood of Rewari and Satna town, which are used to supply fodder for the State cavalry. All other forests belong to the ordinary class.

Control.

Until 1875 no restrictions were imposed on the people in regard to the cutting of wood of any kind, provided that it was required for household, agricultural or other local purposes and not for export. Later on, however, a rule was made reserving 15 kinds of tree, which the people were prohibited from felling, except on payment of a duty or on obtaining a free pass from the Forest Superintendent. The trees thus reserved were teak, *sarai*, *parsid*, *bijahara*, *sāja*, *sanān*, *mahuā*, *chār*, *chiula*, *tān*, *shisham*, *harra*, *kosam*, *hardā* and *tendu*. These represent the most valuable timber trees in the State, and their reservation was considered desirable as a source of revenue, and as a means of extending protection to the forest. This rule and some others issued at the same time caused a great deal of discontent, and were, therefore, modified in 1885-86 and again in 1902. All cause of complaint has now been removed, the people being permitted to cut bamboos, *sarai*, and other timber trees, which are under 5 ft. span in girth, for household and agricultural purposes and also for *dahia* cultivation. Exceptions are made in the case of *mahuā*, *chār*, *kosam*, *harra*, *khair*, *chiula*, *sāguān* (teak), *tendu*, *tān* and *shisham*, which are allowed to be cut only on a permit granted by the Darbār. Cattle are allowed to graze in forests within the boundaries of a village; for forests outside this limit a permit is required. The collection of *mahuā* flowers and other minor products such as the fruits of *harra*, *chironji*, *anla*, *tendu*, *baichāndī*, and *bahera*, gums, resins, bark, etc., is allowed free, excepting lac, catechu, and *rāl* (*dihāp*) the resin of the *Shorea robusta*.

A Superintendent of Forests is in charge of all arrangements, being assisted by two Rangers for the Sohāgpur and Bardī circles. For administrative purposes circles under Inspectors who are assisted by *jamādārs* and *dafādārs*, have been formed.

The privilege of collecting the minor forest products of each *tahsil* is auctioned to a contractor who can remove all such produce free of forest duty, but not free of customs duty. The revenue from minor products is never very large. The same conditions obtain regarding the revenues from timber, bamboos, etc. Lac is much the most important source of forest revenue.

The important trees and shrubs are given in the list at the end of this article.

Many useful grasses also are met with, the more important being *rusa* (*Andropogon muricatum* and other varieties), *bagai* (*Ischamum angustifolium*), *mūnj* (*Saccharum arundinaceum*), *khaskhas* (*Andropogon squarrosus*), spear-grass (*A. contortus*), *darbh* (*Eragrostis cynosuroides*), *dūb* (*Cynodon dactylon*) and others.

The tribes that reside in the forest area are Kols, Gonds, Baigas, Dharis, Mājhi, Panika, Baiswar, Bhurtia, Biar, Agaria, Kotnār, Basor, Basubar, Bemariha, Khairwār, and Pathāri. Of these the Kols, Baigas, Gonds, Dharis, Mājhi, Panika, Agaria, Basor, Bemariha, and Khairwār are generally employed as labourers.

The rate of wages for males is 2 annas per day, and that for females 1 anna 6 pies per day.

The revenue derived from the sale of forest produce is considerable. From 1840 to 1845 the receipts averaged 1·7 lakhs, the expenses being about Rs. 50,000; for 1895 to 1900 the receipts amounted to about 2 lakhs yearly, expenditure being about Rs. 80,000. In 1908-04 the receipts were 7·7 lakhs, and expenses 1 lakh, and in 1904-05, 3·6 lakhs, and expenses Rs. 75,000.

The receipts included 2·3 lakhs from *lac*, Rs. 91,000 from royalties on timber, Rs. 20,000 from those on minor products, and Rs. 9,000 from other sources.

List of common trees and shrubs, etc.

Vernacular name.	Botanical name.	Remarks.	
Akol, Kolha ...	<i>Alangium lamarkii</i> ...	Wood for fuel. Fruit medicinally used. Young shoots for tooth brushes also.	Trees and shrubs.
Amaltās, Jhag-ruwa, Kirwār.	<i>Cassia fistula</i> ...	Fruit used medicinally, wood to some extent for implements.	
Amarbel, Akās-bel.	<i>Cuscuta reflexa</i> ...	Used in medicine in poultices, etc.	
Amarka, Am ...	<i>Mangifera indica</i> ...	Wood yellowish, light, seasons well; used for beams, rafters, door-frames, boxes, drums, doors. Fruit eaten; leaves used in Hindu ceremonies and festivals being placed on the <i>toran</i> or marriage arch and as plates.	
Amṭa	<i>Bauhinia malabarica</i> ...	Wood for fuel.	
Anjir	<i>Ficus carica</i> ...	Cultivated.	
Aonla, Lalli	<i>Phyllanthus emblica</i> ...	Fruit eaten, used in medicine; leaves to tan leather; wood for fuel.	
Asok	<i>Polyalthia longifolia</i> ...	Commonly planted in gardens.	
Baliera	<i>Terminalia bellerica</i> ...	Grows in dry rocky situations. Wood used for posts. Fruit used medicinally. Bark of the tree called <i>Alajith</i> is used for dying.	

Trees.

Grasses.

Junglo tribes.

Revenue.

List of common trees and shrubs, etc., (continued).

Vernacular name.	Botanical name.	Remarks.
Bāibirang ...	<i>Embelia robusta</i> ...	Fruit used in medicines.
Bakāia ...	<i>Alelia azedarach</i> ...	Leaves and fruit used medicinally.
Bamār or Babāl, <i>Acacia arabica</i> ...		Good timber tree used in rafters, beams, body of carts, cart-wheels, etc. Leaves and inner bark used for medicine; pods and leaves given to goat as fodder; the gum is collected and used medicinally and for many purposes.
Bānda ...	<i>Loranthus longiflorus</i> , A parasite, very destructive to <i>mahua</i> .	
Bankapās ...	<i>Thespesia lampas</i> ...	Grows as under-shrub with <i>sāl</i> . Wood useful and bark gives fibre and a yellow dye.
Bāns, Uhaduo ...	<i>Dendrocalmus strictus</i> , The male bamboo used for many purposes.	
Bānsa ...	<i>Albizia odoratissima</i> , Wood for rafters, bedsteads, etc., and as fuel; bark to tan leather.	
Bar ...	<i>Ficus bengalensis</i> ...	Fruit eaten; milk used in medicine; tree is worshipped by Hindus.
Barga, Baranga...	<i>Kydia calycina</i> ...	Wood used for bedsteads; bark and fibre used to bind bundles of wood, etc.
Barhar ...	<i>Atrocarpus lakoocha</i> , Cultivated.	
Bol, Mahaka ...	<i>Aegle marmelos</i> ...	Wood for fuel; sometimes used for sacrificial fires by Hindus and its leaves in the worship of Shiva. Fruit eaten; its fleshy portion is mixed with lime for mortar and used medicinally to stop diarrhoea.
Ber ...	<i>Zizyphus jujuba</i> ...	Fruit eaten. Wood used in bedsteads, pegs, yokes, Indian clubs, etc. Ripe fruits are dried and the fleshy kernel called <i>berchur</i> is mixed with a little salt and kept as a preserve.
Bhendī ...	<i>Hibiscus esculentus</i> ...	Commonly cultivated.
Bherī, Turnī ...	<i>Casearia tomentosa</i> ...	Wood for fuel.
Bhilāwān, Kohaka, ...	<i>Semicarpus anacardium</i> , Epicarp eaten; nut used medicinally; seeds give a marking ink.	
Bhiriha ...	<i>Chloroxylon aurelanta</i> , Found on sand-stone soil. Wood hard, used for axe handles, etc. This wood gives good charcoal.	
Bhūār, Katul ...	<i>Randia uliginosa</i> ...	Fruit for vegetable.
Bija, Bijahara ...	<i>Pterocarpus marsupium</i> , Good as timber for furniture and in beams, rafters, bedsteads, musical instruments.	
Bilāikund ...	<i>Pueraria tuberosa</i> ...	Tubers used medicinally and eaten.
Bilsena ...	<i>Limonia acidissima</i> ...	Wood used for axles and in agricultural implements.
Birbul, Jirila ...	<i>Indigofera pulchella</i> , Flowers used as vegetables,	

List of common trees and shrubs, etc., (continued).

Vernacular name.	Botanical name.	Remarks.
Bounria-chiola ...	<i>Butea superba</i> ...	A climber. The tuber is called <i>kohanri</i> and this used medicinally. Leaflets for <i>pattalas</i> (plates) and <i>donas</i> .
Chūr, Sareka ...	<i>Buchanania latifolia</i> ,	The fruit has a delicious flavour and is most refreshing in the hot season; kernel called <i>chironji</i> is being very largely eaten. Leaves used for plates.
Chhind ...	<i>Phoenix-acaulis</i> ...	Leaf-stems for tooth-brushes, root-brushes to clean ornaments, leaves to thatch roofs.
Chiola, Mur ...	<i>Butea frondosa</i> ...	Wood used in wells and under water generally. In marriage ceremonies <i>magrohan</i> and <i>pata</i> are made of its wood. New shoots are used as <i>Brahma-danda</i> by Brahmins and dried ones, one foot in length, called <i>samidha</i> , are used for sacrificial purposes. A yellow colour (<i>tesu</i>) is prepared from its flowers and used in holy religious festivals; fruit used medicinally; root fibres (<i>bakoura</i>) are used to tie bamboo roofs. Lac insects are propagated on its young shoots. It is one of the principal lac producing trees. Plates, <i>pattalas</i> and <i>donas</i> are made of it.
Chirul ...	<i>Holoptelea integrifolia</i> ,	Bud has offensive smell; leaves used medicinally.
Dahiman ...	<i>Cordia macleodii</i> ...	Wood esteemed for building and in frames.
Dhamin, Dhan-kuth, (Ashwood.)	<i>Grewia tiliaefolia</i> ...	Wood hard and tough; used in implements of agriculture, etc.
Dhawa, Arma ...	<i>Anogeissus latifolia</i> ,	Wood used in building; leaves to tan leather.
Dhawai, Surteli,	<i>Woodfordia floribunda</i> ,	Flowers used for dyeing.
Dhobain, Pānsi...	<i>Dalbergia paniculata</i> ,	Wood for fuel; inner bark and flowers used to tan leather.
Dādhi, Mitha, Indrajau.	<i>Wrightia tinctoria</i> and <i>Wrightia tomentosa</i> .	Wood used by turners. Fruit taken medicinally. (The follicles are joined at the tip, in <i>tinctoria</i> while in the variety <i>W. tomentosa</i> they are not joined).
Dādhi, Karu Indrajau,	<i>Holarrhena antidysenterica</i> ,	Wood used by turners, fruit medicinally.
Enthi ...	<i>Eleicteresisora</i> ...	A common under-shrub; fruit used for medicines.
Gabdi, Ganjar ...	<i>Cochlospermum gossypium</i> ,	In dry stony places. Young roots used medicinally. Fibre used to stuff pillows, and its gum called <i>latira</i> .

List of common trees and shrubs, etc., (continued).

Vernacular name.	Botanical name.	Remarks.
Ghānto, Ghāti-yātī,	<i>Schrebera swietenioides</i> ,	Fruit is worn by children round their necks. Wood generally useful.
Ghont, Ghuter, Ghotahar.	<i>Zcyphus xylopyra</i> ...	Often gregarious in dry stony country. One of the principal trees used in the production of lac.
Ghunchi	... <i>Abrus precatorius</i> ...	Fruits of the white species and roots of both red and white are used medicinally. Fruits used ornamentally by Gonds and Bhuils and as weights (=1 rattī). In marriage ceremonies of Gonds and Bhuils a bracelet of the berries is tied to the wrists of bridegroom and bride.
Girchi	... <i>Cuscuta graveolens</i> ...	Small tree, wood for fuel.
Gubālāre	... <i>Mallotta auriculata</i> ...	Bark used for poisoning fish and killing insects, also cures itch (<i>khoura</i>) on animals.
Gursakri	... <i>Grewia pilosa</i> ...	The fruit has a very pleasant flavour, roots used as a tonic.
Gurar, Safed Gurja	∴ <i>Albizia procera</i> ...	Wood for fuel. Wood useful.
	... <i>Odina rooder</i> ...	Gum collected. Wood used for yoke branches for fences of fields to keep out cattle; leaves for fodder.
Haldū	... <i>Adina cordifolia</i> ...	Wood used by turners and for buildings.
Harra	... <i>Terminalia chebula</i> ...	This tree is found on sandy soil. The young immature fruit is used in medicine and is, when ripe, a valuable commercial asset.
Haruwa	... <i>Erythrina suberosa</i> ...	Bark used medicinally and wood in swords, scabbards, etc.
Imli, Chitta,	... <i>Tamarindus indica</i> ...	Wood to burn lime; flower and fruit used in curries and <i>chutni</i> ; cultivated in gardens and avenues.
Jamūsi	... <i>Elrodendron burghii</i> ,	102- Wood pretty and used in cabinet work. Bark and leaves poisonous and is burnt by Pāsis below swarms of bees to kill them when honey is being taken. The leaves are used medicinally as a specific against rabies and snakebites.
Jāmunā	... <i>Eugenia jambolana</i> ...	Cultivated in gardens and avenues; wood used for buildings, and door-frames, leaves to thatch roofs; and fruit eaten and used medicinally. Heart-wood very durable in water.

List of common trees and shrubs, etc., (continued).

Vernacular name.	Botanical name.	Remarks.
Jarphali	... <i>Ficus scandens</i>	... Fruit eaten.
Jharbor	... <i>Zizyphus nummularia</i>	Fruit eaten, twigs used for hedges, leaves given to she-buffaloes to eat to increase their milk.
Jhāū	... <i>Tamarix dioica</i>	... Found on the banks of rivers. Baskets and brooms are prepared from it. Leaves used in medicine.
Kaohnār	... <i>Bauhinia variegata</i>	... Flower buds eaten as a vegetable and pickled; wood as fuel.
Kadam	... <i>Anthocephalus cadamba</i>	Planted in gardens and avenues, flowers offered at shrines.
Kalma Mundi, (Gondi.)	<i>Stephogyne parvifolia</i>	Wood used by turners and in buildings.
Kaitha	... <i>Feronia elephantum</i>	... Fruit eaten Wood used as fuel. Wild in the Mand (Makundpur) forest.
Kāli Makoya	... <i>Zizyphus aenopia</i>	... Fruit eaten; twigs used for fences or to cover tiled roofs to protect them from monkeys.
Kauji	... <i>Pongamia glabra</i>	... Oil of the seed used medicinally. Young shoots for tooth-brush.
Karaunda	... <i>Carissa spinarum</i>	... Exceedingly common. Fruit eaten, has a delicious flavour.
Kāri	... <i>Sacopetalum tomentosum</i>	Wood yellowish, hard and tough, used for bed-tends.
Kasahi, Ek-dania,	<i>Uredelia retusa</i>	... Fruit eaten. Wood for fuel.
Katahar	... <i>Artocarpus integrifolia</i>	Jack fruit cultivated.
Kath-jāmun	... <i>Eugenia horycana</i>	... Common along water course, river banks, etc. Wood, etc., similar to <i>jambulana</i> .
Kattang, Bāns...	<i>Bambusa arundinaceae</i>	Cultivated.
Kenkar	... <i>Garuga pinnata</i>	... Wood used to make yokes, leaves for fodder.
Keolār	... <i>Bauhinia purpurea</i>	... Wood used as fuel.
Keora	... <i>Pandanus oboratrismus</i>	The fruit is eaten and a scent made of its exudation.
Khair	... <i>Acacia catechu</i>	... Wood used for posts, beams, etc. <i>Katha</i> or catechu is prepared from chips of its heart-wood, its tanning being used to season leather.
Khajūr	... <i>Phoenix sylvestris</i>	... Fruit eaten; wood used as beams; leaves for brooms.
Khamer	... <i>Gmelina arborea</i>	... Wood used to make musical instruments.
Kharhār	... <i>Gardenia turgida</i>	... Wood for fuel.
Khatua, (Gondi) Anta.	<i>Antidesma diandrum</i>	Leaves and fruits eaten.
Kiwanch'	... <i>Mucuna pruriens</i>	... Fruit used medicinally.

List of common trees and shrubs, etc., (continued).

Vernacular name.	Botanical name.	Remarks.
Kohria, Kahua...	<i>Terminalia arjuna</i> ...	Common by streams. Wood used in carts and implements, doors, frames, beams, posts, etc.
Kosam	... <i>Schleichera trijuga</i> ...	Wood light red, hard, tough; a good timber tree, but being one of the principal lac-producing trees is protected.
Kulu	... <i>Sterculia urens</i> ...	Found on dry rocky hill sides of which it is the characteristic tree. Wood used for doors; gum (<i>katira</i>) used medicinally as a tonic for women.
Kumhi	... <i>Careya arborea</i> ...	Fruit edible, used for pickles; bark fibre used to prepare fuses as it smoulders when ignited.
Kursi	... <i>Cardenia salicifolia</i> ...	Fruit eaten and used as tonic.
Lal-madar, Akua,	<i>Calotropis procera</i> ...	Root, leaves and milk used medicinally.
Leoria, Seji, Sed-	<i>Lagerstramia parviflora</i> ,	Wood used in straight poles, for buildings and for fuel; bark in tanning.
Mahanim	... <i>Ailanthus excelsa</i> ...	Planted in gardens and near villages; bark used medicinally as febrifuge.
Mahuā, Ira	... <i>Bassia latifolia</i> ...	Wood esteemed for buildings; fruit oil is used by low caste people. Flower is a valuable commercial asset, being used in distilling country liquor and is also eaten.
Mahula	... <i>Bauhinia racemosa</i> ...	Used in bedsteads and for fuel.
Mahulain, (Gondi) Paur.	<i>Bauhinia vahlii</i> ...	The pods are roasted and the seeds then eaten. Leaves used for plates, bark fibre for ropes.
Mainhar	... <i>Randia dumitorum</i> ...	Wood for fuel, fruit and bark in medicine.
Majni	... <i>Ficus gibbosa</i> ...	In medicine, leaves sometimes as sand-paper.
Menhdi	... <i>Lawsonia alba</i> ...	Commonly planted in hedges. Leaves used by females to color their hands and feet, and also in medicine.
Muchkund	... <i>Pterospermum acerifolium</i> ,	Planted in gardens. Flower used medicinally.
Munga	... <i>Moringa pterygosperma</i> ,	The horse-radish tree cultivated largely near villages and in garden root is like horse radish in flavour.
Niguri	... <i>Vitex negundo</i> ...	Leaves in medicine, febrifuge.
Nim	... <i>Melia indica</i> ...	Grown artificially everywhere. All parts are used—wood, fruit, bark, leaves and flowers used medicinally. An oil is extracted from its seed to kill insects.

List of common trees and shrubs, etc., (continued).

Vernacular name.	Botanical name.	Remarks.
Pākar	... <i>Ficus infectaria</i>	... Young shoots eaten.
Pāpra, (Gondi) Panibāil	<i>Gardenia latifolia</i>	... Wood for doors, and combs.
Paral, Jaimangal,	<i>Stereospermum sua-</i> <i>veolens.</i>	Wood for building and as charcoal fruit in medicine.
Pipal, Ali	... <i>Ficus religiosa</i>	... Fruit edible. Worshipped by Hindus. One of the principal lac- producing trees. Dry twigs for sacrificial purposes.
Rai, Karaunda	... <i>Carisa karaundas</i>	... Fruit eaten and wood burnt as fuel.
Rasalla, Lasora, Labhera.	<i>Cordia myxa</i>	... Flower buds and immature fruit used as vegetable. Cultivated, not wild.
Reonja	... <i>Acacia leucophloea</i>	... Wood good for posts, pegs; young pods eaten as vegetable.
Robina	... <i>Soyimida febrifuga</i>	... Wood dark red, hard, close grain- ed, used in turning, also in beams, rafters, etc., internal bark used medicinally for rheu- matism.
Rora, Kumkum	... <i>Mallotus philippinensis</i> ,	A red dye is obtained from the capsules on the surface of the fruit and is called <i>kumkum</i> . This powder is also used in medicine.
Rusa, Arusa	... <i>Adhatoda vasica</i>	... Very common in waste land; leaves used in medicine. Leaves have a yellow dye.
Safed madār, Akaua,	<i>Culotropis gigantea</i>	... Root, leaves and milk somewhat poisonous used medicinally; flowers offered to Shiva and seed fibre used to stuff pillows, wood for gun-powder, charcoal.
Sāgwān, Leak	... <i>Tectona grandis</i>	... The teak tree; good for building and furniture.
Saj, Barsaj, Maru,	<i>Terminalia tomentosa</i> ,	Often found associated with <i>saraj</i> or <i>dhawa</i> ; wood is used for build- ing, etc., and bark in tanning.
Salsi,	... <i>Boussellia serrata</i>	... Common on dry rocky hills, used in making country boats, etc. Resin is collected. Used to make <i>mandapa</i> in marriage ceremonies.
Sarai	... <i>Shorea robusta</i>	... Excellent timber tree, grows on sandy soil. Sleepers, beams, raf- ters, doors, bedsteads, the one- piece wheels of cultivators' carts, etc., etc., the fruit is eaten and a resin called <i>dhāp</i> collected which is burnt as incense in Hindu temples.

List of common trees and shrubs, etc., (concluded).

Vernacular name.	Botanical name.	Remarks.
Somal	... <i>Bombax malabaricum</i> ,	Wood light, used for door beams by poor people, drums, boxes, etc. Bark used medicinally; roots of young plants as a tonic; its gum called <i>mocharus</i> used in medicine; its flower is eaten in famine time, and the fibre (<i>rua</i>) from its seeds to stuff pillows.
Shisham	... <i>Dalbergia latifolia</i> ...	Good timber used in furniture being the black wood of Bombay. Wood hard, close grained, durable, but insects are propagated on it.
Siharna, Khirani, Harsingar.	<i>Nyctanthes arbor- tristis</i> ,	Wood for fuel. Flowers used by Hindus in religious ceremonies; corolla tubes give a dye. Shoots with leaves used for thatching roofs.
Siris, Sirsa	... <i>Albizia lebbek</i> ...	Inner bark used medicinally and in tanning leather.
Sissu	... <i>Dalbergia sissoo</i> ...	Planted in avenues. Wood good for timber and used in furniture.
Sitāphal	... <i>Anona squamosa</i> ...	Planted in gardens, also wild in Bāndhogarh.
Tenda, Tundi	... <i>Diospyros tomentosa</i> also <i>ebenum</i> ,	Wood for building, heart-wood called <i>abus</i> used for sticks, carved works, etc., fruit is eaten.
Tilman	... <i>Wendlandia ezerta</i> ...	Common on broken ground, near water courses; wood used for fuel, leaves in medicine.
Tinsa, Sandan	... <i>Eugenia dalbergioides</i> ,	Good timber, used in rafters, bedstead, Indian clubs, agricultural implements, etc., bark used for poisoning fish.
Tāt	... <i>Morus alba</i> and <i>lacri- gate</i> ,	Commonly cultivated for its fruit.
Umar, Gular, ... Toiya,	<i>Ficus glomerata</i>	... Fruit eaten and used in medicine leaves used in Hindu ceremonies <i>panch pallav</i> . Dry twigs for sacrificial purposes.

Section IV.—Mines and Minerals.

(TABLE XII.)

Coal,	Rewari is rich in mineral products. The most paying is coal from Umaria, of which in 1903, 193,277 tons worth 6·7 lakhs, and in 1905, 157,701 tons worth 7·2 lakhs were extracted.
Lime-Stones.	Lime-stone is quarried by the Satna Stone and Lime Company whose manufacturing agents are Messrs. Gladstone Wylie and Company, Calcutta, near Satna, a royalty of two annas per ton being paid. In 1903 the duty amounted to Rs. 1,640, and in 1905 to Rs. 4,528. Of other

products 168 mounds of corundum were extracted in 1905, and 1,429 mounds in 1906, while the right to quarry for Ochre (*Kurraj*) is sold for Rs. 210 yearly to a contractor.

Formerly iron was locally worked to a considerable extent according to the Indian iron method in the local mines called *ogara*, of which a very few still exist. Many stone quarries are worked, but at present only supply the local demand.

Section V.—Arts and Manufactures.

In art and industry Bexah, like the rest of Bachelkhand, is behind every native state and even of British provinces. This backwardness is explained by the fact that agriculture affords a ready and easy source of livelihood, and no necessity has been felt for the development of arts and industries. In Bexah little progress has, therefore, been made beyond the point of supplying what is absolutely necessary for the ordinary needs of the people.

Among the fine arts literature and music have always been highly appreciated and patronised by the rulers of Bexah. The famous musician Tin Sen belongs to the Court of Mistrāja Ram Chandra, while Mistrāja Virasanth Singh and Mistrāja Bighurāj Singh also retained the best musicians of their time at the capital.

Among the ornamental arts that of goldsmith is in vogue of others. The locally made *chachra*, *lathra* (an ornament for the ear), *thogya* and *guyatra* (other ornaments for the neck), *lathra* (neck ornaments for women), *lathra*, *chachra*, *chachra* (gold or silver ornaments for the forehead) are especially noted.

An inferior class of metal work is called *maithia* required in brass, silver and white metal all the ornaments that are made in gold and silver, such ornaments being used by the poorer classes. The *maithia* are found in all the towns of Bexah, and craftsmen of their workmanship hold a very important place among the articles exposed for sale in all big fairs, being eagerly sought after by those of the lower classes.

The manufacture of lac ornaments is carried on to a considerable extent in Bexah town where lac is easily obtained from the local forests.

The *Kandras* (carvers and joiners) make wooden frames for *hathra* (called *hathra* or *hathra*), *hathra*, etc., etc., and also miniature imitations of native vessels, toys and nick-nacks which are used in bright colours in lac.

The articles turned out are noted for their excellence, the *hathra* of coconut shell especially finding a ready market outside Bexah territory. *Dhāra*, *chachra* (leaf) and *chachra* (leaf) are the principal kinds of wood used by the *Kandras*.

The pottery industry supplies household utensils. The more ordinary class of vessels are the *ghara* or water pots of two kinds called *ghara* or *ghara* and the *ghara* which is smaller, the *dabbi*, a vessel popular in the locality very like a leather *chhagal* in shape, and many others.

The manufacture of the coarse cloth called *gari* is of long standing. The *Kori* (Hindu weavers), the *Juhari* (Muhammadan weavers) and the *Padas* (aboriginal weavers) have been engaged

Cloth
making.

in manufacturing these stuffs since early days. The spread of railways, however, and the increase in imported goods, has diminished the demand for home-spun stuffs. Out of a total population of 50,800 Kōris and Panas only 8,000 now carry on their traditional occupation. Before the advent of railways also a more skilled class of weavers called *Lahangīrs* manufactured fine stuffs used in making garments for women. There are still *Lahangīrs* in the State, but they have been almost all thrown out of occupation. Cotton-spinning is chiefly done by poor women on hand wheels (*rukta* or *charkha*). At one time this occupation was very widely resorted to, and was the chief means of livelihood of this class, especially of widows, but now machine spun yarn is usually imported even by rural weavers, who find it cheaper and better. The value of imported yarn has risen by 50 per cent. in the last 20 years.

Dyeing.

A considerable dyeing industry still exists. The *rangrez* and *chhāpas* dye *amauwa* coloured cloths in various shades which are still bought largely by the gentry of Rewah for winter garments, though mill-produced woollen stuffs and cotton chintzes are gradually displacing them. The following is a list of the chief kinds of *amauwa* and the locality where they are produced :—

<i>Name of colour.</i>	<i>Place where dyed.</i>
1. <i>Khāki</i> (black with a greenish tinge).	Garh, some 14 miles east of Rewah town.
2. <i>Harigrah</i> (deep green, <i>Suā-pankhā</i>).	Rāmpur, midway between Rewah and Satna.
3. <i>Bālāsī</i> (deep black).	Mādhogarh, Rāmpur and Amarpātan. This colour is popular and commands a price amounting to 8 annas or 10 annas per yard.
4. <i>Kochki</i> (deep red with blue tinge).	Manufactured in Mangawān.
5. <i>Sonahra</i> or <i>piara</i> (yellow colour).	It is of two kinds, (1) dyed on the coarse cloth <i>gazi</i> , it forms the material for the clothing of poor villagers and the lining of garments of the better classes ; (2) dyed on finer cloth, it forms the materials of the winter garments of the well-to-do.
6. <i>Shikāri</i> (the light green).	Made at Baikunthpur, 15 miles north of Rewah.

Besides these common colours used almost everywhere, certain special dyes are used in Rewah town where most of the people, particularly those in the Chief's entourage, wear a bright coloured head-dress (the *sāfa* or *murāitha*) in imitation of the Rājputāna fashion. The names of the chief colours so used are *dhāni*, a light and brilliant green, *azmudāi*, a bright yellow, *jangālī* (*zangari*), a bright green with a blackish tint, *argaza*, *gula anār* and *gulesattār*.

Of the three last named colours *argaza* (sweet scented yellow colour) has long been a favourite colour for wear during the hot months of *Baisākh* and *Jeth*. Some 20 or 25 years ago *argaza* in the hot weather, and the crimson coloured *gule anār* and *gulcsattār* in the month of *Śrāvan* were considered the acme of tasteful dress. At present the last two have rather gone out of fashion.

The manufacture of oil by means of country made oil-presses (*kolhus*) is still a flourishing industry, though the use of kerosine oil for lights has begun to find its way even into the villages in remote parts of the State.

Extraction
of oil.

In towns this profession has made rapid progress and over 120 Singer's Sewing Machines are now in use in Rewah town. While even tailors in remote places have begun to use them. The ratio of tailors to the whole population is 1 to 260. This occupation is followed both by the Hindus and the Muhammadans. The Hindu tailors form a distinct class, the *chhīpi*, while the Musalman tailors are commonly called *darsi*. But this distinction is fast disappearing. The *chhīpis* generally work in villages and Musalman *darsis* only in towns.

Tailory.

Printing on cloth is followed solely by the Musalman class called *chhīpis*. They print materials for bedding, *tohak* and *razāis*, ceiling and floor cloths, etc. The *chhīpis* are found chiefly in Sohāgpur, Chandiā, Rāmāgar, Deora, Beohāri, Baraundha, Sihāwal, Pathrehli, Kān, Amarpātan, Mādhogarh, Nipānia and Rewah town.

Cloth print-
ing.

Of these, the *chhīpis* of Amarpātan and Mādhogarh excel in turning out articles in bright and fast colours. They carry on their trade on a large scale, and the *tohak* and *razāis* printed by them find a ready market. They also manufacture floor and ceiling cloths called *jāyam* and *chāndani*, respectively. The *chhīpis* of Mādhogarh and Amarpātan also dye *amaueu* cloths and print *dhotis* and *sāfus*.

The carpenters of Rewah have made but little progress in their art. Agricultural implements, country carts and rude household fittings and furniture are all they produce. All the better classes of chairs, boxes, desks, stools, etc., are obtained from outside or from the workshops started by the Darbār in the Rewah State Jail, Makundpur, Forest godown, and Umarā colliery. But the supply from these workshops is not equal to the demand.

Carpentry.

The blacksmiths like the carpenters have made no general progress in their art. The only exception to this lies in the manufacture of *sarautas* (betel-nut cutter) which find a ready market outside the State. The blacksmiths are indispensable to the agricultural population, and are found in every big village or group of villages. The following is a list of articles manufactured by the blacksmiths of Rewah. *Sarautas*, which are noted for their superiority, are made in Rāmāgar, Amarpātan and Semeria; *Paras* or battle-axes made in Singrauli; arrow-heads in Sohāgpur; axes (*tangis*) in Semeria and Raghurājnagar; and the big axe (locally called *tunga*) in Kaehnikam, Jiāwan, Rāmgarh, Garhwa, Hinanti (Bardī *tahāsi*), Khannaudhi, Marwās and Sohāgpur; knives are made in Roipur, Rāmāgar, Amarpātan, Baikunthpur and Semeria.

Iron work.

Section VI.—Commerce and Trade.

General
character.

Trade is carried on mainly by means of country carts in places where there are good roads, and by means of pack bullocks and ponies over rough and hilly tracts.

Before the introduction of railways the chief centres of trade were Mirzāpur (United Provinces), Bilāspur and Ratanpur (Central Provinces); strictly speaking there was no regular export trade of any kind. The whole of the commerce was concerned with imports of rice, salt and sugar, cloth and metal vessels, the latter being chiefly imported from Mirzāpur.

Salt, sugar and rice were chiefly imported by Lawānas or Banjāras who traversed the length and breadth of the country. Their periodical visits to the chief places of the State were occasions of note to the people who then purchased a sufficient stock of necessaries for the year.

The trade carried on by the Lawānas was a source of considerable income to the State, and the petty Thākurs whose lands they traversed, the transit duty called *jagāt* (a corruption of *sakāt*) being levied not only by the Darbār but all the petty Thākurs as well. The rates were light, being one and half anna per *gon* or a pack animal's load, but the amount paid by the merchants was heavy taxes being charged several times over by the State and the subordinate land-holders.

The Thākurs who charged the *sakāt* were held responsible for the safe escort of goods through their estates.

The *sakāt* (transit) duties have now been abolished, and a permit duty levied by Darbār only has been substituted for it. Thākurs having no right to levy any duty.

Since the introduction of railways and the construction of new roads, the routes and centres of trade and commerce have almost entirely changed.

The Jabalpur extension of the East Indian Railway now skirts the north-western part of the State for about 100 miles, and the Bengal-Nāgpur Railway crosses the southern portion for about 185 miles. These two lines have opened out the country to trade which has increased materially everywhere.

Exports and
Imports.

The chief articles of export are cereals, wheat, rice, pulses, oil-seeds (*tili* and linseed), cotton, and *ghī*, while the chief articles of import are piece-goods, yarn, iron manufactures, metal vessels, salt, sugar, spices, tobacco, kerosine oil and small articles of daily use or luxury including paper, hardware, umbrellas, boxes, nick-nacks and fancy things.

The value of exports (excluding treasure, *i. e.*, gold and silver) was in 1890-91, 10.4 lakhs, 7.8 lakhs being brought by rail, and 2.5 by road, of which linseed was valued at 3.6 lakhs, hides 1.5, *tili* 1.3, *ghī* 1.5, and cotton 80,000 rupees. In 1901 the value amounted to 10.2 lakhs, 6.5 by rail and 3.8 by road. The famine of 1901 which affected the southern districts caused a rise in hides, 3 lakhs worth being exported. In 1901-02 the value of exports rose to 21 lakhs, 16.7 by rail and 4.7 by road, linseed rising to 8 lakhs and *tili* to 3 lakhs; in 1902-03 the value was 18 lakhs; in 1906-07 to 33 lakhs, 18.9 by rail and 14.1 by road. Imports excluding articles obtained by the Darbār

on public-service were valued in 1890-91 at 11·7 lakhs including 4·5 in piece-goods, 1·5 lakhs of treasure (gold and silver), 2·5 salt, 1 of sugar; in 1900-01, it rose to 15·8 lakhs, 2 in treasure, 6 in piece-goods, 2·7 in salt and 1·5 in sugar; in 1901-02 to 18 lakhs including 1·6 in treasure, 6·7 in piece-goods, 3·8 salt and 2·6 sugar; in 1902-03 to 21·8 lakhs, 2·2 in treasure, 9 in piece-goods, 4 in salt and 2·6 in sugar; and in 1906-07, 21·2 lakhs, 9·1 in piece-goods, 2·2 in salt, 1·9 in condiments and 1·6 in each in sugar and spices.¹

For the most part these articles, with the exception of food grains, are exported to Bombay. Of the imports cloth comes from Cawnpore, Bombay and Calcutta, sugar from Benares, Mirzāpur, Azamgarh and Jaunpur, salt from Pach-bhadra (Rājputāna), pedlar's articles from Bombay, Calcutta and Delhi, and *kirāna*, or spices from Cawnpore and Calcutta.

The chief centres of trade in the State are places on railway lines or near them, *viz.*, Satna (E.I. R.), Majhgawān (E.I.R.), and Sheorajpur; strictly speaking, the last two are not within State territory, but as trade centres exercise much influence; and Chandia, Umaria, Sahdol, Burhār, Jaithri, and Khairi, all on the Bengal-Nagpur line.

Trade
centres.

The principal market towns are Rewah, Amarpatan, Rājpur, Mangawān, Raghunāthganj, Mauganj, Garh, Sohagi, Sitala, Baikunthpur, Semaria, Guraiya, Mādhogarh, Kharwahi, Rāmnagar, Barannda, Deorajnagar, Amarpur, Mānpur, Jobi, Jaitpur, Kothingwani, Rampurnaikin, Ochorhāt, Semaria Sidhi, Marwa, Sonbarsa, Hinauti (in Ochorhāt), Sihāwal, Payulkhi, Jiūwan, Garhāwa, Rāmgarh, Badgawān, Kachni, Khutar, Wairhan, Pathraura, Marwās, Khadd, Sarai and Samund. Weakly markets are held in Rewah town, Mangawān Baikunthpur, Sihāwal and Chandia. All these markets are distributing and collecting agencies. A list of fairs is given in Table XXVIII.

Market
towns.

The chief sellers are Baniās, who are not producers. Brāhmins and other castes also deal in the articles of export. They buy food grains, oil-seeds, and cotton from villagers and dispose of them to the big merchants who carry on the export trade. Messrs. Ralli Brothers and several big native firms of Bhātias and Mārwaris have agents in the chief markets. The cloth dealers are mostly Parwās (Jains) and Mārwaris.

Trading
classes.

Shop-keepers are found in all large villages and are of the Baniā class. They sell necessities to villagers buying grain, oil-seeds, etc., from them for export or sale to big merchants.

Shop-
keepers.

Carriage is effected by means of country carts and pack ponies and bullocks. The chief roads and routes used are given below.

Routes.

The Great Deccan road passes through the Huzūr and Mauganj *tahsils* and is connected with Satna town, the emporium of the State by the Satna-Bela road. This road is extensively used by merchants taking goods to Satna and Mirzāpur from the Huzūr *tahsil* and Mauganj *tahsil*. The chief markets of the export trade lie on this road, Rewah,

¹. These figures are not absolutely accurate being based on the customs duty receipts, but they give an idea of the condition of trade.

Amarpātan, Raipur, Raghonāthganj, Mangawān, Mau, Khatkhari, and Hanumana. The Allahābād road branching from Mangawān *via* Sohāgi is used by merchants carrying goods from Teonthar *tahsil* to markets in the Allahābād District.

The Sohāgi-Dabhaura and Teonthar-Sheorājpur unmetalled tracks are used by merchants carrying goods to the Dabhaura and Sheorājpur railway stations. The Sitlāha-Rewah (unmetalled) road is used by merchants bringing food grains from Teonthar *tahsil* to Rewah town; the Semāria-Raghurājnagar and Amarpātan-Raghurājnagar road by merchants carrying goods to Satna; the Rāmnagar-Satna road *via* Gursari-ghāt and Amarpātan, by merchants carrying goods from Rāmnagar *tahsil* to Satna town. Other routes are those from Rāmnagar to Rewah *via* Govindgarh, Rāmnagar to Beohāri, Rāmnagar to Mānpur, Mānpur to Umarā, Chohāt to Rewah *via* Garh, Bardi to Mirzāpur by Jarkul-ghāt, Sonbarsā to Mirzāpur by Damak-ghāt and Gopal-ghāt, Sihāwal to Mirzāpur by Lālganj-ghāt, Singrauli to Mirzāpur, Jaitpur to Sohāwal and Kothinigwānt to Jaitpur.

Vehicles.

In Rewah and other towns springed and rubber tyred vehicles are met with, and the Chief also uses motor cars. But country carts and unsprunged *shigrams* drawn by bullocks are used by most people.

In Sohāgi *tahsil* the Lavānas still bring food grains to the railway station markets, as in this *tahsil* country carts are very scarce.

WEIGHTS AND MEASURES peculiar to the Rewah State.

These measures are used in measuring corn and liquids.

2 <i>Pauthis</i> or <i>Chachuri</i>	equal 3 <i>Adhis</i> or $\frac{1}{2}$ a <i>seer</i> .
2 <i>Adhis</i>	" 1 <i>Kurua</i> .
4 <i>Kurus</i>	" 1 <i>Paila</i> .
4 <i>Pails</i>	" 1 <i>Kurai</i> .
20 <i>Kurais</i>	" 1 <i>Khandi</i> .

1 *Pauhi* or *Chachuri* is equal to $\frac{1}{2}$ of a standard *seer*.

In the Huzūr, Raghurājnagar and Manganj *tahsils* the *Kurai* measure holds about 3 *seers* weight of grain, but the weight necessarily varies according to kind of grain. In Rāmnagar and Sohāgi *tahsil*, however, the *Kurai* holds about 2 $\frac{1}{2}$ *seers* of grain.

In the Teonthar *tahsil* the following measures of capacity are used:—

The *Chachuri* is the standard, and is equal to $1\frac{1}{2}$ *seers*.

The measures used in weighing bulky articles are:—

Measures of capacity.

4 <i>Chachuris</i>	equal 1 <i>Kurua</i> (or 6 <i>seers</i>).
4 <i>Kurus</i>	" 1 <i>Paila</i> (or 24 <i>seers</i>).
2 <i>Pails</i>	" 1 <i>Dumāni</i> (or 1 maund, 8 <i>seers</i>).
2 <i>Dumānis</i>	" 1 <i>Pāthi</i> (or 2 maunds, 16 <i>seers</i>).
16 <i>Pāthīs</i>	" 1 <i>Pāth</i> (or 38 maunds, 16 <i>seers</i>).
20 <i>Pāthīs</i>	" 1 <i>Khandi</i> (or 48 maunds).

Measures of weight.

4 <i>Paisās</i> (<i>pāṭṭa</i>)	(or 5 tolas) equal 1 <i>Chhatak</i> .
2 <i>Chhataks</i>	" 1 <i>Adhpaī</i> or <i>Adhpasī</i> .
2 <i>Adhpais</i>	" 1 <i>Pāu</i> .
2 <i>Pāus</i>	" 1 <i>Bisi sawaiya</i> or <i>adhreer</i> (used by cotton sellers).

4 <i>Pans</i>	equal 1 <i>Sour</i> or <i>Archaia</i> .
2 <i>Sour</i> or <i>Archaia</i>	" 1 <i>Pansi</i>
6 <i>Sour</i>	" 1 <i>Pansi</i> (equal 1 <i>Dāra</i> or 4 <i>pāla</i> <i>terā</i>).
8 <i>Pansi</i>	" 1 <i>Mand</i> .

Note.—The *tin* is now generally taken as equal to half a *seer* or 40 *toles*, but originally the *seer* was equal to 160 *toles*. The *seer* and *achche* in gold weight are respectively equal to 1½ *adhatte*, and 2½ *adhatte* of the weight.

Jewellers use the following :—

60 *Kāshā* equal 1 grain (*Chāsur*).

8 *Chāsur* " 1 *Kott*.

4 *Kott* " 1 *Māla*.

12 *Māla* " 1 *Tola*.

In earth-work the following measures are employed :—

4 *Māla* (chāhālo) equal 1 *Cubit*.

4 *Cubit* " 1 *Korai*.

In surveying land the *Pica* is the unit.

20 *Kāchā* equal 1 *Bhāra*.

20 *Bhāra* " 1 *Ma*.

20 *Ma* " 1 *Raja* or 2,500 *ma* *patā*.

The official year commences on 1st Aṣvīn.

Section VII.—Means of Communication.

The railways which traverse the State are the Jalalpur-Alhabārd section of the East Indian Railway and the Bengal-Nagpur Railway. The Jalalpur section runs for about 30 miles through parts of the Baghatpāgar and Teonthar *taluk*s with stations at Satna and Dabāura. The Bengal-Nagpur passes through the Sahāpur *taluk* with stations at Chāuli, Umariā, Karkeli, Birmachpur, Ghonghāt, Sahādel (for Sahāpur), Barhar, Amāppur, Jantān and Kharī.

The Darbār contains 14½ miles of metalled, and 288 of unmetalled road.

The chief metalled roads are the Great Deccan road from Jalalpur to Mirzapur, with an unmetalled branch to Allahābād, and the Satna-Patna-Nongong road. These roads were, before the opening of the railways, of the first importance but have now become leaders. Other metalled roads lead from Benāh to Govindgarh, Bela to Govindgarh, Govindgarh to Bānagar, Bānagar to Anarpatān, and Satna to Bela. The cost of up-keep of the metalled and unmetalled roads is about Rs. 30,000 a year.

In former days there was no regularly organised postal system, letters being carried by special messengers. The village *chauti dars* or *patāra* were bound to carry Darbār letters or other articles from village to village. As regards public letters, people, in urgent cases, had to send special messengers at their own expense, and in ordinary cases they had to wait for travellers who happened to be passing through the places to which they wished to send messages. This state of things existed till long after the establishment of the British power. It was only

(Table XV).

Post office
(Table
XXIX).

in about 1863 or 1864 that an Imperial Post Office was, for the first time, established in Rewah town. Even after this no change in the condition of affairs took place in the districts, except that branch offices were sometime after opened at Gorindgarh and Madhogarh. In Maharaja Visvanāth Singh's time an improvement was effected by the enlistment of a reserve body of runners called *dhaurahās* or *harlārās* whose business it was to run with messages on special occasions; but no regular line of mail runners was established. In 1875 this body of *harlārās* was made more efficient by the establishment of regular *dāk* or postal lines to various important places in the State, and mails were regularly run, an overseer at the head of the organisation supervising operations. This arrangement existed mainly for State business, but private letters and other articles were also despatched on payment of postage at the rate of one pie per *tolu*. The system did not prove satisfactory. The receipts from postage fell far short of the expenses, and in 1881 an arrangement was made with the Imperial Postal Department by which it engaged to work a postal service to all important places in the State, all official covers being duly franked by authorised State officials. A yearly payment of Rs. 470 was made by the Darbār which undertook to open its own post offices in places of importance.

Almost all villages are included in the circle of a post office, villages which are far from post offices within State limits being served by the nearest post office in British India.

These postal lines are worked through the Agency of the Imperial Postal Department assisted by the police officials at the local *thānas* and *chaukis*. they cover a total length of nearly 421 miles. An arrangement for mutual exchange of letters and packets between offices in the State and in British India, has been made for articles passing over State and Imperial lines, double postage being charged both by Government and the State at British India rates.

The total receipts amount to only about Rs. 200 a year which falls far short of the expenses incurred, amounting to about Rs. 2,400 a year. The total strength of the establishment conducting the work of these lines is 46, while in several places the police officials have to perform the *dāk* work in addition to their own work.

Telegraph.

A telegraph line from Satna to Rewah town was constructed by the Government Telegraph Department at the cost of the State in 1883, and the office formally opened on the 29th October that year. The financial arrangement with the Government is that all the receipts of the telegraph office should be credited to the Darbār, the cost of maintenance of the line and salaries of the establishment at Rewah being also debited to them.

The receipts have been rising and now easily cover the expense of management. The cost of the line is about Rs. 1,200 a year. The yearly receipts have risen from Rs. 1,300 to Rs. 3,000.

Telephone.

A telephone line has been erected between Rewah and Gorindgarh.

Section VIII.—Famine.

(TABLE XXX.)

Early records.

The earliest famine known to have occurred in Rewah fell in V. S. 1888 or 1891 A.D. The details of this famine are not known, but the

proverb *Athāsi parṇai* or "the year 88 has returned," still used in reference to any severe calamity is sufficiently significant. The famine of V. S. 1925 or 1863 A.D. is also well remembered by the people, and the term *Pachīta* "the year 25" by which it is commonly known, is still associated with untold horror in the minds of villagers. There were no regular relief measures in those days, and a famine absolutely crippled the people, who took years to retrieve their position, while many families altogether succumbed to its hardships.

Experience of former famines had led in 1883 to the preparation, as a precautionary measure, of a list of projects which could be opened as relief works.

Famine of
1896-97.

The causes which led up to the famine of 1896-97 were the excessive winter rains of 1893 which destroyed the *rabi* crops that year, the excessive monsoon of 1894 which severely injured both crops, and the early cessation (on September 15th) of the monsoon in 1895-96. Unfortunately the rainfall of 1896 on which so much depended suddenly ceased at the end of August, and the winter rains, though abundant, did not come until it was too late.

The early crops of *sāmān*, and *lakun* in the districts north of the Kaimur range and the *sāmān* and maize in Bardī, Sohāgpur and Rāmnagar were saved, but by the end of September the stock of food grain was exhausted, while in the meantime the *ladān* and rice had withered, *javār*, which had been sown in *bāndh* land and low-lying *nour* soil, produced an 8 anna crop in the west of the Mauganj, south of the Huzār and in the Raghurājnagar *tahsil*; in these districts, therefore, the distress was not locally so keen as in other parts. Owing, however, to high prices and the impossibility of keeping the starving people from wandering a condition of famine declared itself throughout the whole State by the 1st of October 1896, the worst affected districts being Teonthar, north of the Tons river, eastern Mauganj, northern Mādhubgarh, nearly the whole of Bardī and parts of Rāmnagar and Sohāgpur.

To meet the crisis which had arrived the Barīdar at once drew up schemes for the employment of 10,000 persons a day for 11 months at a cost of 5 lakhs of rupees. The percentage of the people relieved was 7.6 on the population of 1891, and the average cost per head per diem 1 anna.

Out of the total population of the State (1,508,913) those coming on relief numbered 293,219, of whom 232,153 were estimated to be labourers and 61,066 artisans.

The relief works undertaken included the construction of 248 *bāndhs*, 36 tanks, and 17 roads, besides minor works such as State buildings, etc.

The total cost to the State was 18 lakhs, of which 7 were spent on relief works, Rs. 55,000 on charitable relief, and 1.9 lakhs in *takkārī* advances and loans. Of this amount 2.2 lakhs were spent on works giving a return. Seed, food and clothes were freely distributed.

The famine necessarily had a considerable effect on the health of the people. The mortality could not be ascertained with accuracy, the only data available being the returns of poor-houses.

Famine of
1899-1900.

Cholera broke out in several of the big relief works, but energetic measures were taken by the medical officers to stamp out the disease.

The rainfall in 1899-1900 was below the average, while a long break occurred from the end of August to the middle of September. In the Rāmnagar and Bardī *tahsils* the crops dried up completely, and scarcity became imminent before the end of October. A Famine Commissioner was appointed by the Darbār.

It was found, however, that the reports of the local officials were exaggerated, while the winter rains of January greatly improved the situation. Although nearly 12,000 people came on relief works there was no real famine, but only distress in parts of the southern *tahsils* of Sohāgpur and Rāmnagar. A noticeable point in the connection with the arrangements for relief during this famine was the ready co-operation with the Darbār of local *zamindārs*, who had almost entirely held aloof in the former famine.

CHAPTER III.

ADMINISTRATIVE.

Section I.—Administration.

(TABLES XVI—XXVII).

Though very little is known about the administration of the Rewah State prior to the period of its reorganisation by Maharaja Visvanath Singh during 1835, something can be gathered from old official papers and reports. Here as everywhere else in India the Chief has always represented the sovereign authority but in early days it was also a time honoured custom that he should delegate his executive powers entirely to his *ditwān* who practically held the control of State affairs. During the early period of conquest the Baghel Chiefs and their followers simply formed a military camp and the court at Bāndhogarh up to the 16th century was little more than the headquarters of a body of adventurers who with the Chief at their head periodically sallied forth into the plains and exacted dues from the villagers. Gradually as the country became more settled, the military and revenue sections of the administration became more and more distinct. The former based on the feudal system was in a considerable state of development, while the latter was still in a very unorganised condition. The conquered territory being divided roughly into *jāgīrs* or lands given out in grants to the kinsmen of the Chief and persons of note for their maintenance in return for which they followed the Chief with a body of men, *sālta*, and some *kothār* land under the control of the Chief, the revenues from which were paid directly to him, and formed his privy purse.

Early days.

The whole attention of the Chief was devoted to the development and training of his army. During this condition of affairs it was more convenient for the ruler to remunerate every kind of service by grants of land, than by cash payments. Besides military grants other grants such as *rritta*, civil *jāgīrs*, *pāipakhār*, etc., were also made. Grants made to maintain religious institutions were known as *devārtha* and *punyārtha* grants. Similarly, most of the State officers, including the inferior village and *tahsīl* officials held small grants of land in return for their services, while the big officials such as the *kārinda* or *tahalua* and the principal *khāskulums* (writers-in-chief) held handsome *jāgīrs*. Even public servants who held no land were usually paid in *rakkas* (or credit notes) upon the *tahsīl* officials, and had to go personally and realize the amount. This arrangement, though it entailed much trouble and inconvenience to the servants, was simple and convenient under existing circumstances.

The recognised officials of the Darbār in those days were, first the *diwān* to whom all administrative authority was delegated, and who also exercised full judicial and executive powers. Next came the *khāskālam*s or writers and accountants corresponding more or less to secretaries. These men belonged to the Kāyastha community. Though the title is not pretentious, and these men never held the officially independent charge of any branch of the administration, their power was very great. The Kāyasthas or writers were inseparably associated with every official, without whose assistance they were practically helpless being in these days often soldiers who were illiterate or very little educated. The *khāskālam*s were thus practically responsible for the entire routine work, and the keeping and examining of accounts. The officer in charge might express the general tenor of his intentions, but to carry them out systematically was the business of the *khāskālam*s. They alone could draw up documents and promulgate orders, and see to their due execution, while the whole of the State accounts were, even up to quite late days, in their sole charge. The *khāskālmī* system of keeping accounts as used in the State was most favourably spoken of by British officers who had charge of the State while under the management of Government.

The Kāyasthas were allowed to keep all or any portion of the State records at their own houses, except treaties and *khārīt*s of importance, and the State Record-rooms are consequently nearly destitute of early documents. The accounts department was the only department which existed, properly speaking, besides the Chief's private establishment and his army. The *diwān* was at the head of the whole system but below him it bifurcated into two distinct sections, one as mentioned above held by the *khāskālam*s and the other by the custodians of State property (cash and jewels, etc.) called *bhandārī*s. This same system, modified, was extended to the districts. At the headquarters of the State were the chief *khāskālam*s with their staff of writers and *bhandārī*s. In the *parganas*, the *pargana* officer called *Tahālnā* (or *Lārindā*) was assisted by the *pargana khāskālam* and the *pargana tahvildār*. Thus from the court of the Chief down to the smallest village a host of Kāyasthas was busy in recording receipts and expenditure and preparing and examining accounts, a duty which virtually placed the State administration in their hands. The village accountant during the harvests went round from village to village and recorded the produce of each cultivator's harvest with the share due as State revenue and other rates and charges. These *kachchā* or rough detailed accounts were prepared for all villages and submitted to the *pargana* officer, who had them examined by the *pargana khāskālam*. This official made *pargana* summaries from them and sent them to the head office of the *diwān* where his writer-in-chief similarly examined them and prepared a final summary for the whole State.

The *pargana* and the State *ekkatras* (abstracts) of all the items of receipt and expenditure are singularly comprehensive and deal so clearly with major and minor portions of each account that it is easy to obtain at a glance all information concerning any one item.

Besides these accounts and documents conferring titles or rights, practically no records of any kind were kept.

The ordinary affairs of the people were invariably settled by their rural *panchāyats*.

Administration of justice.—There were no regular courts of law. The *pargana* officers enjoyed full powers in their respective jurisdiction and cases were usually decided by arbitration. Recognised committees of influential persons called *chauras* existed at convenient centres which were presided over by the leading men of the locality and these were constantly referred to for decisions in complicated civil and criminal cases. They corresponded to village *panchāyats*. Criminal cases in which the Darbār was interested or what are now called cognizable offences were few, and even in these cases a fine (*dānd*) was, as a general rule, the only punishment inflicted.

Cases of adultery came in the category of such cases, and the fines exacted for such offences were technically called *anīta*. Besides the fines to the Darbār the culprits, if they belonged to the lower castes, were compelled to give satisfaction to their community in shape of feasts technically called *kodai*, *bhāji* (i. e., *kodon*-rice and vegetables).

Most civil cases, such as the liquidation of a debt, were decided by making the parties undergo different ordeals or take solemn oaths. Among the ordeals, plunging the hand into a vessel full of hot water, or lifting a red hot iron ball with the hand were commonly imposed, if the burns were well in three days' time the accused was held not guilty.

Old villages and revenue units.—Up to the time of Mahārāja Ajit Singh the State revenue records seem to have been kept on a very comprehensive system including *khālā* and alienated lands. An abstract register or *bahī* of the old records, dated V. S. 1818 or 1761 A. D., gives the following interesting information :—

When the Emperor Babar in 1527 organised his territories into *khālā* provinces and the possessions of the feudatory chiefs, he issued a *nānkār* grant for the Bāndhogarh territories included afterwards in the *sābah* of Prayāg to Rājā Bīr Singh Dev, which was later on renewed to Rājā Ajit Singh as a *eritta* grant or tribute free tenure. The total number of villages held was 16,002. The gross value of the revenue being just over 1 crore.¹

Two methods were in vogue for collecting revenues. Villages were leased to farmers or were held in *ain-kamāl khālā*, that is, their revenues were collected directly by State officials. Revenue was universally taken in kind and so varied from year to year.

The Rewah Chief enjoys the powers of a ruling Chief of the first class having full powers in all administrative matters, including those of life and death over his subjects. He pays no tribute to Government.

Present day
Chief.

The Chief is the final appellate authority in all matters, revenue and judicial as well as those of general administration.

1. See Appendix C, and D.

Diwān.

No *diwān* or Minister now exists in the State, this appointment having been abolished in 1904 after the death of Lāl Pratāp Singh. Two Commissioners, however, one for revenue and one for judicial work, assist the Chief in the administration, while a Secretary to His Highness deals with all matters which require the Chief's personal attention putting up cases and papers submitted by the Commissioners for his perusal and orders. The Revenue Commissioner to a large extent performs the general functions formerly executed by the *diwān*.

Departments
of
Administra-
tion.

The departments of administration are as follows :—

Judicial, under the Judicial Commissioner ; *Revenue and Executive*, controlled by the Revenue Commissioner, dealing with the revenue administration and all general matters ; *Customs and Excise*, in charge of the Superintendent of Customs, who acts under the Revenue Commissioner, and is assisted by two Deputy Superintendents of Customs in charge respectively of the northern and southern circles, the latter being assisted in the work of supervision by Customs Inspectors ; *Police*, in charge of the Superintendent of Police, under the control of the Magistrate of Rewari town, who is practically Inspector-General of Police, the Superintendent of Police being his immediate assistant ; *Public Works*, in charge of two Sub-divisional Officers stationed at Rewari and Satna, assisted by Overseers ; *Medical*, under the Agency Surgeon of Baghelkhand, who acts as Medical Officer of the State, Hospital Assistants having charge of the various dispensaries ; *Educational*, under the general control and supervision of the Revenue Commissioner, the two High Schools being in charge of their respective Headmasters, while the Vernacular Village Schools, Sanskrit Grant-in-aid Schools, and the Girls Schools are in charge of an Inspector of Schools ; *Forest*, under the Superintendent of Forests, who is directly under the Darbār, the forests being divided into two ranges each under a Forest Ranger, who is assisted by Inspectors and *dafādārs* ; *Accounts Department*, under the Accountant dealing with the audit and check of all accounts.

Official
Language.

Hindī is the Court language and all papers—Judicial, Revenue, Accounts, etc., are kept in that language. There is, however, an English Department attached to the Darbār and Accounts office for correspondence with the Political Agent, the Public Works Department, Umarā Coal Fields and others.

Administrative
Divisions
(Table VIII
and
Chapter IV).

The territories of the State are divided into 7 *tahsils*, four of which lie north of the Kaimur hills, and three south of them. These are :—the Huzār, lying round the chief town (1,201 square miles) Raghurājnagar or Satna (977 square miles), Teonthar (816 square miles), and Manganj (78½ square miles) *tahsils* north of the range, and the Bardī (2,912 square miles), Rāmnnagar (2,775 square miles) and Sohāgpur (3,535 square miles) *tahsils* lying south of it.¹

1. A new *tahsil*, that of Bāndhogarh, has been created since the compilation of this Gazetteer. It includes portions of Rāmnnagar and Sohāgpur *tahsils* as previously constituted. The Rāmnnagar *tahsil* is now known as Beohārī.

Each *tahsil*, in addition to *kothār* or *khālsā* land, contains a certain proportion of land granted to Thākurs and petty *jāgīrdārs*, etc., the whole of the Sohāgpur *tahsil* comprising the valuable Umariā Coal Fields being thus alienated.

The following table gives the chief statistics of population and revenue by *tahsils* :—

Tahsil.	Area in square miles.	NUMBER OF		Population, 1901.	Population per square mile.	Percentage of variation between 1901 and 1901.	Number of persons able to read and write.	Land Revenue and crops of khail in thousands of rupees.
		Towns.	Villages.					
(1) Hazār ..	1,201	2	975	216,139	263	— 11	10,447	286
(2) Teonthar ..	818	..	605	103,154	129	— 41	1,611	329
(3) Baghmānjāgar ..	977	1	497	144,319	151	— 10	4,039	251
(4) Mauganj ..	784	..	609	99,531	127	— 21	1,531	212
(5) Bardī ..	2,912	..	918	194,921	63	— 16	6,669	163
(6) Nāmānagar ..	2,775	..	919	221,980	80	+ 7	1,910	86
(7) Sohāgpur ..	2,535	1	1,192	261,918	69	— 20	9,109	27
TOTAL ..	12,009	4	5,865 ¹	1,227,265	102	— 14	23,916	1,554

The *tahsildār* is the chief revenue officer of the charge and also a Deputy Magistrate exercising powers of the 2nd class in criminal cases, and being empowered to entertain civil suits not exceeding Rs. 500 in value.

Tahsil staff.

The *tahsildār* is assisted in revenue matters by a *nāib-tahsildār*, *kānungos*, *patwāris* and the usual office staff. In judicial matters he is assisted by the Honorary Magistrate, when any such happen to have been appointed in his *tahsil*. A *thānādār* or *kotwāl* deals with police matters, the village school masters and hospital assistants, supervising education and medical relief.

Except in purely village matters there is now no independent internal administration in any village. Each village forms an integral part of a *tahsil* and is, for revenue purpose, included in *halqa* or circle in charge of a *patwārī* who records all village events of interest. It is also, if a *kothār* village, held in farm by a contractor or *thekādār* who collects the revenue from the cultivators and pays it into the *tahsil* treasury, after deducting his commission. The recognised village officials are the village accountant or *patwārī* (only in the four northern *tahsils*); the village *thekādārs* (in *kothār* villages) and the village *chaukīdārs* (*kotwārs*).

Internal village Administration.

1. Since the Census of 1901, 831 more villages have been brought on the Register.

In alienated lands the holder keeps his own *kāyasth* who superintends the village administration. These three, the *patwārī*, the *kāḍār* and the *chaukīdār*, are responsible for giving information to the nearest police *thāna* or *chaukī* of the commission of any cognizable offence, or the *takeil* in case of any other occurrence of note.

With regard to crime and litigation each village is connected with a certain police station in charge of a *jamādār* or *thānādār*, who is responsible for the prevention of crime and maintenance of peace. He collects information through the village *chaukīdārs* and others. The village autonomy common in most parts of Central India never seems to have existed in this State except in regard to caste matters or the most trivial village disputes.

Section II.—Law and Justice.

(TABLES XVI AND XVII.)

Early days.

In former days, as has already been stated, practically all cases were settled by arbitration either by the people themselves or on reference to a State official. During Mahārājā Vīśvanāth Singh's times regular judicial courts were first established presided over by the *audits* who decided cases according to the *Dharma Shāstras* of the Hindus. Petty disputes were settled orally and only in very important cases did judges give written judgments called *Dharma-Iyāsthas*. These were apt to be very discursive containing not only the statements of the parties concerned, depositions of witnesses and the findings of the judges, but long disquisitions and quotations from the *Shāstras*. These *Iyāsthas* were generally written in a very laboured style and were full of unnecessary repetition and literary jargon. They formed, however, the only written records of judicial cases.

Present system.

Legislative Acts, Rules and Notifications under Acts and Rulings of the High Court are contained in the orders known as *hidāyats*, which are either issued by the Darbār on its own motion or on receipt of a reference or report from the Revenue or Judicial Commissioner.

Legislation and Criminal Procedure.

In criminal matters the provisions of the Indian Penal Code and Code of Criminal Procedure of British India are followed generally. Two or three important particulars in which the State Criminal Law differs from that of British India are these :—(i) No criminal proceedings can be brought against any person for defamation; (ii) Life imprisonment is a legal sentence in the State where transportation for life is provided for by the Indian Penal Code. The latter is of course also a legal sentence; (iii) Amongst Hindus charges for adultery can be brought against a man by a relation of the woman with whom he is cohabiting, even if she is a widow, provided that the woman belongs to a caste in which widow marriage is not customary. There is another important provision in this connection, *viz.*, that the husband or near relations of the injured woman can insist on the adulterer with whom the woman is cohabiting being expelled from the village or town, together with the adulteress.

Civil.

In Civil Law the provisions of the British Indian Code of Civil Procedure are more or less followed. It appears, however, that the difficulties of decree holders here are greater than those in British

India. No judgment-debtor can be imprisoned as provided in the British Code, in execution of a decree, moveable property can never be attached in execution without the special sanction of the highest Court of Civil Judicature (the Court of His Highness), and no house in which a judgment-debtor lives with his family can be attached and sold in execution of a decree, unless it has been previously mortgaged in payment of the debt. It is a striking feature of the existing Civil Law in the State that it should deviate in several most important particulars from the rules laid down in the *Dharma Shāstras*, not in regard to rules which have become a dead letter, but with respect to those which still govern custom and are recognized as Law in British India. This is especially the case with reference to adoption, partition, inheritance and succession, and transfer of property. In the first place, no male or female can adopt a son so as to affect property unless the adoption is made with the sanction of the Darbār. Bequeathing and gifting away property is subject to the same limitation. Secondly, with reference to inheritance and succession, those only who are within 5 degrees of the deceased in consanguinity, reckoned according to section 5 of the Indian Succession Act, can inherit property, all other *expindas*, including a daughter and daughter's son, being excluded from inheritance. This rule was acted upon more or less prior to the year 1880, but became strict law in the year 1890. The reasons for this provision of the Law, which is opposed to both the spirit and letter of Hindu Law, are that formerly grants were made freely to Brāhmins and Rājputs and even other castes, on the assumption that what could be so easily given could be as easily recovered, while in the second case the Darbār always recognises the obligation to maintain widows and orphans of the grantees who are left without means of subsistence and are too young or too old to be able to work for a livelihood.

In regard to partition many of the Thakurāts are of the nature of what are called in the Hindu Law in force in British India "Impartible Rāj." In Rewah the right of primogeniture is recognised and the eldest son becomes Thākur, his younger brother receiving a grant for his maintenance. In Rājput families also it is customary for the eldest brother to get a larger share of the ancestral property than his younger brothers. In most families the rule of partition is *pinch dar*, that is to say, the elder brother gets three shares and the younger two. Even amongst Brāhmins and other castes the elder brother gets some preference for *Jethu*, (i.e., for being elder or *Jeth*) though it is not so marked as in the above case. This, though not in accordance with the *Mitākshara* or any other treatise of Hindu Law, is an old custom which originated in feudal days.

All important provisions of the Indian Limitation Act are in force in the State with the exception, that part payment of a loan on interest, even after the expiry of the period of limitation marks a point from which limitation proceeds to run afresh according to the nature of the original liability. It is not necessary in the Rewah State for a bond to be written on a stamped paper, an ordinary paper answers the purpose. The system of civil and criminal justice in

force in the Rewah State is thus analogous to that in British India. Vakils appear for parties, and although all the rules of the Evidence Act and Codes are not strictly followed, the general procedure is similar to that in British India. It may be added that mere technical points are held of minor consideration so long as justice is secured.

Courts and
Powers.

(a). *The Honorary Magistrates* :—These officers exercise powers of the third class in criminal matters and are empowered to entertain civil suits for money and moveable property not exceeding Rs. 300 in value. At present there are six Magistrates, the Thākurs of Deorājnagar, Kripalpūr, Chohāt, Rāmpur and Marwās and an Honorary Magistrate at Rewah.

(b). *Deputy Magistrates* :—The seven *tahsildārs* are Deputy Magistrates exercising powers of the second class, and as Civil Judges hearing suits for money and moveable property up to Rs. 500 in value, and title and other suits up to Rs. 250.

Assistant Deputy Magistrates exercise half these powers.

The Deputy and Assistant Magistrates of Huzūr *tahsil* deal with criminal and civil cases of Rewah town also.

(c). *Magistrate of Rewah* :—This officer exercises the powers of a District Magistrate, and hears appeals from the subordinate courts.

(d). *Civil Judge of Rewah* :—This officer hears civil appeals from the subordinate courts. In original civil matters his powers extend to suits for money and other moveable property not exceeding Rs. 1,000 in value, and title and other suits for Rs. 250. In addition, all civil suits for Rewah town below Rs. 500 are heard by him.

(e). *Judicial Commissioner* :—The Judicial Commissioner is Sessions Court Judge. In civil suits his powers are unlimited, all suits over Rs. 1,000 in the case of money and moveable property and of over Rs. 500 in other cases being preferred in his court. He hears appeals from the District Magistrate and the Civil Judge.

(f). *High Court* :—This court is presided over by His Highness himself. It is purely appellate in character, all final references in criminal and civil cases being dealt with in this court of which the powers are unlimited.

Fees.

The court-fee charged to suits is, in civil suits one anna per rupee, in rent suits $\frac{3}{4}$ anna per rupee.

Registration.

Registration of documents is not carried out by any special official or office, but by the ordinary courts. The fees realised amounted in 1904 to Rs. 521 and in 1905 to Rs. 554.

The documents registered in 1905 included 161 mortgage-deeds and 132 sale-deeds, the total value of the property dealt with being 1·6 lakh.

Section III.—Finance.

(TABLES XVIII AND XIX.)

All accounts of Receipts and Expenditure are kept in the State Accountant's Office and in the Offices of the Departments.

The accounts are examined, checked and audited by the Accountant, who submits annual reports to the Darbār Office, showing estimates and actuals of total receipts and expenditure under all heads. Except fixed salaries and contingent charges which are paid by the

State Treasuries on a demand from the officer concerned, all money is paid out in cheques issued by the Accounts Office and signed by His Highness. This system is a recent one having been introduced during the Government superintendence of the State. It is the first principle of the State accounts that all the money received by officials on behalf of the State must, without delay, be credited to the nearest treasury either at the *tahsil* or the small treasuries belonging to the Forest and Customs Department. No money can be paid out from the treasuries without a cheque issued by the Darbār, except from money received for contingent charges at the beginning of the month or from the Imprest kept with each officer which is periodically recouped. Messrs. Ganeshdās Krishnāji of Indore are treasurers to the State and have their agents at the *Sadr* Treasury at Rewah and at the headquarters of the various *tahsils*. The money is kept under the usual double locks, one key being with the cashier and the other with the Revenue Commissioner, at the *Sadr* Treasury in Rewah, and with the *tahsildars* elsewhere.

A regular budget is prepared annually by the Accountant for all classes of expenditure and is submitted for the sanction of His Highness. The new budget comes into force on April 1st, the commencement of the official year. No item of expenditure can, in any case, exceed the amount allotted in the budget unless specially sanctioned; but even in granting such special sanction the Chief generally consults the Accountant as to whether the budget estimates admit of such increase.

The financial position of the State is satisfactory, a large saving having been made during the period 1881-1902. In 1903 the closing balance was 4 lakhs, or under the average closing balance of the decade 1881-90 (which was about 6 lakhs), due to the extraordinary expenses incurred on account of Delhi *darbār* and the marriage of the Chief's sister, amounting to 118 lakhs. The fact that this large sum was spent without burdening the State is a strong proof of its excellent financial position. The opening balance in 1901-05 was 10.1 lakhs.

Financial position.

The total normal income of the State is about 29 lakhs a year. The chief sources of revenue are Land Revenue 10 lakhs; Forest 7 lakhs; Umari Colliery 7 lakhs; Cesses on land Rs. 50,000; Customs 2 lakhs; *Māmā* or tribute paid by *jāgirdars* Rs. 30,000; and Excise Rs. 70,000.

Sources of revenue.

The chief items of expenditure are Chief's establishment 3.8 lakhs; Army 4.3 lakhs; Colliery 4 lakhs; Public Works 3 lakhs; Collection of revenue 1.3 lakh; Forest 1 lakh; Police Rs. 25,000; Education Rs. 28,000; Law and Justice Rs. 22,000 and Medical Rs. 33,000. The total expenditure is about 25 lakhs.

Expenditure.

There has never been a silver coinage in Rewah State, but during Mahārājā Vīśvanāth Singh's time in 1838 a copper coin called the *Baggha Shāhi* was issued, of which 56 went to a British rupee. It remained current until the time of Mahārājā Jai Singh. A list of coins

Coinage.

which formed the ordinary currencies of the State before the introduction of the British rupee in 1868 is given below: since this year the British coin alone has been legal tender.

Coins in circulation before 1868.

No.	Name of coins used locally.	Weight in māshas.	Average exchange value in British coins.	REMARKS.
Gold coins :—				
1	Akbārī Mūhar,	11 māshas,	Formerly 24 rupees kaldār, now 30 rupees kaldār.	
2	Shāh Jahānī,	11 māshas,	Formerly 24 rupees, now 30 rupees kaldār.	
Silver coins :—				
1	Bandarī Sikka or Kāshī Shāhī (Mūchhalidār).	11 māshas, 5 rattis.	$\frac{2}{3}$ of a kaldār rupee before 1863.	Was the legal tender for revenue in the Teonthar, Manganj, Bardi and Rāmnagar taluqas. Inscription in Persian characters as follows :— 1. On one side :—"Muhammad Shāh Bādshāh Alam san Hījri 11." 2. On the other side :—"Maimanat Mayus Izribād." A conventional name for the Bandarī Sikka. A conventional name for the kaldār. (These names are no longer in vogue.) During Mahārājā Vijaynāth Singh's time State dues were taken in Pūcha coins which was also the standard coin for the payment of salaries in the army, while the Rākāsīs (domestic and private servants) and members of the Mahārājā's household were paid in the Nāgpurī issue. Current in bazar transactions before the introduction of the kaldār rupee. Inscription in Persian.— 1. On one side.—"Ala Amī-i-Dīn Muhammad Fāzī Shāh Alam Bādshāh Haft-Kishwar Bādshāh." 2. On the other side :—"Maimanat Mayus Julius san 45 Farrukhābād." Very extensively used till 1868. Payments to State servants were generally made in the Nāgpurī. Current simultaneously with the Nāgpurī and Pūcha,
2	Satrāh san...	ditto,	
3	Solāh san ...	12 māshas,	
4	Pūcha ...	11 māshas,	15/16 of a kaldār.	
5	Farrukhābādī or Gurāridār.	12 māshas,	15/16 of a kaldār.	
6	Nāgpurī ...	10 māshas, 7 rattis.	13/16 of a kaldār.	
7	Wāstri ...	10 māshas, 9 rattis.	11 1/16 of a kaldār.	

No.	Name of coin used locally.	Weight in māshas.	Average ex- change value in British coins.	REMARKS.
Silver coins.—(Concluded).				
8	Singauri ...	10 māshas, 9 rattis.	Less in va- lue than the Nāgauri.	Though never strictly legal tender it passed in circulation along with the Nāgauri with which it was a contemporary bearing <i>san</i> 1203.
9	Pathān Shā- hi.	11½ māshas,	10/16 of a Laldār.	Mentioned as current in old accounts and records but no coins are now to be met with.
10	Gachidāri ...	Cannot be ascertained.		
11	Gauhar Shāhi,	11 māshas,	9/16 of a Laldār.	
12	Farrukhābādī Round (plain).	12 māshas,	Inscriptions in Persian— 1. On one side:—"Fazl Shāh Alam Hād-hād Amī-i- Din Haft Ki-hwar Hād-hād." 2. On the other side:—"Mīrmanat Mayna Julus <i>san</i> 45 Farrukhābādī;" not in ex- tensive circulation.
13	Top Shāhi ...	10 māshas, 7 rattis.	Mark of top (gun) and <i>san</i> 1205.
14	Shāh Jahānī	11 māshas, 1 ratti.	In circulation as an equival- ent to the Kāshī Shāhi Sikka.
15	Muhammād Shāhi.	10 māshas, 7 rattis.	Inscriptions:—1. On one side:—"Bādshāh Ghāzi-ud Din Muhammad Shāh Jahān Fāhīb Kirān Nāmī Shāh Zurb Illahābād." 2. On the other side:—"The Kalma and 222 Hijri." Equivalent to the Kāshī Shāhi Sikka.
16	Albāri ...	11 māshas ...	12/16 of a Laldār.	
Copper coins:—				
1	Mādhu Shāhi,	16 māshas ...	36/19 or 3/4 of the Brit- ish paisa.	Coined by Mādhu Shāh of Patna.
2	Dālā Shāhi...	ditto.	Formerly in circulation, par- ticulars not known.
3	Lkaidār ...	Not known,	In circulation till the time of Mahārājī Jai Singh.
4	Baggha Shāhi,	ditto.	11 gandas or 5½ pieces for Re. 1½. Laldār.	Coined in Rewah town dur- ing Mahārājī Vīeranāth Singh's time, 1838, A. D.

Section IV.—Land Revenue.

(TABLE XX.)

In early days the land was made over to farmers who held large Early days.
tracts, often whole districts. They paid a fixed sum into the State
Treasury and made what they could out of the cultivators, being left
to all intents and purposes entirely to their own devices.

Revenue was collected mainly in kind in the system known as
bhūj or share, in which a fraction, which varied with the locality was

taken. In Huzūr, Teonthar, Raghurājnagar and Mauganj *tahsils* the rates of *bhāg* given below obtained in *kothār* lands, before the substitution of cash payments and still obtains in many estates held by *jāgirdārs*.

Cultivators enjoying special privileges or Brāhmins, Kshatriyas and Kāyasthas paid in kind at the rate of *one-seventh* of the produce for lands in which the cultivators held no proprietary right and *one-eighth* (or *one-tenth* in special cases) for lands in which they held proprietary rights such as *bāndh* lands, etc. Cultivators enjoying no special privileges such as Kāchhīs, Kunbis, etc., paid *one-sixth*, for lands in which they held no proprietary right, and *one-seventh* for land in which they held proprietary rights.

One-tenth was taken for waste or *bagār* lands. In addition to the *bhāghai* or *bhāg* paying land there was generally some land on which revenue was paid in cash; this was called *karta*. It is levied still in *jāgirs* but only on highly improved land known as *kher* or *ālā* or land that was formerly occupied by a village and was afterwards converted into fields.

In the Raghurājnagar *tahsil* the low caste cultivators used to pay *one-fifth* of the local produce on very rich lands which were expected to return a very heavy crop.

In certain cases the cultivators received an allowance for agricultural expenses but in that case the fraction of the *bhāg* was higher.

The general rule in *bhāg* payment was (and still is) that *one-fourth* of the total produce is allowed to the cultivator for his expenses, *one-fourth* or *one-fifth* as the case may be, being levied on the remainder as *bhāg*.

In the Bardī, Rāmnnagar, and Sohāgpur *tahsils* the *bhāg* rates range from *one-ninth* to *one-twelfth* of the total produce. In the southern portions of Rāmnnagar and in the whole of the hilly portions of Bardī and Sohāgpur the cultivators are allowed to till as much hilly or waste land as they can with one plough on payment of one rupee revenue. In such places the cultivators can often cover twenty *bighas* with one plough, but as the soil is poor and they are not skillful agriculturists, the yield is extremely small.

Present day.

The revenue is now entirely replaced by cash payments in the *kothār*, (*khāleā*) land, but Thākurs and *zamindārs* still adhere to a certain extent to the old practice of levying revenue in kind, though there is a growing tendency even in these cases to replace it by cash payments.

The seven *tahsils* already given form the revenue units of the State. All revenue work in the *tahsils* is controlled by the Revenue Commissioner under the guidance of the Chief himself.

Settlement.

Only one settlement has as yet been made, that of 1881-95 which is now under revision. During the settlement the rule followed in making the assessments was to find out what the cultivator had ordinarily paid either in cash or *bhāg*. The average produce of the field was estimated and an equivalent in cash fixed as revenue. In making the assessments the anxiety to make an equitable conversion of the produce payments into cash which would secure

a full recognition of the Darbār's rights, but should not be a burden upon the people, led to the land not being fully assessed. So far as can be ascertained before the settlement two-fifths of the gross produce were usually paid in kind. Settlement operations are now in progress for a revision of the settlement. Two systems are being followed. In the four Northern and more fertile *tahsils* of Huzūr, Teonthar, Raghurāj-nagar and Mangauj the land is being measured and each cultivator given a lease (*patta*) for the land in his possession. In the Southern *tahsils* the land has not been measured, and no leases have been granted, but the contractor pays fixed revenue to the Darbār, assessed on the village at the time of the settlement. In the first instance rates are determined on the crop bearing power of the soil, existence of *bāndhs* and the position of the fields as regards facility for export or sale of produce.

Improvement of the land is mainly effected by the construction of *bāndhs* and the periodical change of village sites called *khore-salaa*. Cultivators who construct *bāndhs* with the Darbār's permission are permanently assessed in the ratio of 55 to 45, the Darbār receiving 55 per cent. of the gross revenue. At the same time proprietary rights are conferred and the holder is able to transfer and alienate such land.

The revenue demand is about 11 lakhs giving an incidence per acre cultivated of 10 annas 3 pies and per acre of total area of 2 annas 2 pies. The incidence of the total revenue paid to the Darbār and Thākura is 6 annas 1 pie per acre and per head of population.

The incidence varies in the different *tahsils*. It is highest in the Teonthar *tahsil* where it rises to Rs. 1-5-8 per acre of cultivated land and is lowest in Sohāzpur where it is only 2 annas 3 pies. The net profits of a cultivator from an average holding of 12 acres are about Rs. 16 a year, which only suffice for his maintenance to the end of the year and leave no surplus as provision against a time of distress or famine. This is not due to heavy taxation but partly to the exhaustion of the productive power of soil due to want of enterprise replenishing it by the use of manure and other artificial means.

The average rates now paid in cash are for *mair* land per *bigha* Rs. 1-4-0; for *domat* annas 12 per *bigha*; for *sigon* annas 8 and for *bhātā* annas 3.

Certain grants of grain are allowed in repayment of professional services.

Kharkhā, as it is termed, is given to the *kāyasth*¹ or village accountant at the rate of 2 seers of grain per maund levied as *bhāg*, in addition to a *seer* called *neg* levied at 7½ seers on every *khandi* (1½ maunds) of which the *kāyasth* receives two-thirds and the *kotwār* or village watchman one-third. The *kotwār* also receives *kharkhā* at 3 seers of grain per plough in the village.

The cess called *agora* was paid to the *kotwār* in cases in which he was obliged to keep watch over the threshing floor of cultivators who would not pay their revenue and who, it was feared, would dispose of his grain.

Demand,
and
Incidence

Rates.

Cesses.

1. There are no *kāyasths* or *patedārs* in Lohār villages in Southern *tahsils*. In the Northern *tahsils* *patwārs* are paid in cash so they receive no *kharkhā*.

It was levied at the rate of 4 seers of *kharij* and 2 of *rabi* grain for each day he was required to keep watch.

Village artisans also receive *kharkh* and *agora* at 30 seers per plough and *Chamārs* at 4 seers.

Jenta or *pura* is a grant of one sheaf per day to each labourer, about 1½ seers of grain.

Collection.

All revenue is collected through *thekādārs* or farmers. These men can only collect the revenue specified in the lease receiving a commission at the rate of 10 per cent. on sums not exceeding Rs. 500, at 8 per cent. on sums between Rs. 500 and Rs. 1,000, at 7 per cent. on sums between Rs. 1,000 and Rs. 2,000, at 6 per cent. between Rs. 2,000 and Rs. 3,000; for sums over Rs. 5,000, 5 per cent. is allowed.

Thekādārs have the right to eject defaulting tenants and make arrangement for the cultivation of their land during the continuance of the settlement.

The revenue is paid in two instalments, the *Aghanī* or the *kharij kist*, paid between 15th December and 15th January, and the *Daitākhī* or *rabi kist* between the 15th May and 15th June.

The cost of collection is about 1·3 lakh.

Tenures.

The territories of the State are partly held by the *Darbār* direct and are then known as *kothār* lands and partly by *Thākurs* and *zamindārs* under various forms of tenure classed generally as *puraṇya* land. In *kothār* land cultivators hold their land under the regular settlement of 1881-95, in which leases were given in the Northern *talukās* for 10 years or till the next settlement; they have only cultivating rights so long as they pay the revenue demand, and no proprietary rights. Cultivators who improve land by constructing irrigation works, however, are now allowed to enjoy proprietary rights and are permanently assessed in the proportion of 55 to 45 per cent., *Darbār* receiving 55 and cultivator 45 per cent. of the gross revenue.

Kothār land amounts to 40 per cent. of the total area, 60 per cent. being the *puraṇya* or alienated.

The important tenures in *puraṇya* land are given below :—

Māṇḍī (literally "transaction").—*Māṇḍī* is in the nature of a partition for support made by the head of a house, rather than a grant for maintenance such as *nānīār* for instance. It is given to the younger members of their ruling family, and also to *Thākurs* whose estates have been resumed by the *Darbār*. The grant may be hereditary and carries with it a liability to pay tribute, which is amenable to enhancement on the recognition of a new successor. All *Māṇḍīdārs* have full revenue rights, excepting the rights of sale or transfer. Theoretically, the tribute paid is one-fourth of the gross revenue of the estate, but in practice is much less.

Paipīkār (literally "washing the feet").—It is a form of religious grant made only to *Brāhmins*. The grantees enjoy all rights in the soil subject to the payment of *chāṭī* (1/4 of the revenue) to the *Darbār* from the fourth generation of the grantee.

Jāgīrs.—These are ordinarily understood to mean grants of land in return for personal service. They are not confined to any special

class. The grants are temporary and discretionary, and the grantees have no right of alienation or transfer *vitta* (from Sanskrit *vritti*, a means of livelihood):—Revenue-free land grants corresponding closely to *paipikhār*. The holders have, excluding the liability to *chauth*, practically the same rights, but whereas *paipakhār* grants are made only to Brahmins, *vitta* grants are made to all classes.

Murcāra.—*Murcār* or death grants are revenue-free grants made to persons whose relations are killed fighting for the State. These grants are hereditary and transferable, subject in certain cases to rendering military service.

Dewārth.—These are "religious grants" made either for the support of the temples or to provide a dole for indigent person. They are not transferable.

Nānlār, literally "bread."—Maintenance grants made chiefly to Thākurs whose estates have been resumed by the Darbār. They are heritable but not transferable.

Bhāip (bhāi).—Friendly grants of much the same nature as *vitta*, carrying similar rights. Theoretically, they are given as a mark of friendship and were to last as long as the friendship survived.

Section V.—Miscellaneous Revenue.

(TABLE XXI.)

The chief sources of miscellaneous revenue are Excise, Customs or Permit, and Stamps.

Excise.

No special department deals with this, the Customs offices controlling the liquor and drug trade. It brings in a revenue of about Rs. 60,000 a year.

The amount of poppy grown is not large and the produce is insufficient for local consumption about 18 maunds being purchased yearly at Indore and imported.

Opium.

The cultivation is controlled by the Darbār, only selected cultivators in the Teonthar, Solāspur, Barūt and Manganj *tahsils* being allowed to grow it. Most of the cultivators are in Teonthar. An attempt is being made to increase cultivation to meet the local demand. The acreage, produce and revenue since 1895 is given below:—

Year.	Acreage.	Produce in maunds.		Revenue.
		Mds.	Srs.	
1895-96	160	25	4	6,735
1896-97	166	86	4	7,432
1897-98	103	12	8	9,700
1898-99	120	16	33	5,763
1899-00	166	25	0	6,136
1900-01	166	16	10	9,538
1901-02	166	20	3	18,679
1902-03	168	18	1	8,160
1903-01	160	14	38	8,212
1901-05	162	25	8	8,311
1905-06	140	21	37	11,131
1906-07	191	22	0	5,969

No special rate is levied on land growing poppy. An acre gives about 10 lbs. of crude opium.

All crude opium produced is made over to the Inspector of Permit, who sends it to Rewah where the Darbār manufactures it into cakes. These are then sold to the State contractor at Rs. 18 a seer and he is allowed to retail them at Rs. 25 a seer. No other traffic is permitted. The contractor gives security before taking up the contract. He is the only person licensed to sell in the State.

Hemp drugs.

No hemp is cultivated in the State. A contractor is licensed to import by the Darbār. No duty is charged on these drugs. They are sold, *bhāng* at Rs. 1-14-0, *Bāluchar gānja* at Rs. 40, Sanāwad *gānja* at Rs. 78, and *charas* at Rs. 25 per seer. The import since 1896 has been as below in maunds :—

Year.	Gānja.	Bhāng.	Charas.
1896 to 1900	8 to 4	80	7
1900	4	50	7-20
1901	5	50	9-12
1902	5	100	7-20
1903	6	50	7-20
1904	26	100	Nil.
1905	23	Nil.	30
1906	83	100	22

About 30 maunds of Sanāwad *gānja* are also imported, which is used mainly in Sohāgpur, as the people there do not use *Bāluchar gānja*.

Liquor.

The liquor drunk is distilled from *mahuā* (*Dassia latifolia*) flowers and gur.

A contract for the sale is given for a term of years to a contractor who has sole right to manufacture and vend. He pays a security of Rs. 20,000. The revenue ordinarily derived from this source is Rs. 45,000.

No wholesale shops have been established, but there are 1,151 retail shops giving one to every 1,153 persons and every 11 square miles.

The liquor is of six strengths and is sold at from 6 pies to one rupee a bottle.

The contractor may sell to any person for consumption but not for export, and not more than one bottle at a time except on occasion of marriages, etc., when a special permit is granted by the Excise Inspector.

Customs.

The Customs or Permit Department is managed by the Superintendent assisted by three Deputies and Inspectors. Duties are levied on imports and exports at varying rates according to a schedule, the receipts amounting to about 3 lakhs a year.

Stamps.

The income from stamp is included in judicial receipts.

Section VI.—Public Works.

The State Public Works Department is divided into two Sub-Divisions, each Sub-Division being under a native Engineer. The Sub-Divisional Officers who have their headquarters at Rewah and Satna, are directly under the orders of the Secretary to His Highness. Each Sub-Division is divided into sections under Sub-Overseers, who receive instructions from the Sub-Divisional Officer. A yearly budget is prepared by the Sub-Divisional Officer and submitted for sanction.

Regular estimates and plans are submitted in the case of all important works. These estimates are forwarded through the Accountant of the State who checks the estimate with the schedule of rates before he forwards the papers to the Secretary to His Highness with such remarks as he thinks necessary.

The cost of the Public Works is a considerable item of expenditure. The State maintains 432½ miles of roads including 141½ metalled, a greater length of road than any other State in Central India, Gwalior and Indore excepted.

The expenditure on Public Works in the three years under the several heads is given in the following statement :—

Year.	CIVIL BUILDINGS.		COMMUNICATIONS.		Palaces, improvement to city and miscellaneous works.	Military buildings.	Salaries.	Total.	Remarks.
	Original.	Repairs.	Original.	Repairs.					
1902-03 ^(a)	55,600	24,700	1,000	37,000	41,700	7,300	12,000	1,79,300	(a) In this year the excess expenditure on miscellaneous is due to the visit of H.E. the Viceroy.
1903-04	43,700	29,800	Nil.	36,600	1,02,500	3,300	12,700	2,21,800	
1904-05	1 lakh	28,000	Nil.	35,000	4,600	Nil.	14,500	1,82,100	
1905-06	1-20 "	23,000	2,200	46,000	50,000	19,500	13,300	2,74,000	
1906-07	1-09 "	25,000	4,100	9,400	78,600	46,000	31,900	3,03,000	

During the eight years previous to the above-mentioned years the average annual expenditure on Public Works was 2 lakhs of which about Rs. 12,600 were spent annually on feeder roads to railway stations on the Bengal-Nagpur and East Indian Railways. The average annual outlay on the construction of *bāndhs*, tanks and irrigation works is Rs. 11,700. This country not being suitable for irrigation by canals and wells on a large scale, no attempt has been made to construct such works, but the erection of *bāndhs* is encouraged as much as possible. Within the last 10 years the most important and useful works constructed by the State are these railway feeder roads and *bāndhs*. A narrow gauge railway from Satna railway station on the East Indian Railway to Rowah town was commenced in 1897, but

has not been completed. The *Sadr* police station at Rewah with a clock-tower, was constructed at an outlay of Rs. 28,000.

The establishment of an electric installation at the falls of the Tons is under contemplation and professional experts have been consulted regarding the scheme.

Section VII.—Army.

(TABLE XXV.)

Army.

In early days the army absorbed more than half the State income in spite of contributions of men and horses made by feudatory Thākurs. The actual strength at present is 3,221 including regulars and irregulars and 57 guns.

The regulars include—

Cavalry 574.

Infantry 1,140.

Artillery 94 with 18 serviceable guns.

The cavalry are fairly well mounted and carry lances, the infantry an obsolete musket. The regulars are fairly well drilled and could, if efficiently armed and better instructed, make an effective force. His Highness takes a keen interest in military matters and has weeded out a large number of feeble old men who were encumbering the ranks.

The irregulars comprise the *Elka-sardārs* and their retainers, who are relics of the army of early days. They are not given any real training.

The Mahārāja is his own Commander-in-Chief, being assisted by a Military Secretary.

The cost of the army amounts to about 4.5 lakhs a year.

Section VIII.—Police and Jail.

(TABLES XXIV AND XXVI.)

Police.

In former days all policing was done by the village *chaukidārs*.

They belonged to the *kotwār* tribe and were granted small pieces of land in remuneration for their services. They also received *kharāṭ* and *pūra* dues from cultivators in the village. -

Regular Police.

In course of time a regular police force began to be evolved, though it was long before the officials of the new department could realize the exact nature of their duties. In addition to this, the establishment of a *thāna* in the lands of a subordinate Thākur meant a formal assertion of the Darbār's authority, and was invariably looked upon with distrust and resentment. For a long time no definite system of training existed. Any man who could read and write was deemed efficient to discharge the duties of a *thānādār*, *muharrir* or *jamādār*, while able-bodied illiterate men of the Kshatriya, Mussalmān, or Brāhman castes were appointed as constables.

Since 1888, however, *thānādārs*, *muharrirs* and *jamādārs* have been required to pass a simple examination, while constables have to satisfy certain conditions of physical fitness before they are eligible for appointment.

The total strength of the regular police is 701 of whom 196, who are posted to the *thānas* of Rewah and Satna towns, are regularly

drilled. The Rewah and Satna town police are also dressed in uniform and are armed with muskets.

The strength of the force gives one regular policeman to every 19 square miles and 1,785 persons.

The total number of village *chaukidars* receiving cash salaries from the State in the four Northern *tahsils* is 294, while the total number of them in all the *tahsils* including those of the subordinate *zamindars* is about 2,150. Most of these men receive land grants *kharkā* and *pūra* dues.

Village
Police.

Though arms are not provided by the Darbār except to the Rewah and Satna town police, most of the district police have arms of their own.

The village *kotwars* are bound to give information of the occurrence of any offence within their villages to the *thāna* or *chauki* of the circle within which the village lies, but owing to the imperfect organisation this is not as regularly done as it should be.

Village
Kotwars.

A man instructed in the classification and registration of finger prints is attached to the Jail at Rewah and takes finger impression of all prisoners according to the rules issued from the Central Bureau at Indore. The cost of the police is about Rs. 36,000 a year.

Finger
impression.

Only one jail exists at Rewah town, which is capable of accommodating 300 prisoners. Industries are carried on, an ice machine and cloth weaving looms having been recently introduced.

Jails.

Section IX.—Education.

(TABLE XXIII.)

The Chiefs of Rewah have always been great supporters of literature; while several have been good scholars in Sanskrit and Hindi, and they extended their patronage to persons noted for their learning giving them grants of land to induce them to settle in the State.

General.

The large grants of land made as *paipakhār*, *punyārth* shews extent of the patronage held out to Sanskrit and Hindi scholars. Mahārāja Visvanāth Singh, himself a good scholar, was a great patron of Sanskrit learning and invited Brāhmins to settle in different parts of the State and form seminaries for teaching Sanskrit. Mahārāja Raghurāj Singh not only followed in the footsteps of his father, but gave encouragement chiefly to Hindi. His own works in Hindi poetry created a taste for the culture of Hindi literature and a circle of Hindi poets sprang up in Rewah, some of whose works are of considerable merit.

The first public school was started in Rewah town by Sir Dinkar Rao, the famous minister of Gwalior, in 1869 with seven teachers, four of whom were to teach English. The people, however, were still too backward to understand the advantages thus offered them, while the old habit of regarding the courts of the Chief and Thākurs as the only proper centre of learning militated against its success. Under the efforts of Colonel P. W. Bannerman, however, in 1876 and of Colonel D. W. K. Barr in 1881, the educational movement made a fresh start. In 1886 a Rāj Kumār class was opened for the

education of the sons of *sardārs*. Ten village schools had been opened in 1882, and in 1887 the Satna school teaching English, Hindi and Persian was raised to the status of a high school.

Control.

In 1886 the village schools were placed under an Inspector while Girls' Schools were opened in 1888 in Rewah town. Colonel D. Robertson added a technical class to the Rewah High School for the training of *patwāris*, and revenue and police officers.

The gradual increase of work led to the creation of the Director of State education in 1893. But later on the classes fell off and the post was abolished in 1895.

There were in 1900-01, 42 schools of all kinds. The two schools at Rewah and at Satna are High Schools, 8 are Secondary Vernacular Schools, 26 Primary Schools, 4 Girls' Schools, and 2 Sanskrit Grant-in-aid Schools.

University Examination.—The High School of Rewah was first affiliated to the Calcutta University in 1881, and that at Satna in 1887. Under Lord Curzon's new scheme they now both send up students to the Allahābād University Examination.

Primary Education.—Of 34 village schools, 8 send up students for the Vernacular Middle (now called Vernacular Final) Examination of the United Provinces and 26 are Primary Schools teaching Hindi, reading and writing, and arithmetic up to the Upper Primary Standard. The total number of boys reading in schools was 2,406 (for 1903), and taking one-sixth of the male population to be of school-going age the percentage of those under instruction comes to 2·1.

Girls' School.

There are four Girls' Schools in Rewah town. The following are the figures of attendance :—

Year.	Roll.	Attendance.
1901	135	86
1902	136	93
1903	144	102
1904	204	138
1905	178	122
1906	156	102
1907	160	110

The subjects taught are reading, writing and simple arithmetic up to Lower Primary Standard, needle-work and sewing.

Sanskrit Education.—The Sanskrit department of the Rewah town High School was originally started on the modern system of teaching and began to send up boys for the Panjab University High Proficiency and Shāstri Examination in 1886. But the people preferred the old custom of sending their boys to the houses of their *gurus*, their hereditary teachers, and two Grant-in-aid Schools were, therefore, established in Rewah town to support this branch of teaching.

Muhammadian Education.—The Musalmāns form a very small section of the population. The number of Muhammadan students at Rewah is about 40 and at Satna 35. Two have passed the University Entrance Examination from Rewah High School.

The average annual cost of each pupil is about Rs. 21 in the Rewah High School, and Rs. 11·2 taking the whole of pupils in all the schools. The cost of the High Schools at Rewah and Satna is about Rs. 13,600 and that of the village schools Rs. 11,000. The total cost of education is about Rs. 27,000. All educational expenditure is paid from State revenues, no fees being taken.

A printing press is maintained at Rewah where State work is carried out. Two State Libraries have also been opened, one of English books and the other of Vernacular and Sanskrit manuscripts.

Section X.—Medical.

(TABLE XXVII.)

The State possesses 17 hospitals and dispensaries. All are in charge of Hospital Assistants except that at Ūmaria Colliery which is under an Assistant Surgeon and at Wairhan, where a compounder is in charge.

The number of cases treated in 1903 was 119,699 and in 1904-05, 120,348 or 9 and 9·5 per cent. on the population. The numbers vaccinated in 1904-05 were 44,800 as compared to 37,731 in the preceding year. The total cost of the department is Rs. 49,000, including 6,000 on vaccination. The Agency Surgeon is chief medical officer of the State.

Section XI.—Surveys.

The State as a whole has never been surveyed. What is known as the *Mukammil*, or Regular Settlement, was made in the four Northern *tahsils* of Raghurājjuagar, Huzūr, Teonthar and Manganj in 1881, but even here big estates such as Rāmpur, Chorhāt, Naiāgarhi and Gangewa were not surveyed. The Imperial trigonometrical survey was carried out in Rewah in 1862.

CHAPTER IV.

ADMINISTRATIVE DIVISIONS AND GAZETTEER.

(TABLES I-IV, VIII-X, XVIII-XX, XXVII-XXIX AND XXXI.)

Huzūr Tahsīl :—This *tahsīl* is situated between 24° 12' and 24° 52' N., 81° 18' and 81° 52' E., surrounding the chief town. It has an area of 1,201 square miles.

The Huzūr *tahsīl* is so called from its having long formed the chief portion of the State territories and the presence within it of the capital.

It is bounded on the north by the *tahsīl* of Teonthar, on the west by the *tahsīl* of Raghurājnagar, on the south by the *tahsīl* of Rāmnagar, and on the east by the *tahsīls* of Bardi and Mauganj. The greater part of the *tahsīl* lies in the alluvial plain, north of the Kaimur range, a small section to the south of that range lying in the hilly tract, chiefly in the Thakurāts of Chorhāt and Rampur.

With the exception of the Kaimur hills that skirt the southern portion of the *tahsīl* there are no other hills. The important streams in the *tahsīl* are the Son and Banās rivers, which flow for a few miles through its southern portion; the Bihar rising in the Māihar State, and passing through Raghurājnagar to join the Bichhia at Rewah town; and the Bichhia which rises near the village of Khairā and after flowing for 18 miles joins the Bihar at Rewah town. The combined waters of Bihar and Bichhia under the common name of the Ghoghar then take a northerly course till they join the Tons river. The river Bihar forms the well-known waterfall of Chachai, some 20 miles north of Rewah town.

There are several lakes of importance in the *tahsīl*. At Govindgarh a large lake is situated which is being still further enlarged and on which summer residence of the Mahārāja stands. This tank was originally constructed by Mahārāja Raghurāj Singh in 1855 and has been already considerably extended by the present Mahārāja. The tank not only adds to the picturesqueness of the spot but is also useful for the purpose of irrigation.

The Rūpsāgar tank at Makundpur is a very old tank, and said to have been constructed by a Hindu Queen named Rupāvati, when on a pilgrimage.

The Rānī talāo at Rewah town is also an old tank said to have been constructed by a Rānī of the Rewah family. On its bank is enshrined the image of Kālīka Devi in a small temple of no great age.

The tank of Malakpur situated near the village of Mangavān is also old and probably contemporary with the Makundpur tank. It is said to have been constructed by Rānī Malkāvati, sister of Rānī Rupāvati.

The tank at the village of Sirmur was constructed by the grandmother of the present Mahārāja.

The total number of masonry wells in the *tahsīl* is 2,156, that of *kachcha* wells 5,859, and of *bāoris* 21. These figures do not include the wells and *bāoris* in the Rewah town.

With the exception of the large number of *kachcha* wells used by vegetable growers, the wells and tanks are used solely for drinking and bathing purposes, and are never utilised for irrigating crops.

The *bāoris* almost everywhere are in a neglected condition and as a source of water supply have no value whatever. They lie chiefly in groves of mango trees far away from habitations and beyond commemorating the name of the constructor and affording a pleasant shelter to the traveller and wandering *sādhus* are of no real value.

The *tahsīl* forests on the Kaimur hills contain much big game including tiger.

The average rainfall in this *tahsīl* is 45 inches.

This district belonged originally to the Bhars, who played such an important part in the history of Bundelkhand and Baghelkhand in the 12th and 13th centuries. The places of interest in this *tahsīl* are Ohandrehi where there is a very fine temple, Makundpur where there are many remains, and where the Emperor Akbar Shāh II is said to have been born, Gurgi-Masaun one of the sites proposed for the ancient city of Kausāmbi, Baijnāth where there are some interesting remains, Govindgarh with its large lake, palace and *shikār* preserves in the vicinity and Rewah town.

Population was in 1881, 402,499; 1891, 328,932; 1901, 316,139 persons; males 156,616, females 159,523. Density 263 persons per square mile. Two towns Rewah and Govindgarh and 975 villages are situated in the *tahsīl* with 63,333 occupied houses. Hindus numbered 265,109 or 84 per cent., Sikhs 23, Jains 93, Musalmāns 11,458 or 3 per cent., Christians 14, Animists amounting to 39,442 or 12 per cent.

The soil is, for the most part, fertile and cultivation general.

Of the total area about 717,000 *bighas* (480,000 acres) or 62 per cent. are cultivated. The prevailing crops are *kodan* and *jowār* 278,000 *bighas*, rice 135,000 *bighās*, wheat 127,000 *bighas*, gram 86,000, barley 60,000 and *masūr* 55,000.

The internal trade of this *tahsīl* may be roughly estimated from the amount realised from the *bayāi* (*bai*) or weighing tax which is leased out to contractors for Rs. 10,000 yearly; and which corresponds to 6·7 lakhs worth in imports and exports.

The *tahsīl* is traversed by the Great Deccan road with a branch to Allahābād, Bela-Govindgarh, Rewah-Govindgarh and the Satna-Rewah road, as well as Rewah-Baikunthpur and Govindgarh-Rāmnagar fair weather roads. Imperial Post Offices have been opened at Rewah and Govindgarh, and a Telegraph Office at Rewah.

The *tahsīl* is in charge of a *tahsildār* who is a Deputy Magistrate and the Revenue Collector of his charge. His headquarters are at Rewah.

The total revenue of this *tahsīl* is 9 lakhs including tribute from subordinate holdings, the land revenue and cesses amount to about 2·86 lakhs.

Teonthar Tahsīl :—This *tahsīl* which is one of the four districts lying north of the Kaimur range occupies the northern-most portion of the State. From a revenue point of view it is the most important of all the *tahsīls*. It is situated between 24° 47' and 25° 12' N., and 81° 15' and 82° 1' E., with an area of 816 square miles.

This *tahsīl* is divided into two sections by the eastern extension of the Pannā range locally known as the Vinjh pahār two-thirds of the district in the fertile plain below the range.

It is bounded on the north by the Allahābād District, on the south by portions of Rewah, on the east by the Allahābād District and the Mauganj *tahsīl* of Rewah and on the west by Pannā State and the Banda District. The soil is of more than average fertility and a certain amount of poppy is grown for opium.

The Vinjh pahār traverses the north of the *tahsīl* where it forms the edge of the Rewah plateau.

The Tons river and some tributary streams leave the high level plateau in a series of magnificent cascades at Piāwan, Purwa, Chachai, Kevati and Biloni on the southern border.

The former rulers of Teonthar were the Venuvanshīs whose ancient kingdom lay round Allahābād with their capital at Jhūnsi. The following legend about Teonthar passes current among the people. It is related that in olden times during the reign of Ganapati Singh, a Venuvanshī Rājā, there lived a butcher at Jhūnsi. His wife, a very beautiful woman, once laughed at seeing a kite drop a piece of flesh which it was carrying away in its claws. Her husband, who was sitting beside her, asked her the cause of her merriment. The wife related that it was nothing in particular. But on her husband's making persistent enquiries she said that she would reveal the cause in presence of the Rājā. Accordingly they both went to the Rājā and the butcher told him why they had gone to him. On the Rājā's enquiry the butcher's wife said that were she to reveal the cause it would cost her her life. But the Rājā was obdurate and she proceeded. "In my former existence I was myself a kite and on one occasion flew away with the arm of Bhūrishrava (a warrior of the Mahābhārat) on which the well-known amulet (Bijāyath) was tied. In my flight I found no tree on which to rest till I came to the *bar* tree at the well opposite to your fort. Here I alighted, but the branch on which I perched gave way under the heavy weight of the arm, and it fell into the well. What made me laugh at this kite was that it could not bear a small piece of flesh, while I had been able to fly so far with a gigantic arm, so heavy that the branch of a tree broke under its weight."

No sooner had the butcher's wife finished her story than she died.

The Rājā searched the well and an amulet and a lamp were found. At that spot there lived a *ṣakīr*, Shaikh Taki by name, who took the lamp from the king. In the evening when the *ṣakīr* lighted the lamp two beings appeared and with folded hands asked him what he desired of them. The *ṣakīr* told them to bring him the princess of Delhi in her bed. Accordingly they did so. This was regularly done for a long time, the princess being brought every night and sent home in the morning. The Mahārāja of Delhi observing that his daughter was

and asked her what ailed her. She related the whole story to him. He then asked her to describe the place, but this she was unable to do, but said she would mark its position during the next visit. The Mahārāja on discovering the place attacked the Venuvanshi Rājā with an overwhelming force. The *sukār* was killed and a general massacre ensued in the town and the Rājā taken prisoner. The Mahārāja then marched towards the south and came to the spot where the modern village of Teonthar stands. Finding that the Rājā was innocent he released him and gave him this place to settle in saying that it was very similar to that he had lost. Hence the place was named Teonthar, meaning a similar place (*teon*, "just like" and *thar* (Sanskrit *sthal*), "place").

There is a Hindī couplet relating to the above story about the origin of the name of Teonthar.—

Jhūnsi hai shatkul par Ganpati Nrip ko dhām,

Mahārājā bakshat bhayo Teonthar garh ko nām.

"King Ganpati's place at Jhūnsi is bounded by six bends (in the river bank). The Mahārājā (of Delhi) named his fort Teonthar."

During the early settlement of the Baghels this *tahsīl* was still held by the Venuvanshis and the Bhars. Gradually the whole of it fell to the Kacautā branch of the Baghels. This *tahsīl* was formerly known as the *Ilāku of Jiraonha*.

Sitlāha was the headquarters of the *tahsīl* until 1886 when Teonthar was made the headquarters.

This *tahsīl*, like the Huzūr and Raghurājnagar *tahsīls*, contains the ruins of many old settlements. The forts of Teonthar and Sitlāha are still in fair condition and are used by the Darbār officials as the places of residence.

The population was in 1881, 138,706; 1891, 139,697; 1901, 105,154; males 52,627, females 52,527. Density 129 persons to the square mile. By religions there were 87,850 Hindus, 2,070 Musalmāns, 15,234 Animists. The *tahsīl* contained 505 villages, with 21,922 occupied houses.

The soil is, comparatively speaking, more productive than that of any other *tahsīl*.

The total area cultivated amounts to 434,000 *bighas* (224,000 acres). The predominating crops are rice 113,000 *bighas*, jowār 54,000 *bighas*, gram 65,000 *bighas*, wheat 29,000 *bighas*, linseed 22,000 *bighas* and poppy 240 *bighas* (124 acres).

The following villages are noted for cultivating poppy:—Chaur, Shivapur, Bhakarwar, Khatia-Machia, Sobāgt and Rāipur.

In point of commerce and trade this *tahsīl* is in no way inferior to the Raghurājnagar and Huzūr *tahsīls*.

The chief centres of export and import are Bargarh and Shankargarh, both on the East Indian Railway. The export trade in building stone is gradually growing in importance.

The Jabalpur-Allahābād Section of the East Indian Railway passes through the extreme north-western corner of the *tahsīl* with a station at Dabhaura, while the Shankargarh and Bargarh stations situated just over the border in British India, are of great use for the export of commercial products.

The Mangawān-Allahābād road, branching off from the Great Deccan road at Mangawān, 20 miles east of the Rewah town, runs through the district for 22 miles serving the villages of Garh, Deoganj, Sohāgi and Chāk. Post offices have been opened at Dabhaura and Sitlāha. There are also several fair weather unmetalled roads.

The *tahsildār* in charge is a Deputy Magistrate. He resides at Teonthar.

The gross revenue of this *tahsīl* is 4·4 lakhs, of which *kothār* lands produce 2·6 lakhs and alienated land 1·9 lakh; the land revenue and cesses amount to 3 lakhs.

Out of the total area of 816 square miles 211·5 square miles belong to alienated holdings. The biggest *ilākadārs* are the Thākur of Chāmu and the Thākur of Lālgaon.

- **Raghurājnagar (Satna) Tahsīl:**—The Raghurājnagar *tahsīl* is the western frontier district of the State lying between Lat. 24° 11' and 24° 57' N., Long. 80° 48' and 81° 22' E., with an area of 977 square miles. It is bounded on the north by a portion of the Pannā State and the Teonthar *tahsīl*, on the west by the States of Nāgod, Maihar and Sohāwal and on the east and south by portions of Rewah. It lies wholly on the alluvial plateau north of the Kaimur range and is watered by the Tons and its tributaries.

The present name of the *tahsīl* dates only from 1896 when the headquarters were removed from Mādhogarh to Satna or Raghurājnagar, the latter being the name chosen by the late Maharāja Raghurāj Singh, in whose time the town of Satna came into existence. Portions of this *tahsīl* have always been included in the estates of the ruling Chief's brothers, and other relations, and as the holders of such estates have always lived with the ruler in bringing them up to the same standard as the *kothār* districts, this *tahsīl* is far in advance of any other.

The *tahsīl* comprises the four estates of Amarpātan, Mādhogarh, Somaria and Kotār held by descendants of younger brothers of previous Maharājas.

The only hilly and jungle clad portions in this *tahsīl* lie in the north and north-west and are formed by the Vinjh pahār. The most important hills locally known are Sraman-dongri or Majhokar, which is composed of two hills standing side by side. Below them lies a small tank with a *chhatrī* on its bank said to be that of a *yogi* named Sraman Bāba who lived and died here. An annual fair is held at this spot during the *Makar sankrānt*, which is visited by people from long distances and lasts for a week.

The Kaimari hill in the Kotār estate is well wooded and also contains a quarry of chalk and lime-stone; at Rakhunda hill there is also a chalk quarry.

Almost all the rivers in this *tahsīl* flow towards the north. The Tons is the principal river. The Satna, a perennial stream flowing through the Pannā and Ajaigarh States and forming the boundary between the Nāgod State and this *tahsīl*, falls into the Tons at the village of Bilāhta in this district. This river is one of the largest tributaries of the Tons and drains a considerable portion of the Pannā, Ajaigarh, Nāgod and Sohāwal States. The Bihar rises

in the Kaimur hills at Mowhās in the south of the *tahsīl*. It enters the Huzūr *tahsīl* and falls into the Bichhia river at the south-western corner of the Rewah town just below the old palace. The Kariari rises in the Bahelia Batha forest preserve and forms the boundary line between this and Huzūr *tahsīl*. It falls into the Tons at the village of Bākia. The Semrāwāl rising in the village of Patari in Kothī State, enters this *tahsīl* and falls into the Tons. Next to the Tons it is one of the largest streams in the *tahsīl*. The Asrāwāl has its source in the village of Sikraura, in Sohāwal State, enters the *tahsīl* at Patna and falls into the Tons at Golāhta. The Khorbai rises at the village of Khorbai in the Sohāwal State, enters this *tahsīl* at Bara and falls into the Tons at Ataria. The Jarmohra from the Pannā State, enters this *tahsīl* at Lahargawān and joins the Khorbai.

All places along the Tons river are liable to floods during the rains, the most notable floods were those that occurred in 1867, 1875 and 1882. In very early days portions of this *tahsīl* formed the possession of the aboriginal tribe of Lodhis. They were gradually dispossessed by the Kshatriyas from Baiswāra.

It is believed that Māhil Parihār, who figured so conspicuously in the Ohandel kingdom of Mahoba, had his residence at Mowhās, in this *tahsīl* and the ruins of a fort here are generally ascribed to him.

There is a very large number of forts in this *tahsīl*, a fact which shews how constant disputes were between the petty *zamindārs*.

Population was in 1891, 154,705; 1901, 144,312 persons; males 71,245, females 73,067; density 148 persons per square mile. Constitution, Hindus 123,538 or 85 per cent., Sikh 1, Jains 229, Musalmāns 3,859 or 3 per cent., Christians 17, Animists 16,678 or 11 per cent. The decrease of population in 1901 as compared with that of 1891 amounting to 10,393 or 6·7 per cent. was due to the famine of 1896-97.

There are 487 villages in the district and one town Satna.

The important castes are Brāhmans 24,703 or 11 per cent., Ohhātrī 14,511 or nearly 10 per cent., Kunbī 12,558 or 8·7 per cent. and Baniās numbering 4,773 or 3·3 per cent.

The total number of actual cultivators is 58,972 or 41 per cent. of the population; artisans numbering 22,424 or 15 per cent.

In this *tahsīl* there are altogether 32 *garhīs*, 7 *pakka* tanks, 6 *chāuparāis*, 32 *bāoris*, 759 *pakka* and 2,624 *kachcha* wells.

The general conditions of the soil are the same as those in the Huzūr *tahsīl*.

Of the total area of the *tahsīl* (977 square miles or 41 per cent.) 260,000 acres are cultivated. The principal *kharīf* crops being *kodon*, *jowār*, etc., 80,000 acres, rice 105,000 acres and at the *rabi* wheat 120,000 acres, barley 11,000 and gram 86,000.

The total number of cultivators is 84,583 (including actual cultivators 58,972). Farm servants 7,371, field labourers 16,791 and vegetable growers 1,449, or 58·6 per cent. of the total population. The estimated number of ploughs in this *tahsīl* is 25,351; the area covered by one plough is about 20 *bighas* or 10 acres and that of fallow land reserved for pasture is about 9 *bighas* ($4\frac{1}{2}$ acres).

The *tahsīl* is in charge of *tahsildār* who is a Deputy Magistrate and the Collector for his charge, with his headquarters at Satna. The revenue amounts to 2·3 lakhs, of which land revenue and cesses amount to 1 lakh. The *tahsīl* is served by the Jabalpur Extension of the East Indian Railway on which the headquarter town is situated. It is also traversed by the Great Deccan road and the Nowgong-Panna high road.

Mauganj Tahsīl :—This is the smallest *tahsīl* in the State and it lies between 24° 33' and 24° 54' N., and 81° 42' and 82° 20' E., having an area of 714 square miles. It is bounded on the north and east by the Allahābād and Mirzāpur Districts of the United Provinces and on the south and west by portions of the State.

The *tahsīl* lies for the most part on the alluvial plain on which the town of Rewari stands, and is covered with good fertile soil. To the north, however, it is traversed by the eastern-most section of the Pannā range, known locally as the Vinjh pahār.

The general direction of drainage in this *tahsīl* is to the north. There are no big rivers in it. The only streams of importance are given below :—

The Alhwa, flowing from the Kaimur hills in the south, joins the Belan at Guntha in the Teonthar *tahsīl*. Its total length is 54 miles. It passes by the village of Mau. The Adi rises at Bilonhi, 8 miles north of Mauganj in the Kaimur hills, and running through a valley in these hills for a distance of 78 miles, falls into the Belan at Nawa-gaon in the Mirzāpur District. There are no important villages along its banks.

In olden times this *tahsīl*, like many other portions of the Rewari State, was inhabited by the aboriginal tribe of the Bhārs. It was later on conquered by the Sengar Rājputs who came from Jagammanpur (Jagamānpur), Jālaun District.

The Sengars who had fully established their power in this part of the country struggled long and fiercely to retain their supremacy with the Baghels on their entering the country, and it was only after a severe struggle that they were subjugated and became feudatories. They continued to cause trouble as late as Mahārāja Visvanāth Singh's time (A. D. 1835) when their holding of Mau was incorporated in the Rewari State, and converted into one of its *tahsīls*.

In 1838 the Sengar Thākūr of Nalagarhi, a feudatory of the Sengar Rājā of Mau, caused disturbances and it was ultimately found necessary to resort to arms.

Again during the Settlement of this *tahsīl* (1881-1890) the Sengar Thākūrs on several occasions gave trouble, through misunderstanding the objects of the Settlement operations.

Population was : 1881, 120,779 ; 1891, 123,486 ; in 1901, 99,531 persons ; males 49,423, females 50,111. Density 127 persons per square mile.

Constitution, Hindus 84,152 or 84 per cent., Musalmāns 3,183 or 3 per cent., Animists 12,199 or 12 per cent. Occupied houses 18,630.

The *tahsīl* contains 609 villages. The soil of this *tahsīl* is in no way inferior to that of the four *tahsīls* lying to the north of the Kaimur hills.

The cultivated area amounts to 112,000 *bighas* (163,000 acres) or 25 per cent. of the total area.

The soil is best suited to *rubī* crops. The predominating crops are rice 123,000 *bighas*, *kodon*, etc., 47,000, wheat 30,000, *arisi* 20,000, gram 19,000.

The villages of Phūl, Gauri, Shivarājpur, Baijala, Majān, Mandaria, Dubgaon, Dagdaewa and Rajha are specially noted for their cultivation which is due to the large proportion of Kunbis in their population.

The greater portion of the local trade is carried on with the outlying British District of Mirzāpur. Being connected with the important trading centres of Lālganj, Drumondganj and Mirzāpur in the Mirzāpur District, and with Satna station by a good metalled road, its trade in the export of food grains is considerable. Some idea of the value of the exports can be obtained from the customs returns for 1904-05. According to these the duty on wheat and linseed exported amounted to Rs. 53,000 and 51,000, on *ghī* to Rs. 27,000, *tīlī* and mustard seed to Rs. 3,000, *mahuā* flowers to Rs. 4,000 and hides to Rs. 7,000; in all to about 1·4 lakh.

Imports produce about Rs. 70,000 in duties; Rs. 20,000 being derived from salt, Rs. 7,000 from *gur* and Rs. 8,000 from metal utensils.

The only road that runs through this *tahsīl* is the Great Deccan road, its total length being about 30 miles. The *tahsīl* lies far from the railways, its headquarters being 80 miles from Satna and 61 miles from Mirzāpur and consequently its whole trade is road-borne. An Imperial Post Office is located at Manganj.

The *tahsīldār* in charge is assisted by a *nāib-tahsīldār* and two *kānungos*. Police stations are located at Manganj and Naiāgarhi under *thānādārs* and at Laur and Hanumāna in charge of *jumādārs*.

The revenue derived by the Darbār from the *kothār* or unalienated lands is 2·2 lakhs, the gross revenues on alienated land including the big *Thakurāt* of Naiāgarhi being approximately 2·4 lakhs. An annual sum of about Rs. 9,100 is paid by the Thākurs, and other holders of land as tribute or *muāmila*.

The *jāgir* of Naiāgarhi is the most important alienated holding in the *tahsīl*. The Thākur is of the Sengar clan of Rājputa. The revenue of his estate amounts to Rs. 36,000 a year and he pays *chauth* or *muāmila* as tribute to the State.

Bardī Tahsīl:—This *tahsīl*, which forms the eastern portion of the hilly tract, lies south of the Kaimur range, between 23° 45' and 24° 45' N., and 81° 47' and 82° 51' E., having an area of 2,912 square miles. It is bounded on the north by the Kaimur range, on the east by the Mirzāpur District of the United Provinces, on the south by the Chang Bhākar and Korea estates in Chhattīsgarh Division of the Central Provinces and on the west by portions of Rowah. The country is, for the most part, cut by a series of parallel ridges covered with heavy forest, and cultivation is but little practised except on a few plateaus

in the valleys. The rainfall averages 45 inches. The most important of these valleys and *pāths* (plateaus) are noted below :—The valley of the Son river (called the *Ilāka of Kanpura*) stretching between the Kaimur hills in the north and Keshanpur hills on the south. The plains of Jiwān (called the *Ilāka of Bijaura*), consisting in a small depression surrounded on all sides by the hills of Nowgain on the north, Khandauli on the west, Sajhar on the south, and Rāmgarh on the south-east. The valley of Singrauli in the south-east bounded by the hills of Sajhar and Rāmgarh on the north.

The chief *pāths* are those of the Kaimur on the north, and the Keshanpur hills of which the Reserve Forest known as the Son-ranma is the most important, the *pāths* of Nowgain which run from east to west along the river Son, till it enters British territory, the Khandauli *pāth*, Sarai-Samud *pāth*, and Churi *pāth* in the Khandauli hills and a few others. The Son and its big tributary, the Gopad, traverse the *tahsil* besides many smaller streams, of which the most important are the Mayabi, Korh, Nakti, Sajhar and Deonarh.

Before the settlement of the Chandels, probably about in the 15th century, the country was ruled by the aboriginal tribes of Bhars and Balandas,¹ and the ruins of their fortresses are still found in several places. Very little is known about this country until it was occupied by the Chandellas, long after the fall of their Mahoba Kingdom. The following account is given by the local Chaudels as to their settlement in this district :—

The Chandella Chief Parmārdideva (Parmāl) (1167-1218) of Mahoba had five sons. One of them Ranjit Dev in Samvat 1313 (A. D. 1256)² established himself at Agori (Mirzāpur District). The second son Asājīt Singh became the Rājā of Kabar. The third Solhājīt Singh remained in Mahoba, while Brahma Dev and Brahmajit were killed. Harihar Shāh, 20th in descent from Ranjit Dev, the Rājā of Agori, had two sons, of whom the elder succeeded to Agori while the younger, Rudra Shāh, received the *Ilāka of Bijaura* (Bardi *tahsil*) as his share. The river Ballia formed the boundary line between the two estates. Rudra Shāh removed to the village of Garhwa in the *Bijaura Ilāka*, where his descendants remained for two generations. In the 18th century (24th generation) Rājā Mayūr Shāh removed from Garhwa to Bardi at the junction of the Son and Gopad rivers. Bodh Rai, the younger brother of Rao Ratan, 40th in descent from Ranjit Dev, received as his share the village of Bhopāri, 6 miles to the west of Sihāwal, where he built a stone fort. Bodh Rai had two sons, Sarnām Singh and Faujdār Singh. In 1810 Dalganjan Singh, a step-brother of the Rājā of Mandha who lived in the Mirzāpur District, committed a heinous offence. To escape arrest he first took refuge with Sarnām Singh. Eight months later Dalganjan Singh, on hearing that a force had been sent out by the British Government to effect his arrest, fled to Faujdār Singh at Bhopāri. Faujdār Singh, when called

1. The Balandas are represented by the Rājā of Marwā who claims Kshatriya origin.

2. This date is of course impossible as it is 148 years after Parmārdideva's death. Ranjit may have been a direct descendant, though not a son.

on, refused to surrender him and the British force assaulted and took the fort of Bhopāri after a tough fight. The two brothers Sainām Singh and Faujdār Singh with their followers escaped and sought protection with the Chauhān Thākurs of Sidhi, who afterwards gave the refugees the village of Rāmadih for their maintenance. The fort of Bhopāri was made over to the Maharājā of Rewah by the British.

This exploit is commemorated on a stone slab at Haliya on the Adhwa river in Mirzāpur. The inscription is in English and Hindi. It states that—

*Under the auspices
of Lord Minto, Governor-
General of India, and General Hewett,
Commander-in-Chief and Vice-President,
a passage was made through the Kirahe Pass,
of vast height, 2 miles in extent,
into Burdee, etc., etc.,
by Lieutenant-Colonel James Tetley, Commanding
the 2nd Battalion, 21st Regiment Native Infantry,
aided by great exertions
of his gallant and willing corps
the following of whom fell courageously
assaulting the Babarruh Ghurri in Burdee,
April A. D. 1811,
which is now destroyed
and levelled with the ground.
(Here follow the names of those who fell.)*

The Hindi record is longer and mentions how a road was cut and built up with stones along the *Kira-kī-ghāt* for two miles, to get the 18-pounders past. On the 18th April the fort was assaulted, but did not surrender as the *Lilādār* fled. The walls were then levelled and the wells destroyed. The record adds that the forts of Tadu and Joki were also levelled. Tadu is Tedua, 5 miles south-east of Bhopāri, Joki is 4 miles west of it.

The Mirzāpur Gazetteer adds that this expedition was made at the instance of Lallu Nāik, a well-known merchant of Mirzāpur, to punish the marauders of Rewah, who used to plunder the convoys passing through the Katra pass before the construction of the Deccan Road. Lallu Nāik or Lallu Mor was the Nāik or head of the Banjāra community of Mirzāpur.

A local couplet records this event—

*Samrat athāra aur atheat sāl uchār,
Yuddh bhayo Baisākh Badī dasmī tithi Gurucār.*

"In Samvat 1886 on *Baisākh Badī* 10, Thursday, a great struggle took place."

The Rājās of Bardī made over the *Ilāka of Singrauli* to Mahārājā Jai Singh in lieu of tribute, and later Ajit Singh, the Chandel Rājā of Bardī, being constantly harrassed by his clansmen came to Rewah with his Rāni Jagat Kunwari and formally made over his estate to Mahārājā (then Bābū Sāhib) Visvanāth Singh in 1819, retaining for himself only as much as was sufficient for his own and his Rāni's

maintenance. The following 15 districts constituting the Chandel Rāj of Bardī then came into the possession of the Rewah Mahārāja.

Kanpura, Kalkati, Jiāwan or Bijaura, Rāmgarh Garhwa, Sarai, Samud, Nigri Niwas, Singrauli, Korwal, Jaghat, Bigouri or Baghounk, Sidhi Marwa, Amilia, Kherwa Medhauli, and Bardī proper.

On the assumption of the Bardī Rāj by the Rewah Darbār, land yielding a revenue of Rs. 6,000 was given away in *nānār* grants (maintenance allowances), while Ajit Singh, the ex-Rājā of Bardī, received Rs. 2,000 a year cash. Ajit Singh died without an heir and his brother's son Jagjit Singh was recognised as the titular Rājā. Mahārāja Visvanāth Singh married Jagjit Singh's daughter, Subhadra Kunwarī. Jagjit Singh's elder son, Jagmohan Singh, being also without an heir, his younger son, Bhawānī Singh, was recognised as Rājā. Bhawānī Singh's three grandsons still live and enjoy a *jāgīr*. They bear the title of Bābn Sāhib.

The village of Ghoghra (24° 33' N, 82° 5' E.), 18 miles west of Sihāwal, in the *Ilāka* of Kanpura, is traditionally connected with Birbal, Akbar's witty favourite. The story runs that in a small temple here dedicated to Chandī Devī, one Raghubīr Rām, Brāhman of Chandainia village, daily worshipped the goddess for twelve years. He was helped by his sister's son Birbal, in keeping the temple clean. One day while the boy was sweeping the temple and Raghubīr Rām was away, he accidentally hurt his little finger and the blood from it stained the goddess's image. This propitiated the goddess and she promised the boy that whatever he prophesied, would turn out right. On leaving the temple the boy met a Kewat fishing. He told the Kewat that a bird was entangled in his hook and drawing up the line a bird was actually found upon it. The same night the goddess appeared to the boy in a dream and told him that instead of wasting his power in such follies he should go to the Emperor's court. Accordingly the boy went to Akbar's court, where he soon rose to honour and distinction. Apart from the legend it would appear that Birbal was at one time an attendant at the Baghel Chief Rām Chandra's court.

Badauni¹ notes that Birbal "who was formerly in the service of Rām Chandra Bhata" was sent with Zain Khān Koka to bring the old Chief to Delhi. Birbal was killed in 1586 while fighting under Zain Khān in Swāt.²

An *Ashtabhūja* (eight armed) Devī, whose image a Chandel Rājā is said to have obtained in dowry from Rājputāna, stands in this village. It is the special object of worship to the Chandels, a large fair taking place annually in the month of *Kumvār* lasting 15 days.

Chauhāns of Sidhi.—Sidhi is a small village, 30 miles west of Sihāwal, inhabited by Chauhāns and for this reason the district is commonly known in Rewah as *Chauhān-khand*, it is stated that a Chauhān Narsingh by name came to Rewah from Mainpuri, and received a grant

1. E. M. H., V., 538.

2. Do. VI., 80, 91. Blochmann—*Ain-i-Akbari*, I, 404.

of 64 villages in the *Ilāka of Sidhi*, from the Rao Sāhib of Chorhāt. Later on, he received another grant of 29 villages from the Rājā of Bardī. All these grants were made free as *bhaip* grants, and the Ohauhāns paid no *muāmila* for them. In course of time, however, when the Bardī Rāj came into the possession of the Rewah Darbār, the tenure of the grants was converted into *muāmila*.

The Singrauli Ilāka.—It is said that when the Venuvanshīs, a ruling family of Jhūnsi (Allahabād), were in poor circumstances some of their clan went to Singrauli and took service there under a powerful *zamindār* of the Khairwār tribe. They faithfully served their master for some time and the Khairwār *zamindār* dying heirless the Venuvanshīs acquired the estate to which they added more territory.

They were the founders of the family of the present Rājā of Singrauli who is, however, popularly believed to belong to the Khairwār tribe. This seems, however, to be erroneous, as the Rājā of Singrauli is connected with the Chandels and Gaharwārs. Formerly, the Rājā of Singrauli was subordinate to the Rājās of Bardī.

The portion of Singrauli lying in the Rewah State is now held by the Rājā as a *muāmīlādār*.

Population was in 1881, 193,816 ; 1891, 243,203 ; 1901, 198,921 persons ; males 99,527, females 99,394. Density 68 persons per square mile. Constitution : Hindus 158,772 or 79 per cent., Jains 20, Musalmāns 4,173 or 2 per cent., Animists 35,956 or 18 per cent. ; villages number 848.

The hilly nature of Bardī places it far behind the other *tahsils* in point of cultivation. Only 16·73 per cent. of the total area is under cultivation, the most cultivated parts being the valley of the Son (*Kanpura Ilāka*), Bijaura (or Jiāwan) and Singrauli. In the first two divisions rice is chiefly grown, while in the last gram and *kodon* are the predominating crops. The total area cultivated is 480,000 *bighas* (222,000 acres), the predominating crops being *kodon* 183,000 *bighas*, rice 124,000. Though the classes of soil met with are the same as elsewhere, *mair* and *domat* are confined to a very small area, while *sigon* and a still less productive variety called *sigain* cover the largest area.

Forest occupies 1,296 square miles or 44 per cent. of the area. Except a very small reserved tract extending along the right bank of the Son it is open to the people.

The revenue derived by the State from sale of the *lac* produced in Singrauli is a very important item in the receipts.

Corundum is locally worked at Pipra in Singrauli. A royalty of Rs. 3 a maund is levied. Agarias, a local tribe, work iron in the usual crude way. Their annual output of metal is from 10 to 15 maunds.

Of all the *tahsils* Bardī, being very remote from the railway and good roads, is in a very backward condition as regards trade. The nearest market is Mirzāpur, but as the Kaimur range has to be crossed through difficult *ghāts* to reach it, there is little or no incentive to commerce.

The average value of the duty from exports per year is Rs. 3,500.

There are no roads or railways in this *tahsīl*, all communication being by foot-paths (some of them wide enough to be distinguished as *dharra*s). Timber and bamboos are drifted down the river Son.

An Imperial Post Office is located at Sihawal, while three State *dāt* lines are maintained, running from Sihawal to Sidhi, to Jiāwan and Sarai, and from Jiāwan to Rāmgarh and Singrauli.

The *tahsīl* is in charge of a *tahsīldār* who is a Deputy Magistrate and the Collector of the district. His headquarters are at Sihawal.

The land revenue amounts to 1·6 lakh.

Rāmnapur Tahsīl¹.—Rāmnapur is one of the three *tahsīls* lying in the hilly tract. It is situated between 23° 31' and 24° 20' N., and 80° 57' and 82° 20' E., just south of the Kaimur range. It is bounded on the north by the Mandla District, on the east by the Chhattisgarh Division and on the west by the Jabalpur District of the Central Provinces. It has an area of 2,775 square miles, of which 41 per cent. is *kothār* and 59 alienated.

The country in this *tahsīl* consists of a medley of hill and valley with but little land suitable for cultivation, except that in the bed of the Son river, which traverses its north-western corner.

The *tahsīl* lies between the Kaimur scarp in the north and the Maikala range in the south. While a long chain formed of short parallel hills traverses the eastern section and is locally known as the Keshanjan pahār. The important peaks are those of Bāndhogarh (2,662 feet) on which the old fort stands; of Rāmpur (2,378 feet), five miles to the east of Bāndhogarh; of Gidhaila (corruption of Gridhyakūta), 5 miles to the north of Rāmnapur (2,354 feet) and Rāni-Mura, in the Marwās (1,776 feet), on the top of which there are remains of an ancient building and an old tank.

The important rivers in this *tahsīl* are the Son, which has a course of 81 miles in the *tahsīl*; the Banās, with a length of 80 miles and the Mahānadi with a course of 36 miles.

In former days most of the territories now constituting the *tahsīl* of Rāmnapur were in the possession of the Balandas, from whom a considerable portion lying round Rāmnapur was taken by Gusāins.

The portion under the Gusāins was known as the *Ilāka of Mrigavati*. The small village of Mrigavati (24° 9' N., 81° 9' E.), 10 miles to the south of Rāmnapur, still marks the site of the old settlement and contains many traces of having once been a large place.

Later on, Bābu Jujhār Singh, son of Mahārāja Anūp Singh, received this district in *jāgīr* and from that time until the time of Mahārāja Visvanāth Singh it formed a separate estate.

Up to 1891 the Sohāgpur *tahsīl* was included in it.

Population was in 1901, 2,221,980 persons; males 1,09,248, females 112,732. Density 80 persons per square mile. Hindus numbered 146,061 or 66 per cent., Jains 44, Musalmāns 2,786, Animists 73,089 or 32 per cent.

1. Rāmnapur *tahsīl* has been since split up into Beohāri and Bāndhogarh *tahsīls*.

2. In 1881 and 1891 the Rāmnapur and Sohāgpur *tahsīls* were united.

Occupied houses 42,708. The *tahsīl* contains 949 villages. The villages are all small and at considerable distances apart.

The soil of this *tahsīl* is lighter than that of the northern *tahsīls* being for most part of the *bhātu* (stony) class and suited to the growing of *kharif* crops only.

The cultivated area amounts to 454,552 *bighas* (234,000 acres) or 13 per cent. of the total area. The prevailing crops are *kodon* and *jowār* 145,000 *bighas*, rice 98,000, *uli* 45,000, wheat 32,000, barley 30,000 and gram 25,000.

A very large portion about 1,190 square miles of this *tahsīl* is covered with forest. The prevailing tree being *sarai* (*Boscellia serrata*). Two forest reserves have been made at Sajwāhi and Bāndhogarh. The rest of the forest, though not reserved, is important for the large export trade in bamboos. The cultivation of *lac* is also carried on.

There being no good roads and no convenient means of conveyance, trade is not developed and the exports and imports only produce about 1·9 lakh a year. There is a post office at Rām Nagar.

The *tahsīl* is in charge of a *tahsildār* whose headquarters are at Beohāri. The revenue from *kothār* land is 1 lakh and the gross revenue of alienated lands including the large estate of Marwās is Rs. 90,000. An annual sum of Rs. 2,062 is paid by the Thākurs as tribute.

As already stated the territories comprised in this *tahsīl* were originally granted for the maintenance of the chief's nearest relations and a great portion is still held by Thākurs representing junior branches of the ruling family. Chief among these subordinate Thākurs are the Thākur of Itwan, whose estates yield a revenue of about Rs. 5,000 and the Thākur of Deorāj Nagar whose estates yield a revenue of nearly Rs. 40,000. The present Thākur of Deorāj Nagar, Lal Rāmānuj Prasad Singh, C. I. E., is an influential leading *sardār*. He held the post of *Divān* from 1891 to 1902.

Other small holdings are those of Budwa, Sarin, Mankisar, Kaithala, Kunwa, Pāphund, Chachai, Sarsi, Khaunaudi, and Gungaur.

Sohāgpur Tahsīl :—The *tahsīl* of Sohāgpur is the southern-most district of the State. It consists of two parts, one below the Maikala range and the other called the *Patla* or plateau upon it. The *tahsīl* which lies between 22° 30' and 23° 38' N., and 80° 32' and 82° 18' E., has an area of 3,535 square miles.

The *tahsīl* lies in the hilly tract and possesses little soil of agricultural value, but the forests are considerable and the sale of *lac* and timber brings in about 5 lakhs a year, *sarai* (*Boscellia serrata*) being the prevailing tree. The most important produce of the district, however, is coal obtained from the Umarā mine.

It is bounded on the north by the Rām Nagar *tahsīl* and the Chang Bhākar estate; on the east by Chhattisgarh Division and the Bilāspur District of the Central Provinces; on the south by the Mandla and Jabalpur Districts of the Central Provinces and on the west by the District of

Jabalpur. The Maikala range, which connects the Vindhya and Sātpurās, lies in the south-east corner. It bears upon it the source of the Son and Narbadā rivers and the sacred village of Amarkantak. The *tahsil* is watered by the Johilla, Son, and Narbadā.

Before the opening of the Katni-Bilāspur Extension of the Bōrgal-Nāgpur Railway, this part of the State was a *terra incognita* to the people of Rewah, and was but sparsely populated. Of late, however, the tract has been widely opened out and is gradually rising in prosperity.

There can be little doubt that the early history of this *tahsil* is full of interest that would amply repay careful historical and archaeological research. The numerous ruins of buildings and other old remains met with in it, carry its history back to the Gupta period. Its history during the Chedi period would also be interesting as it was until the end of their rule a highly prosperous district, most of the *tahsil* being during the 10th and 11th centuries included in old Kalachuri kingdoms of Ratanpur and Bilāspur.

The fort of Bāndhogarh which was then in the possession of the Kalachuris passed in dowry to the Baghel Chiefs of Rewah.

After the Baghels had established themselves at Bāndhogarh they gradually took possession of the surrounding country, much of which has passed from the Kalachuris to the Gond.

Later on, a small portion of this district was seized by a minor branch of the Baghel family descended from Jamuni Bhānu, the younger brother of Mahārājā Virbhān. This territory continued to remain in the hands of this branch of the family, and did not actually form a part of the Baghel chiefship. Subsequently, the whole of this district together with the neighbouring districts of Chhattisgarh passed into the hands of the Bhonslās of Nāgpur, and with the fall of the Marāthā power into those of the British. In 1860 the territories now constituting the *tahsil* of Sohāgpur were restored by the British Government to Mahārājā Raghurāj Singh in recognition of his good services during the Mutiny of 1857.

Population was in 1901,¹ 241,345 persons; males 120,691, females 120,654. Density 69 persons per square mile. Constitution: Hindus 147,873 or 61 per cent., Jains 143, Pārsī 1, Musalmāns 5,389 or 2 per cent., Christians 30, Animists 87,909 or 36 per cent.

The large Christian population is due to the Europeans employed in the Umarā Colliery. The return for Hindus is not quite correct as many of the Gonds who form the major part of the inhabitants so return themselves, thus diminishing the Animist percentage. One town Umarā and 1,192 villages are situated in this *tahsil*. Occupied houses 45,454.

The soil of the *tahsil* is, for the most part, poor and favourable only to the growth of the *khari* crops.

The cultivated area amounts to 340,000 *bighas* (175,000 acres). The prevailing crops are rice 105,000 *bighas*, *kodon*, etc., 84,000, *tili* 23,000, gram 27,000 and wheat 23,000.

¹ In 1881 and 1891 this *tahsil* was united with Rāmnagar.

Singh, son of Dunīpati Singh, as Thākūr of Sohāgpur, on payment of an annual tribute of Rs. 5,000 and conferred upon him the title of Bhaya Bahādur which is still held by his descendants.

Kothī-Nīgrāni.—The annual income of this estate is Rs. 28,000 and the *muāmila* paid Rs. 7,266. The Thākūr of Kothī belongs to a junior branch of the Sohāgpur Thākurs.

Jaitpur.—The holding has an income of Rs. 7,200 and pays *muāmila* at the rate of Rs. 1,800.

Khairha.—The holding is valued at Rs. 2,800 a year and pays as *muāmila* Rs. 650.¹

GAZETTEER.

Alhāghāt, tahsīl Huzār.—A pass in the Vinjh pahār named after the Banāphar, hero of Chand's *Prithvirāj Rāsa*. It is situated $3\frac{1}{2}$ miles north-west of Sirmol village ($24^{\circ} 51' N.$, $81^{\circ} 24' E.$). The pass stands 1,119 feet above sea-level. Many signs on the surrounding rocks are pointed out as being relics of Alha's day, such as the mark of his spear, the cave he lived in, his treasure house, etc. Besides this some rude figures of Ganesha and other deities are cut on the rocks. The well-known Alhāghāt records of Narasinha Dev Kalachuri of V. S. 1216 or 1159 A. D. are here.² There are two other records in the neighbourhood, one of 1209 A. D. In this record the pass is called *Shatashādika ghāt* which was no doubt its original name.³

An old tank at Bhandla village below the *ghāt* is attributed to Alha.

Amārkantak, tahsīl Sohāgpur.—A small village in Rewah State situated on the eastern-most extremity of the Maikala range at Lat. $22^{\circ} 40' N.$, and Long. $81^{\circ} 46' E.$, 3000 feet above sea-level. Amārkantak is famous as the site of the source of the Narbadā river and one of the most sacred spots in India. It is mentioned by Kālidās in his "Meghadūta" where it is called Amānakūta.

There are eleven important places in the vicinity which are visited by pilgrims, of these the most important are the source of the Narbadā, the fall of Kapildhāra where the foot-prints of the Pāndava Bhīm are shown, and Son Munda, where the Son river rises.

The most important temple now standing is curious in consisting of three sanctums arranged like a trefoil leaf, which were evidently to have been connected by a single *mandapa* or hall, that was, however, unfortunately never completed. The mouldings though plain are bold and good, and the *shikhara* or spire is of the graceful curvilinear form seen in the Khajūrahō temples. It is said to have been built by Karna Chedi (1042-1122) and would thus date in the 11th century. It is the oldest temple in this spot. There are some fourteen others close by, and many more further off. The tank from

1. The figures shown as the incomes of these Thākūrāts are the revenues stated in the original grants. The incomes have, in all cases, considerably increased, but the exact figures are not known.

3. G. A. S. R., XVI, 114.

Bāndhogarh, tahsil Rāmnagar:—The old capital, situated in the south-east of the State in $23^{\circ} 40' N.$, and $81^{\circ} 3' E.$ It is a place of considerable archaeological and historical importance. The fort stands on a hill 2,682 feet above sea-level, and consists in fact of two hills, the Bannia hill close by being also enclosed by a rampart and considered as part of the fort. ¹

It is undoubtedly a place of antiquity and was an important stronghold long before the Baghel dynasty acquired the country. Ptolemy ² mentions a *Balantipyrgon* as one of the towns of the *Adesathroi*. Cunningham has suggested that this is a Greek rendering of *Haya Kahetra*, the country of the Haihayas. Tradition assigns the early rule of this region to the Baland tribe, which would give some support to the identification, the names Balandipur and Balanti-pura being practically identical.

In the 18th century it was given as part of the dowry of the Kalachuri bride of Karan Der Baghela, and became the centre from which this clan gradually extended their sway. Muhammadan historians refer to it as Bāndhu and to the Baghel Chief as Rājā of Bāndhu.

In 1498-99 Sikandar Lodi annoyed at the refusal of Rājā Salivāhan to give him a daughter in marriage, invested Bāndhogarh, but ineffectually, and "although his most valiant soldiers showed their courage at the fort of Bāndhu, the strongest castle in that district," he was obliged to retire and take his revenge by sacking the country as far as Bānda. ³

In the 8th year of Akbar (1563) the fort was invested by Asaf Khān but the siege was raised on the intercession of other Rājās at Delhi. In the 42nd year of Akbar (1597) disturbances arose at Bāndhogarh and Rājā Patr Dās was sent to besiege the fort. After an investment of eight months and five days he took it and was in 1599 sent there as governor. From 1599 till 1602, it remained a Muhammadan possession. ⁴ In that year it was restored to Rājā Vikramāditya. It was, however, no longer the capital town, that position having been given to Rewah.

There is a curious local legend that Akbar was born here, a legend firmly believed in but which is entirely without historical foundation. Many old remains are said to exist in the neighbourhood. Population (1901) 226; Hindus 218, occupied houses 26.

Baraon, tahsil Mauganj:—A small village situated 5 miles to the north of Mauganj, in $24^{\circ} 42' N.$, and $81^{\circ} 56' E.$, noted for the fair of Ganeshji held in the month of *Kārtik* (October-November) which lasts for 15 days. Population (1901) 182.

Baraundha, tahsil Rāmnagar:—A village situated on the right bank of the Son, 4 miles south-west of Rāmnagar, in $24^{\circ} 10' N.$, and $81^{\circ} 15' E.$ It is a very important place, chiefly inhabited by the traders in food grains, and was at one time the headquarters of the *tahsil*.

4. *Mudair ul-Umra* (Persian Text), 228-9. Blochmann—*Ain-i-Albani*, I, 367, 407, 469.

It has a vernacular school and an old fortress. Population (1901) 1,378; Hindus 1,124; occupied houses 275.

Bardī, tahsīl Bardī :—A village situated in 24° 32' N., and 82° 29' E. Once the chief place in the *tahsīl*, but except for this not a place of any real importance lying as it does in rough jungle-covered country. The Chandels are said formerly to have carried on human sacrifices here to Bardī Devī, and a buffalo, its substitute, is still sacrificed at *navarātri*. Population (1901) 119 persons; Hindus 119.

Belonhi, tahsīl Manganj :—A waterfall on the Adhwa river, 8 miles north of Manganj. The fall is 464 feet in height.

Beohārī, tahsīl Rāmnagar :—A large village and headquarters of the *tahsīl* lying 14 miles south-east of Rāmnagar in 24° 1' N., and 81° 25' E. It is a trade centre of considerable importance, and contains a police *thāna* in charge of a *thānādār*, a customs and a forest *choukī*. Population (1901) 337; males 169, females 168; Hindus numbered 80; occupied houses 67.

Bhād, tahsīl Raghurājnagar :—A village situated in 24° 37' N., and 80° 54' E. A very big fair is held annually at the temple here during the *navarātras* in the months of *Kunwār* and *Chaitra* in honour of the Chedi Devī. A very large area in this village is covered with valuable bamboos. Population (1901) 231; Hindus 176; occupied houses 46.

Bhalua, tahsīl Teonthar :—A village, situated in 24° 58' N., and 81° 40' E., of importance only as being the present residence of the representatives of the Venuvanshi Rājās who formerly ruled this tract. Population (1901) was 791; Hindus 711; occupied houses 108.

Bharjuna, tahsīl Raghurājnagar :—Situated six miles to the north of Satna town in 24° 39' N., and 80° 58' E. Near this village are the ruins of an old fort and temple containing some good sculpture and images. Population (1901) was 414, comprising 374 Hindus; occupied houses 188.

Nothing is known as to the origin of the fort or temple. In the vicinity of the site of the old temple there now stands a small modern shrine in which the image of a goddess with 18 arms is erected.

Bhumkhar, tahsīl Raghurājnagar :—Situated seven miles to the north-west of Satna town in 24° 38' N., and 80° 52' E. It takes its name from a spring called Bhumka.

Formerly an old fortress, said to have been built by the Baghelas, stood here. It is now ruined. Near the spring are several slabs of stone carved with images of Jain Tirthankars, known popularly as the five Pāndawas. Population (1901) was 374; Hindus 343; occupied houses 74.

Bichrata, tahsīl Manganj :—A village lying 5 miles north-east of Manganj in 24° 42' N., and 82° 2' E. The representatives of the former Sengar Rājā of Mau reside here. He is known as the Rājā of Bichh-rahtha and is a tributary land-holder of the Darbār. Population (1901) 505.

Burhar, tahsil Sohāgpur :—A village and railway station on the Katni-Bilāspur line situated in $23^{\circ} 13' N.$, and $81^{\circ} 36' E.$ It is increasing rapidly in importance. A forest and a police *chauki* are situated in it. Population (1901) 506 ; occupied houses 101.

Chachai, tahsil Huzūr :—A waterfall on the Bihar river, 9 miles west of Kerati, in $24^{\circ} 46' N.$, and $81^{\circ} 22' E.$ The fall is 868 feet high.

Chaki, tahsil Teonthar :—A village lying in $25^{\circ} 3' N.$, and $81^{\circ} 52' E.$, 4 miles north of Sohāgi, on the Tons river. It is situated on the northern border of the State and is well-known for the *ghāt* on the Tons which is crossed by means of a ferry boat during greater part of the year. A fair is held here every Tuesday in honour of god Hanumān. Population (1901) 216 ; Hindus 191 ; occupied houses 54.

Chandi, tahsil Teonthar :—A village 5 miles from Sitlāha situated in $24^{\circ} 57' N.$, and $81^{\circ} 40' E.$ A big fair is held here during the *Shivarātri*. Population (1901) 352 ; Hindus 311 ; occupied houses 90.

Chandīa, tahsil Sohāgpur :—A large village situated in $23^{\circ} 40' N.$, and $80^{\circ} 45' E.$, on the western border of the district. It is also a railway station on the Bengal-Nāgpur Railway. Population (1901) 3,469 ; males 1,636, females 1,833, comprising 2,576 Hindus and 530 Animists ; occupied houses 893.

Chandīa is the seat of the Thākūr of Chandīa. It has a customs and a police *chauki* and a vernacular school situated in it. Being the seat of a Thākūrāt and a railway station it is a local centre of rising importance.

Chandrehī, tahsil Huzūr :—A village situated one mile east from the bank of the Son river in $24^{\circ} 15' N.$, and $81^{\circ} 35' E.$, once a very large place. A very fine temple and an old monastery are still standing here. The temple faces west and now stands on a lofty platform, which, however, appears to have been added in later days. It is quite unique in being constructed on a circular plan. This extremely unusual design is followed not only in the exterior but also in the sanctum. The circle outside is unbroken by buttressing or recessing, and though it thus lacks relief and does not produce the same effects of light and shade as temples built on the ordinary plan, it is nevertheless pleasing. The facet ornamentation on the spire resembles that used at Khajrahō in the Chhātarpur State. It is assigned to the 13th or 14th century. The palace, or as it should be called monastery, at the same place belongs to the 14th century and is interesting as an example of domestic architecture. It is built in the form of a square with a pillared courtyard inside, with chambers round it. The ceiling of the rooms is elegantly ornamented. Population was (1901) 229 ; Hindus 193 ; occupied houses 45.

Chorhāt, tahsil Huzūr ($24^{\circ} 25' N.$, $81^{\circ} 45' E.$) :—A large village and seat of the Thākūr of Chorhāt, who is an Honorary Magistrate. Population (1901) 411 ; Hindus 288 ; occupied houses 80.

Dabhaura, tahsil Teonthar :—A small village and station on the East Indian Railway situated in $25^{\circ} 8' N.$, and $81^{\circ} 25' E.$ The village contains a small fort belonging to the Dikshit family, which holds the village

under a *paiṇalḥār* grant. Customs, police and forest *chauḷīs* and an Imperial Branch Post Office are situated in it. It is connected with Teonthar and Sillāha, the two most important places in the *tahsīl*, by an unmetalled road. A line of mail runners from Dabhaura to Sillāha and Teonthar is maintained by the Darbār.

There is a spacious encamping ground here used by British Troops from Allahābād. Trade in firewood and food grain is on the increase and the construction of a good bazar is under consideration.

An important fair is held here twice a year during the *nararātra* in the months of *Chaitra* and *Kumār* which, though religious in origin, has now become commercial. Population (1901) 1,928; Hindus 1,225; occupied houses 557.

Deoganj Katara, tahsīl Teonthar:—A village situated six miles to the south of Teonthar in 21° 54' N., and 81° 46' E., on the Mangawān-Allahābād road. Has a fair sized bazar especially important for travellers going from Rewah to Allahābād who generally stop there en route. Population (1901) 150; Hindus 149; occupied houses 37.

Deorājnagar, tahsīl Rāmnnagar:—A large village, four miles east of Rāmnnagar, situated in 21° 13' N., and 81° 15' E. A fair weather road runs from Rāmnnagar to Deorājnagar.

Being the seat of a big Baghel *ilākādār*, it is a place of importance. A fine temple to Vishnu, and a large bazar are located here; it is a considerable commercial centre. A vernacular Middle School and a customs *chauḷī* are also situated here. The Thākūr of Deorājnagar is an Honorary Magistrate for this district.

The *jhāta* ceremony of Thākurji in the month of *Srāwan* is celebrated here on a grand scale. Population (1901) 3,400.

Gārḥ, tahsīl Teonthar:—A village lying 16 miles west of Solāngī in 21° 48' N., and 81° 45' E. It has an old *garḥī*, a police station, a customs *chauḷī* and a vernacular school. Population (1901) 1,419; Hindus 1,176; occupied houses 295.

Ghoghra, tahsīl Bardt:—A village situated in 21° 33' N., 82° 5' E. This place has already been described under Bardt *tahsīl* as connected with the Birbal or Akbar's great favourite, and a place where a large fair is held in the *nararātri* (October). Population (1901) 16; occupied houses 3.

Ghumān, tahsīl Teonthar:—A village lying 5 miles to the east of Dabhaura in 25° 6' N., and 81° 27' E., with which it is connected only by a track. Its importance consists in the fact that it is the seat of a family of a Baghel Thākūr who formerly possessed the whole of the *Jiraonḥa pargana*, a part of the Teonthar *tahsīl*. There is a very big tank situated here. Population (1901) 418; Hindus 386; occupied houses 102.

Gidhalla, tahsīl Rāmnnagar:—Village lying 5 miles to the north of Rāmnnagar in 24° 18' N., and 81° 15' E., situated at the foot of the Gidhalla hill, popularly identified with the Gṛidhakūṭa of the Purāṇas.

A fair of some importance is held here annually on the *Dasant Panchamī* in the month of *Māgh* (January), when visitors bathe in the Mānsī Ganga. Population (1901) 93; Hindus 45; occupied houses 18.

Ginja Hill, *tahsīl* Teonthar :—This place which is of some archaeological importance lies 11 miles south of Dargarh station in $24^{\circ} 58'$ N., and $81^{\circ} 28'$ E. It rises to 1,326 feet above sea-level, the hillside being covered with jungle. On the south face the scarped rock overhangs forming a cave 100 feet long by 50 broad and 20 feet high. In the centre at the back is an inscription in red paint with rude drawings of men and animals. The inscription is in Gupta characters. It refers to a Mahārāja Bhīm Sen and is dated in year 52 which of the Gupta era will correspond with A. D. 271.¹

Goraia, *tahsīl* Raghunāgnagar :—The chief seat of Dikshit Rājā situated 10 miles north of Mādhogarh in $24^{\circ} 38'$ N., $81^{\circ} 9'$ E. Formerly, it was a very important trade centre visited by the Lawāṇas. It is 15 miles to the north-east of the *tahsīl* headquarters. Population was (1901) 106; Hindus 95; occupied houses 73.

Govindgarh Town, *tahsīl* Huzūr :—Situated on the edge of the Kaimur scarp 1,200 feet above sea-level in $24^{\circ} 22'$ N., and $81^{\circ} 28'$ E. Govindgarh is a favourite summer resort of the chief on account of its fine position on the edge of the range, affording a magnificent view over the forest-clad region below, and the spot to be had in the adjoining forest reserve. The surroundings are most picturesque. The chief has a palace in the town. A large lake is situated here.

Population was, in 1901, 5,022 persons; males 2,807, females 2,155, comprising Hindus 4,014 or 80 per cent., Mussalmāns 591 or 12 per cent., Animists (Gonds) 417 or 8 per cent.; occupied houses 913.

Govindgarh is 12 miles south of Rewah with which place it is connected by a metalled road and by telephone.

Gurgī-Masaun, *tahsīl* Huzūr (Garha in our maps) :—An old site of archaeological importance situated twelve miles east of Rewah in $24^{\circ} 30'$ N., and $81^{\circ} 22'$ E. It is strewn with remains showing that it was formerly a place of great importance. It has been suggested as the site of the ancient city of the Kausāmbī.² There is a fine fort here called Rehuta, attributed to Karna Chedi (1042-1122), which has a circuit of $2\frac{1}{2}$ miles with walls 11 feet thick and originally 20 feet high, surrounded by a moat 50 feet broad and 5 feet deep. The temple remains are mostly Brāhmanical, though some Digambara Jain figures are lying about. Gurgī is still famous for its *pān* gardens.³

Gurh, *tahsīl* Huzūr :—A village situated on the left bank of the Bichhā river, 15 miles south-east of Rewah town, in $24^{\circ} 20'$ N., and $81^{\circ} 25'$ E. Contains customs and police *chāukis* and a vernacular school. Formerly it was a well populated place. There are the ruins of an old fort here. Population (1901) 379; occupied houses 79.

Hanumān, *tahsīl* Mauganj :—A village on the Great Deccan road, 16 miles to the east of Mauganj, in $24^{\circ} 46'$ N., $82^{\circ} 12'$ E. It is the headquarters of the customs administration of this *tahsīl*. It contains an

1. C. A. S. R., XXI, 119.

2. J. A. B., 1901, 249.

3. C. A. S. R., XXI, 119.

encamping ground and a police *chauli*, and is an important place on the eastern border of the State. Population (1901) 77; Hindus 66; occupied houses 15.

Hāta, tahsil Mauganj:—A small village 18 miles east of Mauganj in $24^{\circ} 45' N.$, and $82^{\circ} 13' E.$ A large fair is held here during the *Shivarātri* in honour of the Mahādeo.

Itwān, tahsil Rāmnagar:—A village situated 13 miles south-west of Rāmnagar in $24^{\circ} 11' N.$, and $81^{\circ} 1' E.$ It is the seat of the Thākūr of Itwān, a representative of the former Thākurs of Rāmnagar. Population (1901) 211; Hindus 180; occupied houses 41.

Jaithāri, tahsil Sohāgpur:—A village and railway station situated $8^{\circ} 2' N.$, and $81^{\circ} 50' E.$ It is also a rising trade centre. Population 820; Hindus 704; occupied houses 164.

Jatli, tahsil Teonthar:—A village 5 miles south of Dabhaura in $25^{\circ} 3' N.$, and $81^{\circ} 24' E.$ A large fair is held here in honour of Devī in the *Navarātra*. Population (1901) 396; Hindus 298; occupied houses 89.

Jobi, tahsil Rāmnagar:—A village 14 miles south-west of Rāmnagar situated in $24^{\circ} 3' N.$, and $81^{\circ} 2' E.$ Three miles to the east of Jobi is Duāra village, at the junction of the Mahānadi and the Son, stands a large Banyan (*Ficus indica*) tree which is said to mark the site of the hermitage of the Rishi Mārkaṇḍeya, and a big religious fair is held there on the *Makar Sankrānt*. Population (1901) 281; Hindus 194; occupied houses 60.

Jodhpur, tahsil Mauganj:—A village 13 miles west of Mauganj, 3 miles to the north of the Great Deccan road. A village and headquarters of a Sengar Thākūr situated in $24^{\circ} 42' N.$, and $81^{\circ} 45' E.$ Population (1901) 368.

Kachni, tahsil Bardī:—A village situated 85 miles south-east of Sīhāwal in $24^{\circ} 5' N.$, and $82^{\circ} 40' E.$ It has a large bazar and is well-known for its country made shoes. Population (1901) 14.

Kakousiha, tahsil Bardī:—A village situated north-east containing a large number of ruins of 12th century temples and some earlier 9th century remains. Population 181; males 85, females 96; occupied houses 30.

Kandhwar, tahsil Hunzūr:—A very large village situated in $24^{\circ} 22' N.$, and $81^{\circ} 36' E.$, 12 miles south of Ghar. Population 284; Hindus 252; occupied houses 57.

Kevati-kund, tahsil Teonthar:—A sacred pool situated in $24^{\circ} 48' N.$, and $81^{\circ} 35' E.$ At this spot the Mahānadi river precipitates itself over the edge of the Rewah plateau in a magnificent cascade, 331 feet in height, into a pool (*kund*) formed by the erosion of its waters. The spot is one of unusual and romantic beauty. Below lies the deep pool of clear blue water, hemmed in on three sides by lofty wall of perpendicular rock, while the escaping stream flows for over two miles down a canon with beetling cliffs on either hand. The eastern cliff is crowned by a fort and some small shrines, below which lie two caves. One cave, the larger, is 200 feet long by 43 broad, but only 3 feet high, while

the second called the Mahādeo cave is partly artificial, the outer wall being built up. Inside the smaller cave are a few *lingams*. On the rock outside are two representations of Buddhist stūpas shewing the origin of the caves. Inside on the ceiling is an inscription cut in Pali characters of 200 B. C., which runs:

Hariti putenam Sonakena karita pukhaṇi.

"The pool (cave) caused to be made by Sonaka, son of Hariti."

In Chand's *Prithvirāj Rāisa* a hermit Harit is mentioned.

Some paintings of animals in red ochre adorn the rock. A mile from the waterfall at the village of Kevati (Keonti) is a row of *sati*-pillars, bearing inscriptions, dated in V. S. 1890 and 1897 or 1898 and 1941 A.D. In them a Rājā Hamira Dev of Lukasthāna of Kathaula is mentioned, and also Shri Mahārājādhirāj Devaka of Kathaula, his overlord. Who these kings were it is not possible to say. Cunningham suggests they were Chandels, but from local tradition they appear to have been Venuvanshi chiefs. The fight in which the people commemorated in the pillars fell, may have taken place between the Baghels and Venuvanshis.

In these inscriptions this place is called Kevati-sthān, while Kathaula-sthān now Kathaul near Maimani-ghāt is mentioned as the residence of Mahārāja Devaka. ¹

Population (1901) 589; Hindus 482; occupied houses 148.

Khairi, tahsil Sohāgpur:—A village and station on the Katni-Bilaspur line, situated in 22° 55' N., and 81° 54' E. Its bazar is rapidly rivalling that of Sahdol. It has a police, customs and forest *chaukis* located in it. Population (1901) 206.

Khalesar, tahsil Sohāgpur:—Sister village to Umariā. Formerly, the names of these places were united as Umariā-Khalesar. This village is separated from Umariā only by a small stream called the Umar. It is the seat of a petty Baghel Thākur, belonging to the Chandia branch. Population (1901) 206; Hindus 110; occupied houses 41.

Kharamsera, tahsil Raghurājnagar:—A village lying 24 miles south west of the *tahsil* headquarters in 24° 18' N., and 81° 6' E. Formerly, it was the headquarters of a *tahsil* of the same name. It possesses an old *garhi* built by the Raikwār Rājputs. Population (1901) was 1,880; Hindus 1,191; occupied houses 276.

Kharwāhi, tahsil Raghurājnagar:—This village lies ten miles south of Satna town in 23° 53' N., and 80° 50' E. It contains an old fort now in a dilapidated condition which is said to have been built by the Raikwār Kshatriyas. It is one of the largest villages of the *tahsil*. A customs *chauki* is located here. The river Tons flows to the west of the village. Population (1901) 666; Hindus 597; occupied houses 133.

Khatai, tahsil Bardi:—A village 14 miles east of Bardi in 24° 31' N., and 82° 40' E. The descendants of the old Rājās of Bardi reside here. Population (1901) was 943; occupied houses 157.

¹ C. A. S. B., XXV, 116-141; I. A., I, 278; IX, 120.

Khatkhari, tahsil Mauganj:—A village lying 8 miles from Mauganj on the Great Deccan road in $21^{\circ} 42' N.$, and $82^{\circ} 6' E.$ It has a vernacular school and a large bazar. Population (1901) 1,496.

Kothara, tahsil Raghurājnagar:—This place is situated 10 miles to the north of Satna town in $21^{\circ} 42' N.$, and $81^{\circ} 5' E.$ It contains an old *garkhī* built by Mahārājā Bhao Singh in 1675.

Kripālpur, tahsil Raghurājnagar:—Situated in $24^{\circ} 36' N.$, $80^{\circ} 59' E.$, on the left bank of the river Tons opposite to Mādhogarh. It is the birth-place of the present Mahārājā and the chief seat of a Thakurāt. Population was, in 1901, 1,270; of whom 1,183 were Hindus; occupied houses 254.

Lālpur and Bathia, tahsil Raghurājnagar:—These places lie 5 miles to the north of Satna town in $24^{\circ} 37' N.$, and $80^{\circ} 55' E.$ A very large lime-stone quarry which is being worked by the Satna Stone and Lime Company, is situated here. Population (1901) 813 persons; occupied houses 162.

Laur, tahsil Mauganj:—A village lying in $24^{\circ} 41' N.$, and $81^{\circ} 49' E.$, 10 miles west of Mauganj on the Great Deccan road. It contains an encamping ground and customs and police *chaulī*.

Though a very small village in point of population, it is a very important centre of trade. Most of the local merchants trading in food grains and other articles of export resort to this place to make purchases, and the population of Baniās is far above the average. Close to the village stands the temple of Somanāth and the Der Talāo where the biggest fair held in the State takes place on *Shivarātri*. Population (1901) 222 all Hindus; occupied houses 41.

Lūk, tahsil Tonthar:—A village lying in $21^{\circ} 51' N.$, and $81^{\circ} 32' E.$, 6 miles south-east of Sitalha. It contains many archaeological remains of interest. Population (1901) 791 persons; occupied houses 108.

Mādhogarh, tahsil Raghurājnagar:—Situated five miles to the east of the Satna town on the Satna-Bela metalled road and the right bank of the Tons in $21^{\circ} 31' N.$, and $81^{\circ} 0' E.$ Formerly it was the headquarters of the *tahsil*. It contains a very fine *garkhī*, a vernacular middle school, a police *chaulī* and a good bazar. Population was, in 1901, 3,335; males 1,621, females 1,711. Hindus numbered 2,077; occupied houses 1,000.

Majhauī, tahsil Rāmānagar:—A village situated 24 miles east of Rāmānagar in $24^{\circ} 7' N.$, and $81^{\circ} 43' E.$ It is a *rail* station of the Forest Department where a forest produce depôt in charge of a *dāūdār* is located. A stock of lac is always stored here. Population (1901) 6.

Makundpur, tahsil Hazūr:—A large village, 10 miles south of Rewah town, in $24^{\circ} 24' N.$, and $81^{\circ} 20' E.$, which contains the ruins of an old fort reputed to be the birth-place of Akbar Shāh II. There are many Jain images lying about very similar in their appearance to those at Khajūrāho in the Chhatarpur State. At Sukulgaon close by and on the banks of the Rūpsāgar tank are the remains of old temples and fine

stone *ghāṭa*. The chief temple which now enshrines a *lingam* is constructed from the remains of an old Vaishnav temple as Vishnu seated on Garuda can still be seen carved on the doorway.¹ Close by there is a marsh named Bhadya in which the *keora* or screw-pine (*Pandanus odoratissimus*) grows in large quantities from which *keora*-water and perfume are manufactured. Makundpur is also the headquarters of a forest inspector. A workshop which turns out furniture is attached to the forest *chauli* here.

Makundpur is traditionally said to be the birth-place of Akbar II. In 1758 his father, Ali Gauhar (Shāh Alam), fled here after the failure of his attempt on Patna.²

This place is connected by the Bela-Gorindgarh metalled road with Rewah. A fair called the *Takia of Shāhzāda* is held annually in the mouth of *Chuit*. Population was, in 1901, 1,551; Hindus 1,287; occupied houses 310.

Mangawān, tahsil Huzūr:—A village situated on the Great Deccan road, 18 miles to the north-east of the Rewah town, in 21° 40' N., and 81° 39' E. It contains an old tank named Malakpur. A police *thāna*, a customs *chauli*, a vernacular school, a dispensary, and a branch Imperial post office are located in it. It also contains the ruins of an old *garhi*. It is chiefly inhabited by petty traders who deal in the export of food grains; a considerable trade in food grains and linseed being carried on. The Great Deccan road affords facility for carriage to traders, and the agents of the big Satna grain merchants visit the place regularly. Population (1901) 3,143; Hindus 3,123; occupied houses 608.

Mānpur, tahsil Rāmnagar:—A large village situated 38 miles south of Rāmnagar in 23° 46' N., and 81° 11' E., connected with its country track. It has a police *thāna*, a headquarter *chauli* of the customs department in charge of an inspector, and a forest *chauli*, a vernacular school and a dispensary. Population (1901) 1,916 persons; males 937, females 1,009; Hindus numbered 1,796; occupied houses 380.

Māra (Muri), tahsil Bardī:—A small village situated in 23° 58' N., and 82° 35' E., the Mur of our maps. This village is remarkable for the series of rock-cut caves which have been excavated in a neighbouring hill. There are three groups of caves called the *Bura-dan*, *Chhewar* and *Rāvan*. Some of the caves are ornamented with sculptures of a rude kind. They date from the 4th to 9th century. Several are of large size, one called the *Diyāh-māra* or marriage cave, being constructed inside on the plan of a structural temple; it is, however, unfinished.³ Population (1901) 217; Hindus numbered 200; occupied houses 36.

Marwās, tahsil Rāmnagar:—A village situated in 24° 7' N., and 81° 52' E., being the chief seat of a big *ilākādār* belonging to the Baland tribe. It is 11 miles south-east of Majhauri.

The *ilākādār* is popularly known as the Rājā of Marwās, though the title is not recognised by the Darbār. He considers himself a

3. C. A. S. R., XII, 20-31.

representative of the family of "Karan Rājā," possibly the Chedi Chief Karandev (1012-1122). Population (1901) 46.

Manganj, tahsil Manganj :—Headquarters of the *tahsil* situated in $21^{\circ} 39' N.$, and $81^{\circ} 53' E.$, 71 miles east of the Rewah town. It is composed of the two separate villages of Mau and Ganj.

Population was, in 1901, 1,804 persons; males 810, females 974, comprising Hindus 1,137 or 79 per cent., Animists 360 or 20 per cent., others 7; occupied houses 360. At Der Talao 10 miles west is an old tank with a temple to Somanāth and many old remains. A big fair is held there on *Shivārātri*. The town stands on the Great Deccan road, 40 miles from Rewah, 61 from Mirzāpur and 71 from Satna.

An inspection bungalow, a police station, a vernacular school and an Imperial post office are situated here.

Mowhāz, tahsil Baghurājnagar :—A village lying 30 miles to the south-west of the *tahsil* headquarters on the Kaimur range in $24^{\circ} 18' N.$, and $81^{\circ} 4' E.$ It has been deserted about 50 years but was once an important place. It contains an old fort named Jhānjhanagarh which is said to have belonged to Mahil Parihār, who was a conspicuous leader among the allies of Parmārdideva (Parmāl), the Chandella, Rājā of Mahoba. Population (1901) was 379; Hindus 331; occupied houses 72.

Naigārhi (Naigarhi), tahsil Manganj :—A large village situated 10 miles to the north-west of Manganj in $21^{\circ} 46' N.$, and $81^{\circ} 51' E.$ It is the chief seat of a big Sengar Thākur. Population (1901) was 1,591; males 801, females 790, comprising 1,013 Hindus, 450 Musalmāns; occupied houses 307.

Namnās, tahsil Rāmnagar :—A village 6 miles south-east of Rāmnagar, situated in $21^{\circ} 5' N.$, and $81^{\circ} 16' E.$, on the right bank of the Son. An annual fair is held here on the *Shivārātri*. A temple said to be very old stands in the village. Population (1901), 306; Hindus 178; occupied houses 61.

Notgāin, tahsil Bardī :—A village lying $21^{\circ} 29' N.$, and $82^{\circ} 23' E.$, 10 miles south of Sihāval in north-east. It is the headquarters of the Forest Department, a large depot being located here. Population (1901) 417; Hindu 411; occupied houses 74.

Pabhat, tahsil Teonthar :—A village lying 13 miles north-west of Sohāzi in $25^{\circ} 9' N.$, and $81^{\circ} 48' E.$, well-known for a quarry of building stones. Population (1901) 791; Hindus 711; occupied houses 108.

Pāli, tahsil Sohāgpur :—Large village and railway station situated in $23^{\circ} 22' N.$, and $81^{\circ} 8' E.$ It has a bazar of rising importance. It is the chief seat of the Gond Thākur of Singhwāra. Many remains of old Jain images are to be seen in the Hindu temples here. It has customs, forest and police *chaulī*s located in it, and is the headquarters of the Forest Ranger of the Sohāgpur Circle.

A big fair is held here in honour of Devī during the *nararātra*, in the months of *Kumār* and *Chaitra*.

Population was (1901) 1,212; males 618, females 594, comprising 810 Hindus and 321 Animists; occupied houses 240.

Falija, tahsil Rāmnagar :—A large village 8 miles south-east of Amarpur in $23^{\circ} 50' N.$, and $81^{\circ} 0' E.$ A good garden is maintained here. Population (1901) 82; occupied houses 16.

Piāwan, tahsil Raghurājnagar :—A small village 7 miles from Somaria containing an old record on the *argha lingam*, dated in 789 of the Chedi era or 1038 A. D. of Gāngeyadev Kalachuri who is mentioned by Al Beruni as ruler of Dāhālu;¹ close by lies the village of Kakredi in Pannā State, from which records of the Māhārānakas of this region were obtained.²

Population (1901) 521; Hindus 390; occupied houses 66.

Pipra, tahsil Bardi :—A village 8 miles east of Wairhan in $28^{\circ} 58' N.$, and $82^{\circ} 45' E.$ It is known for ores of mica and corundum which occur there. Population (1901) 475; Hindus 445; occupied houses 79.

Purwa, tahsil Raghurājnagar :—A village and fall on the Tons river 17 miles north of Rewah in $24^{\circ} 47' N.$, and $81^{\circ} 19' E.$ The fall is 240 feet high. A fair is held every Monday 2 miles off in honour of Baswan Baba. Population (1901) 521; Hindus 390; occupied houses 149.

Raghunāthganj, tahsil Huzūr :—A village situated in $24^{\circ} 40' N.$, and $81^{\circ} 42' E.$, 24 miles to the east of the Rewah town on the Great Deccan road. Though comparatively a very small place, its importance as a trading centre is considerable and it is often visited by merchants from Mirzāpur. Population (1901) 787; Hindus 567; occupied houses 157.

↳ **Raghurājnagar—Vide Satna.**

Rāmnagar, tahsil Rāmnagar :—Formerly headquarters of the *tahsil* situated at $24^{\circ} 12' N.$, and $81^{\circ} 14' E.$, 30 miles south of Rewah town and 18 miles south of Govindgarh.

Population was, in 1901, 2,621 persons; males 1,811, females 1,810; Hindus numbered 1,760 or 67 per cent., Jain 1, Musalmāns 247 or 9 per cent., Animists 613 or 23 per cent.; occupied houses 524.

It contains a fine stone fort, a vernacular school, a post office, a customs *chauki*, a police *thāna* and a dispensary. It is connected by an unmetalled road, 15 miles in length, with Govindgarh, whence a metalled road leads to Rewah town: it is also joined to Amarpātan and Satna by a fair weather road. Most of the traders from this district take their goods to Satna.

The place is noted for the manufacture of *sarautas* or betel-nut cutters.

Rāmpur Baghel, tahsil Raghurājnagar :—A village lying in $23^{\circ} 29' N.$, and $81^{\circ} 10' E.$, 15 miles east of Satna on the road to Rewah. Is the headquarters of the Rāmpur Baghel Thākurs. Has a school, a post office, a *thāna* and an inspection bungalow situated in it.

Population (1901) 1,844; Hindus 1,552; occupied houses 868.

Raūlpur, tahsil Huzūr :—The chief seat of a Thākur. Population (1901) 743; Hindus 666; occupied houses 148.

1. C. A. S. R., XXI, 112; E. I., II, 304.

2. I. A., XVII, 235.

Rewah Town, tahsil Huzūr :—The chief town of the State and headquarters of the Huzūr tahsil, situated in $24^{\circ} 32' N.$, and $81^{\circ} 24' E.$, 1,045 feet above the sea. It is 31 miles by metalled road from the Satna Railway Station on the East Indian Railway.

The town is situated in a picturesque spot near the junction of the Bihar and Bichhia rivers, which after their junction force their way through a deep rocky channel and are called the Ghoghar. The town has spread considerably of late years and now covers an area of about 1,000 acres.

Traditionally it is said to have been built by Mahārāja Vikramāditya in 1618, and the familiar tale is told of the chase of a hare which defended itself against the dogs at this spot, and thus determined the Rājā in his choice of a site. This, however, is incorrect, as it was already a place of importance in 1554 when it was held by Jalāl Khān, son of the Emperor Sher Shāh, who, on hearing of his father's death, moved to Kālinjar and was raised to the throne as Islām (Salīm) Shāh.

Rewah became the chief town after the destruction of Bāndhogarh, the old capital, by Akbar in 1597.¹ Vikramāditya added palaces and other buildings and raised it from the position of a fortified town to one befitting the capital of a large State. In about 1731 Rewah was attacked and sacked by Hirdē Shāh of Pannā, Rājā Ardhūt Singh flying to Partābgarh in Oudh.

The old town is still enclosed by a wall 20 feet high. The most prominent feature is the palace. On the east side the town is entered through the *jhāla darwāza* (swing gate) a very finely carved gateway taken from the old town of Gurgi Masaun of which the remains lie 12 miles east of the capital. In 1882 a large part of the modern town was destroyed by a flood. Between the old walled town known from its high level as the *uparāhati* and the modern extension or *tarāhoti* (low lying) lies a deep ravine. This is crossed by a causeway at a point known as the *Bundelā darwāza*, from a gate that formerly stood there, which the Bundelās erected after their capture of the town.

The different sections of the town are the *Bichhia muhalla*, formerly called Ranbahādurganj, lying on the east along the Bichhia river, and chiefly inhabited by the lower classes, and the *Khalga muhalla* to its north. A part of the latter section is known as *Bābu Sāheb-ka-kātra* where a vegetable market called the Mangli Bazar is held.

Pānde Tola is a quarter which was formerly held by the Pānde banking community, who were once the richest men in the town, their prosperity has now passed away, as the big empty stone houses testify.

The Muhammadan population inhabits the *Nagadiā* and the *Ghoghar muhallas*, the latter situated on the stream of that name. The town is not a trade centre and but little export or import trade is carried on save for the supply of local wants. Women called *Kochanis* bring in supplies on pack animals. Piece-goods, salt and sugar are the chief imports.

The houses of the people generally are not in any way remarkable. Those of the poor are mere mud huts while even the

¹ *Maasir-ul-Umara* (Persian Text), 223.

well-to-do show only in a few instances any desire to improve the construction of their dwellings. A courtyard surrounded by rooms, varying in size with the wealth of the owner is the plan of most dwellings, roofs are tiled and owing to the depredations of monkeys are kept covered with *babul* thorns. The chief buildings in the town are the palace of Visvanāth Singh, the *kothi* or new palace erected in 1883, and the State offices. To the south-east lie the military lines and a large parade ground.

In a garden known as the Lakshman Bāgh are five modern Vaishnavite temples erected by the Chiefs. The *Srāmī* or High Priest of the State, the spiritual director of the Rewah Chief, is the head of the Lakshman Bāgh. Three generations back the Chief of Rewah became an ardent supporter of Vaishnavism. An income of Rs. 10,000 a year is attached to the post and the *Srāmī* has great influence in temporal as well as spiritual matters. Many other religious edifices, about 200 in all, stand in the town of which the temple of Madan Mohanjī, erected by the Māhārājī Rānārāt Sāhībā in 1875, the temple to Shri Raghunāth by a late Divān in 1850 and one to Rājādhirāj by Mahārājā Visvanāth Singh in 1833 are the most important.

Population was in 1881, 22,016; 1891, 23,626; 1901, 21,608 persons; males 12,202, females 12,406. The town population increased by 11 per cent. between 1881 and 1901 and by 4 per cent. in the last Census decade. Hindus numbered 19,274 or 78 per cent., Sikhs 23, Jains 93, Musalmāns 5,097 or 20 per cent., Christians 14, Animists 107; occupied houses 5,129. The principal castes were 4,162 Brāhmins, 1,200 Kshatriyas, 2,276 Baniās, 2,333 Kāhārs, Mallāhs and Kewats, 1,511 Chāmārs, Doms and Bhangis, and 1,062 Kāyasthas, besides other classes. Of the occupations followed State service employed 5,943, artisans numbered 3,535, day labourers 3,372, domestic servants 2,259, shopkeepers 2,173 and agriculturists 1,776. Of the whole community 12,618 were actual workers and 11,960 dependents.

The town contains several schools, a High School with a Boarding House for sons of people of position attached to it, with an attendance of about 300 scholars, four Girls' Schools with 150 pupils, and other institutions of a private nature.

The Victoria Hospital, a Jail, Printing Press, combined Post and Telegraph office, a Guest-house and many charitable institutions are also located in the town. Watch and ward of the town is kept by a force of 111 policemen.

Sahdol, *tahsil* Sohāgpur:—Large village in 23° 18' N., and 81° 20' E., and railway station for Sohāgpur town. It is a considerable trade centre in this part of the State and its bazar is fast growing in importance. It is also the headquarters station of the customs and forests inspectors of Sohāgpur. Population (1901) 1,598; males 904, females 694, of whom 1,140 were Hindus; occupied houses 266.

Satna (Raghurājnagar), *tahsil* Raghurājnagar:—Headquarters of the *tahsil* situated at 24° 34' N., and 80° 55' E. It is also the headquarters of the Political Agent in Baghelkhand.

It is a place of considerable commercial importance and the principal centre of trade in the State, the value of exports and imports passing through the town being about 4 lakhs a year.

The town is clean and well built with many good houses. To the west of the town and across the railway lie the Agency limits containing the residence of the Political Agent, offices and other buildings. Satna was selected as the Agency headquarters in 1872.¹ During the earlier days of the Agency the Political Officer lived at Nāgod. The Agency occupies 95 acres and has a population (1901) of 382 persons; males 248, females 134. Population of Satna town was in 1881, 5,385; 1891, 6,771; 1901, 7,027 persons; males 3,649, females 3,378. The population has increased by 30 per cent. since 1881. It comprises Hindus 5,626 or 80 per cent., Jains 181, Musalmāns 1,097 or 15 per cent., Animists 110, others 10; occupied houses 1,487.

A High School, Government dāk bungalow, combined post and telegraph office and an Agency hospital and State dispensary are situated in the town. Satna is also situated on the Jabalpur-Allahābād Section of the East Indian Railway and is connected by metalled roads with Rewah (31 miles), Pannā (45 miles) and Nowgong (101 miles).

Semaria, tahsīl Raghurājnagar:—A village lying 32 miles to the north-east of the tahsīl headquarters in 24° 38' N., and 81° 15' E. It formed the chief seat of the State of the same name which was granted to a junior branch of the ruling family. An abundance of mango groves and old stone rivetted tanks are the remarkable features of the place. Good betel-nut crackers (*sarautas*) and axes are manufactured here. It contains a vernacular school, a customs *chaulī* and a police *chaulī*. A big fair is held at Hardua, 3 miles off, in April and November in honour of Nanda Bāba. Population was, in 1901, 1,622, comprising Hindus 152; occupied houses 1,201.

Sidhi, tahsīl Bardī:—Already mentioned as the headquarters of a Chauhān Thākūr lying 30 miles west of Sihāwal in 24° 20' N., and 81° 58' E. A police *thāna* is located here. Population (1901) 150; Hindus 372; occupied houses 75.

Sihāwal, tahsīl Bardī:—The headquarters of the tahsīl is situated in 24° 31' N., and 82° 20' E., 30 miles south-east of Manganj by country track.

Population was, in 1901, 198 persons; males 99, females 99, almost all Hindus; occupied houses 33. The place is of no importance except as the headquarters of the tahsīl. It has a vernacular school, a branch post office and a dispensary in it.

Sitlāha, tahsīl Teonthar:—A village on the right bank of the river Tone, 20 miles east of Dabhaura on the Teonthar road, situated in 24° 57' N., and 81° 36' E. Has an old stone fort standing in it. Formerly it was the headquarters of the tahsīl. Adjoining it is Nagma village held in *paipakhār* by a rich Brāhman banker. It is noted for the manufacture of sword-blades and also possesses a good bazar. A post office is located here. Population (1901) 701.

1. For a list of Political Officers attached to the Rewah State, see Appendix E.

Sohāgī, tahsīl Teonthar:—An important village situated on the Mangwān-Allahābād road in $24^{\circ} 59' N.$, and $81^{\circ} 48' E.$, 15 miles east of Sitlāha. It is the headquarter station of the customs department in the Teonthar tahsīl. The lime-stone quarried here is of first class quality. It contains a vernacular school and a police thāna. Population (1901) 965; Hindus numbered 791; occupied houses 191.

Sohāgpur, tahsīl Sohāgpur:—Headquarters of the tahsīl situated in $23^{\circ} 19' N.$, and $81^{\circ} 26' E.$ Traditionally it is supposed to have been the capital of the Virāt King with whom the Pāṇdavas took refuge. It is the chief seat of the Thakur of Sohāgpur, one of the biggest landholders under the Darbār. It is a place of some commercial importance.

Almost in the centre stands a large palace, a heterogeneous mass of buildings surrounding a large courtyard. It is constructed partly of brick and partly of stone, the latter being almost entirely taken from older structures, while the numerous pillars employed have all been taken from temples, and differ in ornamentation and appearance. Among these remains are many Jain relics. One mile south-east of the present town are the ruins of an older settlement, full of ancient remains. One temple, in a moderate state of preservation, resembles in style those at Khajurāho in the Chhatarpur State. A figure of Ganesh is cut over the door of the sanctum which is profusely ornamented with carving. The spire is graceful and of curvilinear form, not unlike those at Khajurāho. The sculpture is fine but in many cases highly obscene. The temple probably belongs to 12th century.

To the east of the temple numerous ruins lie scattered over a wide plain. This once had eight groups of temples upon it, but these have been destroyed and almost all the stones have been removed and used in buildings in the present town. Saṭī stones, images of the gods and Jain Tirthankars lie strewn around. The site is one which requires careful and systematic exploration.¹ At Jamni village 3 miles south are more remains. Population (1901) 2,126; Hindus numbered 1,525; occupied houses 215.

Teonthar, tahsīl Teonthar:—Headquarters of the tahsīl situated in $24^{\circ} 59' N.$, and $81^{\circ} 45' E.$ Population was, in 1901, 1,593 persons; males 809, females 784, of whom Hindus numbered 1,244 or 77 per cent., Musalmāns 256, Animists 93; occupied houses 110. A branch Imperial post office, a vernacular school and a dispensary are situated in the town. It is 30 miles east of the Dabhaura station on the East Indian Railway, which is reached by a fair weather road.

Umaria, tahsīl Sohāgpur:—Town and centre of the coal fields, situated in $23^{\circ} 31' N.$, and $80^{\circ} 55' E.$, 1,500 feet above the sea.

Population 1901, 5,381 persons; males 2,925, females 2,456. Hindus number 3,496 or 65 per cent., Jains 28, Pārsī 1, Musalmāns 902 or 16 per cent., Christians 21, Animists 933 or 17 per cent.; occupied houses 1,238.

The town came into existence on the opening of the mines in 1881. The coal fields are situated in the Supra Barākar and Lower Barākar divisions of the Gondwānas. The former rock consists of variegated

¹ C. A. S. R., VII, 239.

clays, the latter of sand stones and shales through which the coal seams run.¹ The field has a dip of one in sixteen towards the north-east on its western side, towards the north-west on the eastern border, and northwards in the centre. The seams at places reach a thickness of 31 feet. Borings shew that the area occupied by the coal is very extensive, the proved area being estimated to contain 2½ million tons of coal. The coal is, except in a few places, of a dull laminated variety much impregnated with fossilized resins. Analysis gives Calorific value 55·40, Fixed Carbon 53·08 per cent, Ash 20·45, Coke 73·66, Volatile matters 26·33, Sulphur 1·16. It does not coke well, and gives a white ash, forming little or no clinker. The coal is worked both through pits and inclines. The pillar and stall method is employed, the pillars being destroyed on reaching the coal boundary. The gallery roofs are supported with logs of *sāl* (*Shorea robusta*) from the State forests.

There are ten seams, of which two are now in work. The output is regulated by the demand, but the mine could, if required, put out 1,000 tons a day, though the actual maximum output in any one day had reached 890 tons. Between 1883 and 1903, 1,877,571 tons have been extracted. The actual output in 1903 was 193,277 tons and in 1904-05 175,740 tons, of the respective value of 7·4 and 7·2 lakhs. The average yearly profits amount to about 3 lakhs. The Great Indian Peninsula Railway takes 70 per cent. of the output. The mine was worked by the State from 1883 to 1885 when it was taken over by the Government of India. In 1900 it was replaced under the Darbār.

The workers number 1,279, among them 312 Musalmāns, 295 Kols and 102 Gonds, the rest belonging to various classes. The average number of workers is, above ground, 22½ men and 6 women, below 1,258 men and 285 women; a total of 1,723.

A hewer earns about 5 annas a day, tram-pusher 3 annas, mates 12 to 25 rupees a month.

Accidents have been very few. Between 1881 and 1901 there were only 0·62 per cent. serious accidents, on the number of workers, and 0·13 fatal. A special hospital under a qualified Assistant Surgeon is maintained for the use of the Colliery.

The European Managing Staff consists of a Superintendent and Manager, an Assistant Manager and Surveyor, an Overman and an Underlooker, all of English experience, with other locally trained subordinates.

A Post and Telegraph Office stand in the town. Umariā is situated on the Katni-Bilaspur Branch of the Bengal-Nāgpur Railway.

Wairhan, tahsil Bardi :—Nownagar of maps in 24° 2' N., and 82° 41' E. A village situated 4 miles east of Kachni. This is the most important place in the *ilāka* of Singrauli and has a police *thāna*, customs and forest *chaukis* and a dispensary located in it.

Note on the early Chiefs of Rewah, and their Chronology.

It is almost impossible to assign dates to the early chiefs of Rewah. The accounts which have been compiled in late years under the auspices of the Darbār are the most hopelessly incorrect and confusing narratives.

As examples of their untrustworthiness it may be mentioned that the 12th chief is said to have been contemporary with Timūr Shāh (14th century) and at the same time is said to have flourished in P. S. 1026 or 1059 A. D., while the 11th chief Bariār Dev is said to have married a daughter of Parmāndilera (Parmāl), the last great Chandel ruler (1167-1215).

The first certain date we have is that for the 10th chief Bhitra who was contemporary with Bahlol and Sikandar Lohi. From his time onwards up to Anōp Singh the Muhammadan historians give the duration of each chief's rule. The early date of A. H. 631 or 1234 A. D. given for Vyāghra Dev, limits us at the other end.

The first fourteen chiefs ruled between 1234 and 1470, about 17 years to each chief.

- 1 Vyāghra Dev ... The founder of the Baghelkhand (Baghel hono-). He came from Gujarāt to Baghelkhand in A. H. 631 or 1234 A. D. He obtained Murlha fort and married Sindur Matī, daughter of Makand Dev Chandrayat. He had five sons, of whom Karan Dev succeeded his father, while Kandhor Dev became the founder of the Bara Rājā (Allahābad District).
- 2 Karan Dev ... Married Padma Kunwari, daughter of Soma-datta Harihaya of Itanpur (Central Province), receiving the fort of Bhandhargah as part of her dowry, which he made his capital.
- 3 Sohāg Dev ... Married a daughter of the Rājā of Bijapur. Some accounts state that he founded Sohāgpur, which certainly contains 15th century remains.

4	Sārang Dev ...	Married a daughter of the Parihār chief of Barmai (Nāgod).
5	Bilas Dev ...	Married a daughter of Uira Singh Kachhwāha of Gopālpur (Urai District).
6	Bhimmal Dev ...	Married a daughter of Bhāgat Rai, <i>Sūrya Vanshī</i> , of Ratanpur.
7	Anik Dev ...	Married a daughter of Jayarāj Singh, Gaharwār of Bijaiipur (United Provinces).
8	Balan Dev ...	Married a daughter of Ranjit Rai, Rājā of Ratanpur.
9	Dalakeshwar or Dal Kishor,	Married a daughter of Rūp Rām, Rājā of Baliswāra.
10	Malakeshwar ¹ or Mal Kishor,	Married a daughter of Kishor Singh, Rājā of Nāgod.
11	Dariār Dev ...	Married a daughter of Parmāl Dev Chandella. This cannot be the chief who ruled from 1167 to 1213.
12	Ballar Dev ...	Married a daughter of Hanumān Singh of Nāgod.
13	Singh Dev ...	Married a daughter of the Rājā of Nāgod. This Rājā drowned himself in the Ganges.
14	Bhairav Dev ...	Married a daughter of Kirat Dev, Rājā of Narwar (in Gwalior State). A Kirti Singh is given in the list of Tonwāra chiefs of Gwalior and Narwar, who ruled from 1454-79, which agrees with this chief's date. ²
15	Narhar Dev ...	Married a daughter of Bhagwant Singh of Nāgod.

¹ Cunningham speculated as to whether these were the Dalaki and Malaki of Ferishta and Minhaj-us-Siraj See C. A. S. R., XXI, 105.

² Circ., 1450.

- 16 1470-1493 Jhagra Dev ... The Rājā Dhill of Muhammadan writers, contemporary with Dhill I and Sikander Lohi. Married a daughter of Bhaten Dev, Rājā of Bhaten, and of the Rājā of Chaur. The chief's younger brother, Jansah Dev, founded the Jansaha family in Tondar district.
- 17 1493-1500 Sakhari ... Attributed by Sikander Lohi. Married a daughter of Sumar Singh Bhai Rājput, Rājā of Dhanushkhera (Uda District of Ondh).
- 18 1500-1510 Loh Singh (Dev). Married a daughter of Mahan Singh Kachhwal. His younger brother founded the Koutu (Koutu) family, who were later on displaced and succeeded Khut-Maphar, in Harar 1542, where their descendants live.
- 19 1510-1525 Vidhva ... Married a daughter of Sakh Singh Kachhwal. Rājā of Gopāpur. His younger brother, Jansah, founded the Jansaha family, and the younger Bhat Dev, Bhat and Dev, founding the Bhat and Bhatnagar families.
- 20 1525-1532 Ratan Chandra ... Generally known as Rājā Ratan Singh. Well known in Akbar's day. Copper-plate grant of 1532 known.
- 21 1532-1540 Vidhva (Dev). He died from the effects of an accident while on his way to Panthpith from Delhi to occupy the *gaddi*.
- 22 1540-1621 Vikramaditya ... It is curious that the State accounts do not mention the next chief but continue this ruler's period down to 1640. He is always

erroneously credited with building Rewari. He married a daughter of Rājā Māndhātā, the Sarnat Rājā of Bansi in Oudh.

- 23 Duryodhan ... The *Maā'ir-ul-Umra* states that in the 47th year of Akbar (1602) Duryodhan, the grandson of the deceased Rājā, was recognized as chief, and being a minor one Bhārtī Chaud was appointed his guardian. This shews that Vikramāditya was then dead.
- (The State Lists omit this chief, but there is no doubt as to his succession as he is specifically mentioned in contemporary histories.)
- 24 1624-1640 Amar Singh ... Married a daughter of Pratāp Singh, Rājā of Ratanpur. His brother Indra Singh received Pathrahat (now Mādhogarh) and is still represented by the Thākurs of Baidā-dih and Kripālpur. The Thākurs of Pannarsi in Teonthar taluq are descended from another brother Sarūp Singh.
- 25 1640-1660 Anūp Singh ... Married a daughter of Mohan Singh, Chandel chief of Agori (Mirzāpur District). His brother Patel Singh founded the Sohāwal chiefship.
- 26 1660-1690 Bhao Singh ... Married a daughter of the Rānā of Udaipur. His brothers Jaswant Singh and Jujhār Singh received Semaria and Rāmnapur in *jāgīr*. The latter is represented by the Itwān and Deorājnagar Thākurs.
- 27 1690-1700 Aniradh Singh... He was a son of Jaswant Singh adopted by Bhao Singh. He married a daughter of Fakir Shāh, Rājā of Partābgarh. He was killed in a fight with the Manganj Sengais.

- 28 1700-1755 Avdhūt Singh ... Succeeded at six months old. Rewah was attacked by the Bundelā chief, Hirdē Shāh of Pannā, and Avdhūt fled to Partābgarh in Oudh.
- 29 1755-1809 Ajit Singh ... Married a daughter of Anūp Singh Gaharwār of Bijnāpur and also daughters of the Dikshīt Rājā of Gornāya, and of Vikram Singh of Silpāra, both in the State.
- 30 1809-1833 Jai Singh (Dev)... Made treaty with the British. Married a daughter of Udwat Singh, Gaharwār of Madā, and also of the Gorāiya Dikshīt Rājā. He had three sons. The eldest succeeded, Lakshman Singh founded the Mādhogarh family, and Balbhadrā Singh the Amarpātān Thakurāt. Both estates have lapsed for want of heirs. A daughter of Jai Singh married the Udaipur chief.
- 31 1833-1851 Visvanāth Singh... Married a daughter of the Rājā of Madā, of the Nāgod chief, and of the Chandel chief of Bardī and of the Teonga family. He had two daughters who married Rām Singh, Mahārājā of Jaipur, and Muhabbat Singh, a son of Mahārājā Takht Singh of Jodhpur.
- 32 1851-1880 Raghurāj Singh, Married eight wives, one being a daughter of the Udaipur chief. His two daughters married Kishor Singh, a brother of Mahārājā Jaswant Singh of Jodhpur and another the Bāndī chief.
- 33 1880— Venkat Raman Singh, G. C. S. I., Has married twice, once the daughter of the Mahārājā of Dumraon, and secondly the sister of the present Rājā of Ratlām.

APPENDIX B.

**TREATY of FRIENDSHIP and DEFENSIVE ALLIANCE
concluded between the BRITISH GOVERNMENT and
the RAJAH JEY SING DEO, RAJAH of REWAH
and MOOKUNDPORE—1812.**

Although the relations of amity have uniformly subsisted between the British Government and the State of Rewah, and especially since the augmentation of the intercourse between the two States by the annexation of a portion of the province of Bundelcund to the British dominions, those amicable relations have been cultivated and improved by reciprocal acts of friendship, yet no formal engagements, imposing upon the two parties specific obligations with respect to each other, have hitherto been concluded; and Rajah Jey Sing Deo, the present ruler of Rewah and Mookundpore, having now expressed a desire that this defect should be supplied by the conclusion of a Treaty of friendship and defensive alliance, and the Right Honorable the Governor-General in Council being cordially disposed to accede to the wishes of the Rajah in this respect declared; the following Articles of Treaty are by mutual consent concluded between the British Government and the said Rajah Jey Sing Deo, his heirs and successors:—

ARTICLE 1.

The Governor-General in Council acknowledges Rajah Jey Sing Deo to be the lawful possessor of the present dominions of Rewah, which have been held by him and his ancestors in successive generations during a long course of years, and in compliance with the Rajah's request, and for his entire satisfaction, assures him agreeably to justice and the uniform principles of the British Government, that so long as the aforesaid Rajah, his heirs and successors, shall truly and faithfully fulfil the obligations of friendship and alliance according to the true spirit and intent of this Treaty, it will not commit hostilities against the Rajah of Rewah, nor take possession of or in any way encroach on any part of his territories. On the contrary, the British Government engages to protect and defend the dominions at present in the Rajah's possession from the aggressions of any foreign power in the same manner as the dominions of the Honorable Company are protected and defended.

ARTICLE 2.

The British Government having, by the terms of the preceding Article, engaged to protect the territories at present possessed by the Rajah of Rewah from the aggressions of any foreign power, it is hereby agreed between the contracting

parties that whenever the Rajah shall have reason to apprehend a design on the part of any foreign power to invade his territories, he shall report the circumstances of the case to the British Government, which will endeavour by representation and remonstrance to avert such design, and if its endeavours to that effect shall fail of success, the British Government will be prepared, on the requisition of the Rajah, to detach a force of British troops into his territories for their protection. In which event the expenses of those troops during the period they may be so employed, calculating from the day of their entering the Rajah's dominions until that of their quitting them on their return, shall be defrayed by the aforesaid Rajah. If the apprehended design of invading the Rajah's territories shall be referable to any disputed claim between the Rajah and the other power, the Rajah shall report all the circumstances of such disputed claim to the British Government, which will then interpose its mediation for the adjustment of the dispute, and the Rajah, relying in the justice and equity of the British Government, agrees implicitly to abide by its award. If, notwithstanding the Rajah's acquiescence in that award, the other power shall persist in its hostile designs, the British Government will be ready to afford its assistance in the manner above provided. If any of the Rajah's troops shall at any time be required to serve in the British territories, the Rajah engages to furnish the same; and in that event, the expense of them, calculated at the rate of 20 Rupees per mensem for each horseman, and 6 Rupees per mensem for each foot soldier actually furnished by the Rajah, shall be defrayed by the British Government from the date of their leaving the Rajah's territories until that of their return. Whenever the troops of the British Government and of the Rajah shall have occasion to act together, the Commander of the Rajah's troops shall conform to the advice and act under the instructions of the British Commanding Officers.

ARTICLE 3.

The Rajah of Rewah being the acknowledged sovereign of his own dominions, the British Government will not consider itself entitled to take cognizance of any complaint which may be preferred to it by any of the relations, subjects, or servants of the Rajah, who on his part, shall not possess a claim to the aid of British troops for the support of his authority within the limits of his dominions.

ARTICLE 4.

If the Rajah of Rewah shall at any time have any claim or cause of complaint against any of the Rajahs or Chiefs allied

to or dependant on the British Government, the Rajah engages to refer the case to the arbitration and decision of that Government, and to abide by its award, and on no account to commit aggression against the other party, or to employ his own force for the satisfaction of such claim, or for the redress of the grievance of which he may claim. On the other hand, the British Government engages to withhold its allies or dependants from committing any aggression against the Rajah of Rewah, or to punish the aggressor and to arbitrate any demand they may have upon the Rajah of Rewah, according to the strict principles of justice : the Rajah on his part agreeing implicitly to abide by its award.

ARTICLE 5.

The Rajah of Rewah engages never to grant an asylum within his dominions to any enemies of the British Government, or to rebels, but on the contrary to exert his utmost endeavours for the apprehension of such persons, and if apprehended to deliver them up to the Officers of the British Government. The Rajah further engages not to permit the families of persons of that description to reside within his territories. If any of the enemies of the Rajah or the rebels to his Government shall take refuge within the British territories, the British Government, on receiving notice thereof from the Rajah of Rewah, will, after due investigation, pursue such measures with regard to the fugitives as equity and justice may appear to require, adopting at the same time every practicable means to prevent their committing any acts injurious to the territory and Government of the Rajah.

ARTICLE 6.

Whereas robbers issuing from the territories of the Rajah of Rowah frequently commit depredations in those of the Company, the Rajah engages, on receiving an application from the Officers of the British Government, to exert his authority for the purpose of arresting the persons accused of such crimes, and when apprehended to cause them to be delivered over to the said Officers.

ARTICLE 7.

If any of the brothers or servants of the Rajah of Rewah shall calumniate, misrepresent, or accuse the Rajah before the British Government, that Government will not without enquiry and proof give credit to the statements of such persons.

ARTICLE 8.

The honor, rank, and dignity of the Rajah of Rowah shall be estimated by the British Government in the same degree as

that in which they were estimated by the former Emperors of Hindoostan.

ARTICLE 9.

Whenever the British Government shall deem it expedient to send its troops into the dominions of the Rajah of Rewah, or to station or canton a British force within the Rajah's territories for the purpose of guarding against the advance or intercepting the retreat of an enemy, or of Pindarrahs, or other predatory bodies, it shall be competent to the British Government so to detach its troops, and the Rajah of Rewah shall give his consent accordingly. The Rajah shall also on any such occasion station his troops according to the advice of the Officers of the British Government at the Ghaut of Chundeah, Kawraah, or such Ghauts or passes as the British Commanding Officer shall point out. The Commanding Officer of the British troops which may be thus employed in the Rajah's territories, shall not in any manner interfere in the internal concerns of the Rajah's Government. Whatever materials or supplies may be required for the British Cantonments, or for the use of the British troops during their continuance in the Rajah's territories, shall be readily furnished by the Rajah's Officers and subjects, and shall be paid for at the price current of the bazar. If any materials which are indispensably necessary should happen not to be procurable by purchase, and it shall consequently become necessary to take such articles wherever found in the Rajah's dominions, the price of such articles shall be paid for by the British Government at the rate that may be settled by arbitrators appointed by the British Government and the Rajah respectively.

ARTICLE 10.

The Rajah of Rewah being admitted among the number of the Allies of the British Government, engages at all times to comply with any just and reasonable requisition connected with the interests and prosperity of that Government, to conform to its advice, and to the utmost of his power to fulfil the obligations of friendship and attachment towards the British power.

ARTICLE 11.

This Treaty, consisting of eleven Articles, having this day been concluded between the British Government and Rajah Jey Sing Deo, Rajah of Rewah, through the agency of Mr. John Richardson, in virtue of powers delegated to him by the Right Honorable Lord Minto, Governor-General in Council, on the one part, and Buxshy Baugwan Dhut, the vakeel of the

said Rajah on the other, Mr. Richardson has delivered to the said vakeel one copy of the Treaty in English, Persian and Hindec, signed and sealed by himself, and the said vakeel has delivered to Mr. Richardson another copy duly executed by the Rajah, and Mr. Richardson has engaged to procure and deliver to the said vakeel within the space of thirty days a copy ratified by the seal of the Company and the signature of the Governor-General in Council, on the delivery of which the copy executed by Mr. Richardson shall be returned, and the Treaty shall be considered from that time to have full force and effect.

Signed, sealed, and exchanged at Banda, on the Fifth of October A. D. 1812.

SECOND TREATY concluded between the BRITISH GOVERNMENT and RAJAH JEYSING DEO—1813.

Whereas on the 5th of October 1812, corresponding with 15th Kooar 1869 Sumbut, a Treaty of mutual friendship and defensive alliance was concluded between the British Government and the Rajah of Rewah; and Whereas the Rajah of Rewah having failed to fulfil the engagements which the aforementioned Treaty imposed upon him, the British Government was compelled, in vindication of its honor and its rights, to detach its troops into Rewah to enforce the execution of those engagements, and to obtain security for their due fulfilment in future; and Whereas the Rajah, having now returned to a proper sense of his relations with the British Government, and having expressed his contrition for the past, agrees to the following conditions, for himself, and for his heirs and successors.

ARTICLE 1.

All the stipulations of the treaty concluded on the 5th of October 1812, corresponding with the 15th of Kooar 1869 Sumbut, are hereby declared to be in full force and effect, in as far as they are not affected nor altered by the following conditions contained in this Treaty.

ARTICLE 2.

The Rajah of Rewah hereby binds himself to engage in no correspondence of a political nature with any Foreign State or Chief whatever without the privity and consent of the British Government, or its representative, the Agent in Bundelcund.

ARTICLE 3.

The Rajah engages to receive and permit to remain at his place of residence a news-writer or any other Agent on the part of the British Government or the Agent in Bundelcund, and to maintain an authorized vakeel with the Agent and with the Commanding Officer of any British detachment which may be stationed within his territory, both for the purpose of maintaining the general relations of amity, and of enforcing the supply of provisions, and ready compliance with the just demands of the Commanding Officer.

ARTICLE 4.

The Rajah of Rewah agrees to allow dawks to be established through his territory by the Officers of the British Government in any direction that may be deemed necessary, to compel his feudatory Chiefs to do the same, and to punish them in case of opposition; and the Rajah acknowledges the right of the British Government to punish them for such opposition, in the event of his own inability to do so.

ARTICLE 5.

Lall Zubburdust Sing, the jaghiredar of Chourhut, having, in a very insulting and contumacious manner, refused to permit the Hon'ble Company's dawk to be laid through his jaghire, the exemplary punishment of the afore-said jaghiredar is indispensable. The British Government is accordingly resolved to inflict exemplary punishment on this jaghiredar, and the Rajah of Rewah not only acknowledges the right of the British Government to do so, but agrees to aid and co-operate with the British troops in effecting that object.

The Rajah further engages to use his utmost means to punish Lall Zubburdust Sing himself, whenever the British Government shall require him to do so.

ARTICLE 6.

Frequent instances of robberies and other crimes have occurred within the British territory, the perpetrators of which issue from and take refuge within the Rewah territory; and thereby not only escape the punishment due to their crimes, but continue to infest the Hon'ble Company's adjacent territory with impunity, keeping the inhabitants in a constant state of alarm. With a view to suppress this evil, the Rajah hereby agrees to permit the troops or Police Officers of the British Government to pass into the Rewah territories for the pursuit and apprehension of all such offenders, and also to afford them, and to cause his

officers and jaghiredars to afford them, every necessary assistance in discovering and apprehending the objects of their pursuit.

ARTICLE 7.

The Rajah of Rewah agrees to consider those jaghiredars and others residents of his country, who have been well-disposed towards the British Government, on the present occasion, as his friends; and will not molest or retaliate upon them for the favourable disposition they may have shown. The friends of the British Government shall be his friends, and its enemies his enemies.

ARTICLE 8.

On the 2nd of May 1813, corresponding with the 17th Bysakh 1870 Sumbut, an agreement for the mutual suspension of hostilities was concluded between Lalla Partab Singh, on the part of the Rajah of Rewah, and Colonel Martindell, Commanding the British troops. A party of sepoy's escorting a cart of military stores appertaining to a detachment proceeding from the Singrownah Pass were, on the 7th of May 1813, corresponding with the 22nd of Bysakh 1870 Sumbut, treacherously, and in direct violation of the above agreement, attacked by a large body of horse and foot near to the village of Suttenee, and several sepoy's were killed and wounded, and the property plundered. The Rajah of Rewah having solemnly disavowed all knowledge or participation in the above atrocious act, hereby acknowledges the right of the British Government to punish the perpetrators of it in whatever manner and at whatever time it may please; and the Rajah further agrees to afford every assistance and co-operation in the accomplishment of the above object that the British Government may require of him.

ARTICLE 9.

It is both just and equitable that the Rajah of Rewah should indemnify the British Government for the expense of the armament which has been equipped and marched into Rowah in consequence of his failure to perform the conditions of his former engagements. At the lowest estimation the extra expense of that armament costs the British Government the sum of thirty-three thousand eight hundred and eight rupees per mensem, and the preparations having commenced some days before the 1st of April 1813, corresponding with the 15th of Chyite 1870 Sumbut, it is agreed by the British Government that the expense shall be calculated from that date. The Rajah of Rewah accordingly hereby acknowledges himself justly responsible for the payment of the above expense monthly to the British Government, calculating from the 1st of April

1813, or the 15th of Chy'te 1870 Sumbut, until such time as the objects of the present detachment shall have been entirely completed. In consideration, however, of the Rajah having obeyed the summons to repair in person to Colonel Martindell's camp on terms of unconditional submission, and in order to remove from the Rajah every excuse for the punctual liquidation of the amount, the British Government consents to limit the period of the charge to the 10th of May 1813, corresponding with the 25th By-akh 1870 Sumbut, the day on which the Rajah came into camp. Upon this principle the sum to be paid by the Rajah is forty-five thousand one hundred and seventy-three Rupees. The Rajah hereby engages to pay the above sum by the following instalments, any deviation from which will subject him to the penalties of a breach of the Treaty.

	Rs.	A.	P.
On the 8th June 1813 or 25th Jy'te 1870 Sumbut
On the 10th August or 15th Sawan 1870,	13,400	0	0
On the 6th December or 15th Aghun 1870,	13,400	0	0

ARTICLE 10.

This Treaty consisting of ten Articles having this day been concluded between the British Government and Rajah Joy Sing Deo, Rajah of Rewah, through the agency of Mr. John Wauchope, in virtue of powers delegated to him by the Right Honorable Lord Minto, Governor-General in Council, on the one part, and the Rajah in person on the other, Mr. Wauchope has delivered to the Rajah one copy of the Treaty in English, Persian and Hindoo, signed and sealed by himself, and the said Rajah has delivered to Mr. Wauchope another copy duly executed by himself, and Mr. Wauchope has engaged to procure and deliver to the accredited vakrel of the Rajah within the space of thirty days a copy ratified by the seal and signature of the Governor-General in Council, on the delivery of which the copy executed by Mr. Wauchope shall be returned, and the Treaty shall be considered from that time to have full force and effect.

Signed, sealed and exchanged at Budderah, on the banks of the Tonse, on the 2nd day of June 1813, corresponding with the 10th Jy'te 1870 Sumbut.

**SUPPLEMENTAL ARTICLE to the TREATY concluded
between the HON'BLE EAST INDIA COMPANY, and
RAJAH JYE SING DEO, the RAJAH of REWAH,
on the 2nd of June 1813, corresponding with
19th Jyote 1870 Sumbut.**

Whereas by the 3rd Article of Treaty concluded between the Honorable Company and the Rajah of Rewah on the 2nd of June 1813, corresponding with 19th Jyote 1870 Sumbut, the Rajah of Rewah has engaged to receive and permit to remain at his place of residence, a news-writer or any other Agent on the part of the British Government or the Agent in Bundelcund; and Whereas the Rajah has by the 4th Article of the aforesaid Treaty engaged to allow a dawk to be established through his territory, by the Officers of the British Government in any direction which may be deemed necessary: The Rajah, in the true spirit and intent of those stipulations, engages to treat the news-writer or Agent of the British Government or of the Agent in Bundelcund, with every mark of attention and consideration due to their relative rank and character, and also to allow a free passage through his territories to all hurcarrabs, cossids, or other messengers, whom the Officers of the British Government may, at any time, have occasion to employ, and to compel his feudatory Chiefs to do the same under the penalties and conditions proscribed with respect to the dawk. The Rajah further promises and engages to perform at all times those offices of friendship which are usual between allied States, and which may be necessary to accomplish the objects of the Treaty.

Persian Secretary to Government.

APPENDIX C.

121

A Statement of Agricultural Produce in the time of Mahārājā Ajit Singh (1761).

No.	Crops.	Area under cultivation in Bighas.	SEED SOWN.		ESTIMATED PRODUCE.		REMARKS.
			Quantity in Maunds.	Estimated value in Rupees.	Quantity in Maunds.	Estimated value in Rupees.	
1	Paddy (Dhān)...	755,663	447,338	4,47,338	4,533,377	45,33,377	At Re. 1 per Maund. The total produce comes up to nearly ten-fold of the seed sown.
2	Sāmān ...	46,091	864	576	118,366	1,22,811	At Re. 1 per Maund.
3	Makka (Maize)...	87,774	3,292	3,292	263,324	2,63,324	
4	Kakna ...	575	11	7	2,588	1,725	Produce 3 Mds. per bigha; price at Re. 1½ per Md. Kodon forms the staple food of the poor people. It is chiefly cultivated in hilly portions. The rates of produce are very variable, sometimes going up to hundred-fold, but it suffers greatly if there are long breaks of rains.
5	Bājura ...	21,324	800	1,000	63,972	79,965	
6	Kodon and Kodali	818,073	51,129	40,903	2,556,460	20,45,160	At Rs. 2½ per Md.
7	Urad and Mung,	16,519	750	1,875	23,138	57,845	At Rs. 2 per Md.
8	Mothī ...	617	31	62	9,270	18,540	At Rs. 2 per Md.
9	Cotton ...	85,780	5,368	10,768	214,438	8,57,752	Produce 50 times; price at Rs. 3 per Md.
10	Til ...	143,371	2,688	8,064	134,400	4,03,200	
11	Mejharī and Kutkī	61,588	1,615	1,077	80,736	53,824	Cultivated in hilly tracts.

No.	Crops.	Area under cultivation in Bighas.	SEED SOWN.		ESTIMATED PRODUCE.		REMARKS.
			Quantity in Maunds.	Estimated value in Rupees.	Quantity in Maunds.	Estimated value in Rupees.	
12	Jowar (Millet)...	100,496	4,106	5,132½	203,300	2,56,625	Produce 80 times; price at 32 srs. per rupee.
13	Arhar ...	30,514	1,141	1,430	85,800	1,07,250	75 times produce; price at 32 srs. per rupee.
14	Barbata ...	200	11	14	371	467	At 32 srs. per rupee; as an item of food article especially confined to him-nagar purgani.
15	Wheat ...	361,700	216,963	4,33,926	1,081,815	21,69,630	5 times produce; at Rs. 2 per Md.
16	Berri (mixture of wheat and gram),	6,141	3,378	6,142	20,268	36,851	Produce 6 times; price at 22 srs. per rupee.
17	Gram ...	305,466	152,723	2,03,611	1,060,181	17,81,883	Produce 7 times; price at 24 srs. per rupee.
18	Matar and Masur.	212,703	100,406	1,07,493½	703,492	11,72,453½	Produce 7 times; price at 24 srs. per rupee.
19	Jau and Jan-berri (barley and mixture of barley and gram),	241,833	144,494	1,80,617½	1,155,952	14,44,940	Produce 8 times; price at 1½ rupee a Md.
20	Linseed ...	171,698	11,668	38,893½	291,700	9,72,333½	Produce 25 times; at 12 srs. a rupee.
21	Sarson and Rai	3,922	49	196	2,450	9,800	Produce 50 times; at 10 srs. per rupee.
22	Castor ...	167	4	10	417	1,042	Produce 75 times; at 16 srs. per rupee.
23	Pān (betel leaves)	347	4,357	
24	Poppy ...	284	5	25	...	2,840	
25	Sugarcane ...	175	6,816	
26	Tobacco ...	688	21,000	At 12 rupees per bigha.
						13,765	

No.	Crops.	Area under cultivation in Bighas	SEED SOWN.		ESTIMATED PRODUCE.		REMARKS.
			Quantity in Maunds.	Estimated value in Rupees.	Quantity in Maunds.	Estimated value in Rupees.	
27	Haldi (turmeric),	5	18	
28	Vegetables ...	2,120	31.815	
29	Flax ...	315	1,890	
	TOTAL ...	3,495,145	1,148,937	1552485½	12,690,334½ Food article 12,690,306; opium 28½	16454400	This total value of produce estimated can be taken as fairly correct, because, assuming the incidence of land tax ¼ of the total produce, the total produce would come up to Rs. 1,64,97,700 The difference of Rs. 2,43,380 or nearly 2½ lakhs cannot materially affect such a big calculation.

DEDUCT :—

For seeds even without creditor's profits ...	Rs. 15,52,485	
Rents paid by the cultivators to Darbār and <i>Paucaiyas</i> ..	27,82,959	43,35,444

Therefore net profits of the cultivators ... Rs. 1,21,18,936

Now, supposing that the largest area of cultivated land covered under one plough is 25 *bighas* and that the total area under cultivation is 3,495,145 *bighas*, the number of ploughs required to till the whole area would be 139,806

The average annual income of a cultivator for one plough would therefore be ... Rs. 86 11-0

N.B.—A person generally cultivating with one plough has, on an average, five persons more including his *harrāha* to support. Thus his condition is quite at a par with low paid *moharrirs* of the State.

The average annual income of one cultivator out of 643,389 cultivators as returned in the last Census ... " 18-11-6

The average income of one cultivator per year out of 878,362 persons entirely depending on agriculture ... " 13-14 0

The average produce per *bigha* considering all kinds of soil and crop is nearly ... 3 Mds., 24 srs., 4 chs.

The cash value of produce on an average ... " 4-12 6

The total produce 12,690,306 minus 1,552,485 Mds. of seed gives 8 Mds., 16 srs., 8 chs., as the share of one man per year, that is, 16 *chhatāks* per day for the whole population of Rewāl 1,327,385.

The average share of one person out of 878,362 persons entirely depending on agriculture ... 12 Mds., 27 srs., 7 chs. a year
= 1 sr., 6 chs. per day.

The incidence of land tax per *biṛḥa* ... Re. 0-12-9.

The average incidence of land tax on the total produce of land of all kinds = ½.

REWAH STATE.

APPENDIX D.

A Statement of Villages by Parganas in the time of Mahārājā Ajit Singh (1761).

No.	Name of Pargana or revenue units.	Number of villages.	Jama or value of the villages.	Remarks.
			Rs.	
1	Ghughari, Ghur, etc.,...	250	...	Ghughari is low, a deserted village. Its site is marked by a streamlet named Ghughari, on the south side of Kaimur, 6 miles to the south of Garh.
2	Kapri, Kerti, Gurua, Daur, Bhowari,	350	...	This pargana was recognised up to a recent date. Bhowari is situated near Mangawān.
3	Dihī, Ramnai ...	350	...	Ramnai to the east of the Rewah town at a distance of 8 miles; Dihī, 8 miles to the south of the Rewah town.
4	Sengrān, i.e., the territories of the Sengars, divided into two parts, viz.— (1) Banwar or forest lands. (2) Danwar, to the west of Manganj, clear of forests.	700		
5	Kharamsera ...	700	...	Including south-western part of the Ilahābād tahsīl, on the north part of the Raghu-rājnagar tahsīl and the State of Maihar.
6	Naikin and Chorhāt ...	350	...	Included into the State held by the Rājā Sahib of Chorhāt.
7	Bhagdeora ...	350	...	Part of it included into the Mādhogarh

No.	Name of Pargana or revenue units.	Number of villages.	Jama or value of the villages.	Remarks.
8	Gahora (10 parganas) in the Banda District—			or Raghunājnagar pargana and part composing the <i>ilāka</i> of the Thākur of Durjanpur, an <i>ubā-rīdār</i> of Sohāwal State.
	(a) Bhitari ...	12 $\frac{1}{2}$		
	(b) Kon ...	12 $\frac{1}{2}$		
	(c) Parsenda ...	12 $\frac{1}{2}$		
	(d) Darsenda ...	84		
	(e) Koni ...	66		
	(f) Gahora ...	404		
	(g) Lakhanpur ...	84		
	(h) Kalsayānpur ...	200		
	(i) Chaurāsi ...	84	...	Chaurāsi was the most common convention of naming parganas.
9	Pardawān (4 parganas)	Pardawān is a village in the Allahābād District situated on the bank of the Jumna on the borders between the Banda and Allahābād Districts. Pardawān has long been the pargana of Rewah below the Vindhyan plateau of Rewah. The following couplet of Hindi fully corroborates the fact:—
	(a) Arail ...	484		
	(b) Khairāgarh ...	750		
	(c) Bardawān ...	750		
	(d) Kantit ...	750		
				<i>Bārāh Pardam sorah Dahūr.</i>
				That is, the revenue of Pardawān was 12 lakhs and that of Dahūr, i.e., of the territories on the plateau, 16 lakhs.

No.	Name of Pargana or revenue units.	Number of villages.	Jama or value of the villages.	Remarks.
10	Chanarh (11 parganas)			Kantit is in Mirzāpur taluk.
	(a) Patchra ...	56		
	(b) Kolan ...	300		
	(c) Kaira ...	200	...	All these parganas are now out of the Rewah territories.
	(d) Magrautha ...	315		
	(e) Charnār (Chunār) ...	300		
	(f) Bijaigiri ...	350		
	(g) Baihar ...	700		
	(h) Kariya ..	12		
11	Baijnāth (Chaurāsi) ..	84	...	Included in the Huzūr taluk.
12	Rahath, extending to Badā Shivrājpur, E. I. R. station, 28 miles to the south of Allahābād.	1,400		
13	Kotar (Badā) ...	750	...	Forming part of the Ajaigarh State (Bundelkhand). It long formed a scene of contested fighting between the Bundelās and the Baghelas represented by the forefathers of the Rājā of Kothl.
14	Barmain ...	250	...	Forming the territories of the Rājā of Nagod.
15	Hati ...	175	...	Included into pargana of Raghunāj-nagar.
16	Bāndhogarh ...	350		
17	Kot ...	350	...	To the west of the Bāndhogarh hills.
18	Mardari ...	140	...	The village still exists.
19	Karkati ...	700		
20	Bhākhār ...	1,400	...	The hilly tract beyond Sohāgpur.
21	Pindra ...	350	...	Now forming the

No.	Name of Pargana or revenue units.	Number of villages.	Jama or value of the villages.	Remarks.
22	Khardhar ...	81	...	District of Bilāspur. Part of Rāmānagar pargana represented by the villages of Jobi, Amarpur, Barhi, &c.
23	Murkatia ...	140		
24	Sohāgpur ...	81		
25	Ilākas owned by Baran (perhaps Balandas)	350		
26	Jhiria ...	350		Now forming part of Govindgarh. Included into the Murwāra tahsil of the Jabalpur District (Central Provinces).
27	Bansa ...	84	...	
28	Bhainswahi ...	350	...	
29	Ilāka held by Rachhas of Sirgūja in Chotā Nāgpur.	81		
30	Deogarh (36 parganas)—			
	(a) Bardi ...	350		
	(b) Agori ...	350		
	(c) Sengronli ...	1,400		
	(d) Marwās ...	850		
	TOTAL ...	18,499	...	

Total villages 18,820½, out of which Chhaparband 16,002 and plots 2,818½.

Statement shewing Khālās and alienated land in the time of Mahārājā Ajit Singh (A. D. 1761).

Land owned by the kinsmen of the chief to the value of Rs. 13,10,000, the number of villages being 6,949.

Details of the above :—

No.	Name of original owner.	Number of villages.	Jama or value of the villages. Rs.	Remarks.
1	Bābu Keshornāo, son of Mahārājā Ardhūt Singh, holding the pargana of Gurh.	48	32,000	Almost all these villages have now lapsed to the Darbār.
2	Bābu Makund Singh, nephew of Mahārājā Bhao Singh.	210	45,000	

No.	Name of original owner.	Number of villages.	Jama or value of the villages.	Remarks.
	1. Semaria, 84 villages of Rs. 25,000.		Rs.	
	2. Villages formerly owned by Dhandoras, 84 of Rs. 10,000.			
	3. Dinda, 42 villages of Rs. 10,000.			
3	Babu Jujhār Singh, son of Mahārāja Anūp Singh, holding the <i>pargana</i> of Rāmpnagar.	200	80,000	
4	Babu Fateh Singh, son of Mahārāja Amar Singh, head of the Sohāwal chiefs.	483	1,67,000	
	<i>Details :—</i>			
	(a) Sohāwal, 12 villages, { Rs.			
	(b) Darjampur, 42 villages, { 10,000.			
	(c) The territories formerly owned by the Bais Kshatriyas identified by the modern villages of Jhari, Majhgawān, &c., in Raghurāj-nagar <i>pargana</i> , villages 175 of Rs. 50,000.			
	(d) Singhpur, 22 villages of Rs. 10,000.			
	(e) Rounr, 22 villages of Rs. 10,000.			
	The <i>parganas</i> (d) and (e) are now included into the Pannā State (Bundelkhand). They are some 9 miles beyond Nāgod			
	(f) Deohata, 21 villages of Rs. 15,000.			
	(g) Jharli, 24 villages.			
	(h) Raigaon, 12 villages of Rupees 12,000			

No.	Name of original owner.	Number of villages.	Jama or value of the villages.	Remarks.
	(Now forming a <i>jāgīr</i> under the chief of Sohāwal).		Rs.	
	(i) Bhajikher, 84 villages of Rs. 25,000.			
	(j) Jaso, 2½ villages of Rs. 15,000 (Now forming a Thākūrāt of a Bundelā Thākūr).			
	(k) Kothi, 80 villages of Rs. 20,000 (Now forming a separate chieftship).			
5	Parrat Singh, kinsman, belonging to the house of Amawa, now represented by the Thākūr of Lūlgaon in Teonthar (Rewah State).	84	15,000	
6	Lāl Samar Singh's holding (including Maihar).	1,400	1,00,000	
7	Sri Mahārāj Singh (Lūk, Chowkhari and Jirounha, all in Teonthar).	240	1,50,000	
8	Chatur Singh (Deori and Kasautā).	125	1,00,000	
9	The share of Chowkhari, now lapsed to the State.	
	(a) Garhi, held by Pratāp Singh.	42	20,000	
	(b) Manik, held by Rachhapāl Singh.	42	10,000	
	(c) Solarwa, held by Chain Singh.	22	10,000	
	(d) Barha, held by Umarao Singh.	16	8,000	
	(e) Chāmū, held by Bachhrāj Singh.	1	8,000	
10	Chandia Kauria, held by Fakir Shāh.	700	10,000	

No.	Name of original owner.	Number of villages.	Jama or value of the villages.	Remarks.
			Rs.	
11	Naikin, Chorhāt, held by Rao Jagannāth Singh and Lallu Sāhib.	125	55,000	
12	Sohāgpur, held by Bhairā Hemrāj, a kinsman of Maihar branch.	
	(a) Sohāgpur ...	400	1,00,000	
	(b) Singhpur ...	300	80,000	
	(c) Anūppur ...	400	50,000	
	(d) Rāmpur ...	300	50,000	
	(e) Dhanīgawān ...	300	30,000	
	(f) Nawālpur ...	300	25,000	
	(g) Karkati ...	700	1,00,000	
	(h) Pindra ...	350	50,000	
	TOTAL ..	6,949	18,10,000	

Land granted to or held by petty Rājās and Zamīndārs who rendered periodical services to the Mahārājā of Rewah.

1	Rājā Chain Singh Parīhār of Barmain (an old name for the Nāgod State).	
	(a) Unchahra ...	250	1,00,000	
	(b) Bataiya ...	84	20,000	
	(c) Surdaha ...	84	20,000	
	(d) Lohranra ...	12	6,000	
	(e) Nāgod ...	24	10,000	
	(f) Jignahat ...	24	10,000	
	(g) Others ...	84	30,000	
2	Dikshit Rājā Anant Singh of Goraiya.	1	1,000	
3	Raghurāsi Rājā of Birgarh, Pāthar Kachār.	168	1,00,000	
4	Surki Rājā Hirdai Rām, holding parganas of Gahora (Bānda).	1,043½	20,00,000	
5	Penurānsi Rājā, holding the pargana of Teonthar now lapsed to the State.	200	1,00,000	
6	The Sengar Rājā of Mau.	700	1,00,000	

No.	Name of original owner.	Number of villages.	Jama or value of the villages.	Remarks.
			Rs.	
7	The Rājā of Sirguja ...	700	1,00,000	
8	The Chandel Rājā of Bardī and Agori.	700	1,00,000	
9	The Rājā of Chang ...	500	60,000	
10	The Gaharwār Rājā of Kantit.	989	6,00,000	
<i>Land included into the Imperial territories.</i>				
1	Arail pargana ...	484	70,000	
2	Khairāgarh ...	750	6,00,000	
3	Chanarh ...	1,400	80,00,000	
4	Bijaigiri ...	350	1,00,000	
<i>Territories seized by the Bundelās.</i>				
1	Maihar ...	700	1,00,000	
2	Bada Kotar ...	700	2,00,000	
3	Baisan ...	350	2,00,000	
4	Barmain and Kothī ...	300	2,00,000	
5	Amawa and Kakreri ...	100	15,000	
	TOTAL	7,15,000	

Lands in direct possession of the State and distributed among Rānis, Paipakhāris or other minor landholders.

1	The parganas of—		
	(a) Rahath
	(b) Ghughari
	(c) Bhagdeora ...	2,400	5,00,000
	(d) Kharamsara
2	Chowkara ...	240	50,000
3	Bāndhogarh ...	2,000	70,000
4	Teonthar belonging to Pardawān.	240	70,000
5	Kothī ...	240	75,000
6	Hatipathrahat (now portions of the Raghu-rājnagar pargana).	175	70,000
7	Naugawān, Bhowari, Semari.	42	10,000
8	Dihi, Ramnanai ...	434	1,00,000
	TOTAL ...	6,011	9,45,000

APPENDIX E.

Political Officers of the Baghelkhand Agency.

(An account has been given where possible.)

1857-62

Colonel Willoughby Osborne, S. C., was temporarily appointed British Agent in 1857 to assist the Mahārāja of Rewah in his government and was withdrawn in 1862 at the Mahārāja's request.

1871

Captain G. R. Goodfellow.

Serial Number.	Name.	Family or clan.	Title.	Area of the holding.	Number of villages.	Normal income.	Brief history of the family.
1	2	3	4	5	6	7	8
23	Rājā Rudraprasād Singh.	Venuvanshi Rājput.	Rājā of Shāhpur Sengrauli.	...	221	Rs. 60,000 of that portion only which lies in the Rewah State.	This estate comprises of lands lying partly in the Rewah State and partly in the British territories (United Provinces). Formerly the present Sengrauli estate was in possession of Rājā Shānkhaīrwār by caste. A Kālānki Rājā, a Venuvanshi Kabatriya of Teonthar, killed the Khaīrwār Rājā in a battle and established his own possession in the land. Shāhpur Sengrauli came under the suzerainty of the Rewah Darbār, during Mahārājā Visvanāth Singh's time.
24	Bhaiya Bahādūr Lāl Sukh Dev Singh,	Baghel.	Thākūr of Sohāgpur.	...	343	40,000	The Thākūr is descended from Jamuni Bhānu, younger son of Mahārājā Dīr Singh Dev of Rewah. Jamuni Bhānu received the estate of Mailhar and Sohāgpur as his ancestral share, of which the latter estate was inherited by Rudrapratāp Singh, second son of Jamuni Bhānu. In Samvat 1855 (1808 A. D.), during the time of Raghoji

D. the possessions of the Bhonsla chief came under the British rule this estate was also annexed for a time to the British territories. In 1859 A. D., however, it was given back with the <i>pargana</i> of Amarkantak to the late Mahārājā Raghurāj Singh in recognition of the valuable service rendered during the Mutiny. Mahārājā Raghurāj Singh acknowledged Vijaya Bahādur Singh, son of Garul Singh, one of Duniyāpati Singh's sons, as Thākur of Sohāgpur on payment of annual tribute of Rs. 5,000 and conferred upon him the title of Bhaiya Bahādur.</p> <p>Belongs to the Chandel rulers of Bardī.</p> <p>Rājā Ajit Singh, ancestor of the present</p>

Rewah State.

TABLE XXXI—(concluded).

Serial Number.	Name.	Family or clan.	Title.	Area of the holding.	Number of villages.	Normal income.	Brief history of the family.
1	2	3	4	5	6	7	8
26	Gopi! Saran Singh.	Sengar.	Thākur of Naigathi.	...	81	Rs. 93,000	<p>Thākur, gave over his <i>itāka</i> of Bardī to the Rewah Darbār in Samvat 1878 (1821 A. D.), and received from the Darbār for his maintenance 75 villages which are still in the possession of the present Thākur.</p> <p>This family is a branch of the Sengars of Mauganj who are an offshoot of the clan which migrated from the Jalaun District. For many generations the Sengars and the Baghels were rivals for supremacy. The Sengars conquered and held the north-eastern portion of the country comprising the present <i>pargana</i> of Mauganj, their leader being styled the Rājā of Mauganj.</p>

GLOSSARY.

Abbreviations.—H.=Hindī ; A.=Arabic ; P.=Persian ;
Skt.=Sanskrit.

Bhāg [H.].—Division of crops between cultivator and landlord.

Bīgha [H. from Skt. *vighra*].—A land measure very variable in Central India, on an average= $\frac{1}{2}$ acre (See Blochmann—*Ain-i-Akbari*, II, 61, 62).

Chaukidār [H. from *chauki*, a place where four roads meet].—A village watchman or an irregular policeman ; one in charge of a *chauki* or outpost.

Dafādār [H.].—The highest non-commissioned officer in the cavalry, corresponding to *Havildār* in infantry.

Darbār [P. a dwelling].—Used in two senses : (a) *Darbār*, the administration of a Native State, (b) *darbār*, an assemblage, e. g., Rewah *Darbār* or State of Rewah, and *Dasahra darbār*, the yearly assemblage at the *Dasahra* festival : also *Huzār Darbār*, chief's own office, *Darbār-i-ām*, minister's office, open court, &c.

Dasahra [H. from Skt. *dasha*, ten and *har*, removing, i. e., removing the ten(sins).].—Is held on the *Ashwin Sudī* 10th (September-October). It is an important festival with Rājputs and Marāthās, being especially affected by the martial classes. It commemorates the day on which Rāma marched against Rāvana, on the 10th day after he worshipped Durga whence the feast is called *Durga-pūja*. On account of Rāma's victory, gained after an appeal to the goddess, the 10th day is also called the *Vijaya-dashmi*, or 10th of victory. Its real importance, however, lay in the fact that it fell at the end of the rains when the warrior class re-commenced their forays and raids.

Diwālī [H. from Skt. *dīp*, a lamp and *awālī*, a row, a row of lamps.]. The autumn festival held on the last two days of the dark half (*Badī*) of *Ashwin* (September-October) and the new moon of *Kārtik* (October-November). It lasts from the 13th or *Dhan-trayodashi* (13th of wealth) or the 14th called *Narka-chaturdashi* (14th of Nark), as commemorating the slaying of the demon Nark by Vishnu, to the *Yama-dwitiya*.

the day of the new moon which is sacred to *Yama*, the god of the lower regions.

Diwān [P. and A. = a register or account.].—The minister of a state.

Dufasli [A. *fasl*, harvest ; *fasl*, cutting.].—Land bearing two (*du*) crops.

Ghāt [H. from Skt. *ghat*, cut.].—A cutting or pass in the hills ; a landing stage on a river or tank ; a bathing place with steps.

Ghī [H. from Skt. *ghrita*.].—Clarified butter, produced by boiling it.

Gur [H. from Skt. *raw sugar*.].—Molasses.

Harkāra [P. from *har*, every, *kār*, work.].—A messenger, especially dāk-runner.

Holī [Skt. *Holika*].—The great spring festival held at the vernal equinox during the ten days preceding the full moon of *Phālgun* (February-March). It is only observed, as a rule, on the last three days.

Ilāka [A. lit. = relation or connection.].—A district, tract or estate. One in possession is called *ilākdār*.

Jāgīr [P. from *jāe*, place, *gīr*, to hold.].—An assignment of land held under various conditions, but usually requiring payment of a certain percentage of the revenues, or the performance of feudal service. (—*dār*, one holding a *jāgīr*.)

Jamādār [P. and A. from *jama*, an aggregate.].—One commanding a body of men ; in the army an officer next in rank of a *sābādār* (captain) ; in civil employ a headman ; among forest, customs, etc., guards, peons and the like.

Kānungo [P. a speaker (*go*) of rules (*kānun*).].—A revenue official who supervises the *patwārīs*.

Khālāsī [P. from *khālīa*, pure, genuine.].—Lands administered by the Durbār direct, and not given on fann, in *jāgīr*, etc.

Kharif [A. autumn.].—The autumn agricultural season (May-October).

Kothār [H.].—Unalienated villages as opposed to alienated, or *pawaiya* villages.

Muāmila [A. from *amal*, action, effect, dominion.].—A form of tenure similar to *jāgīr*.
